PENTAX

Digital Camera

Optio E60

Operating Manual
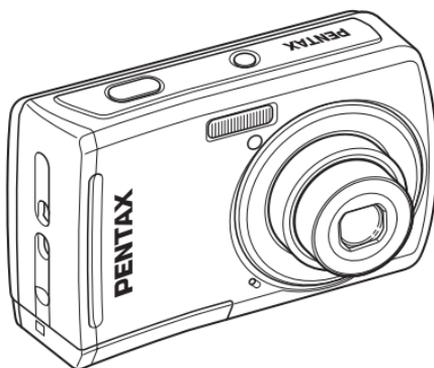

To ensure the best performance from your camera, please read the Operating Manual before using the camera.

Thank you for purchasing this PENTAX Digital Camera.
Please read this manual before using the camera in order to get the most out of all the features and functions. Keep this manual safe, as it can be a valuable tool in helping you to understand all the camera capabilities.

Regarding copyrights

Images taken using this PENTAX Digital Camera that are for anything other than personal enjoyment cannot be used without permission according to the rights as specified in the Copyright Act. Please take care, as there are cases where limitations are placed on taking pictures even for personal enjoyment during demonstrations, performances or of items on display. Images taken with the purpose of obtaining copyrights also cannot be used outside the scope of use of the copyright as laid out in the Copyright Act, and care should be taken here also.

Regarding trademarks

- PENTAX and Optio are trademarks of HOYA Corporation.
- SDHC logo ( ) is trademark.
- This product supports PRINT Image Matching III. PRINT Image Matching enabled digital still cameras, printers and software help photographers to produce images more faithful to their intentions. Some functions are not available on printers that are not PRINT Image Matching III compliant.
  Copyright 2001 Seiko Epson Corporation. All Rights Reserved.
  PRINT Image Matching is a trademark of Seiko Epson Corporation.
  The PRINT Image Matching logo is a trademark of Seiko Epson Corporation.
- All other brands or product names are trademarks or registered trademarks of their respective companies.

To users of this camera

- There is a possibility that recorded data may be erased or that the camera may not function correctly when used in surroundings such as installations generating strong electromagnetic radiation or magnetic fields.
- The liquid crystal panel used in the display is manufactured using extremely high precision technology. Although the level of functioning pixels is 99.99% or better, you should be aware that 0.01% or fewer of the pixels may not illuminate or may illuminate when they should not. However, this has no effect on the recorded image.
- There is a possibility that the illustrations and the display screen in this manual are different from the actual product.
- In this manual, both an SD Memory Card and an SDHC Memory Card are referred to as SD Memory Cards hereafter.
- In this manual, the generic term "computer(s)" refers to either a Windows PC or a Macintosh hereafter.

Regarding PictBridge

PictBridge allows the user to connect the printer and digital camera directly, using the unified standard for the direct printout of images. You can print images directly from the camera through a few simple operations.

Regarding Product Registration

In order to better serve you, we request that you complete the product registration, which can be found on the CD-ROM (S-SW81) supplied with the camera or on the PENTAX website. Thank you for your cooperation.
Refer to the "PC Connection Manual" (bottom right on page 1) for more information.

USING YOUR CAMERA SAFELY

We have paid close attention to the safety of this product. When using this product, we request your special attention regarding items marked with the following symbols.

⚠ **Warning** This symbol indicates that violating this item could cause serious personal injuries.

⚠ **Caution** This symbol indicates that violating this item could cause minor or medium personal injuries, or material losses.

About the Camera

⚠ Warning

- Do not attempt to take the camera apart or remodel the camera. High voltages are present within the camera, and there is therefore a danger of electric shocks if the camera is taken apart.
- If the inside of the camera should become exposed as a result of, for example, the camera being dropped, please do not under any circumstances touch such exposed portions, as there is a danger of receiving an electric shock.
- To avoid the risk of it being swallowed by mistake, keep the SD Memory Card out of the reach of small children. Seek medical attention immediately if a card is accidentally swallowed.
- Wrapping the strap of the camera around your neck is also dangerous. Please take care that small children do not hang the strap around their necks.
- Use an AC adapter that is of the power and voltage specified for exclusive use with this product. The use of an AC adapter other than that specified exclusively for use with this product may cause fire or electric shocks.
- If the camera emits smoke or a strange smell, or in the event of any other irregularity, stop using the camera immediately, remove the batteries or unplug the AC adapter, and contact your nearest PENTAX Service Center. Continued use of the camera may result in fire or electric shock.
- During thunderstorms, unplug and discontinue use of the AC adapter. Continued use could cause equipment failure, a fire, or electric shock.

1

⚠ **Caution**

- Never try to disassemble or short the batteries. Also, do not dispose of the batteries in a fire, as they may explode.
- Do not charge any batteries other than rechargeable Ni-MH batteries. The batteries could explode or catch fire. Batteries for use with this camera other than Ni-MH batteries cannot be charged.
- Do not place your finger on the flash when it is discharging as there is a risk of burns.
- Do not discharge the flash while it is touching your clothing as there is a risk of discoloring of the clothing.
- If any leakage from the batteries should come in contact with your eyes, do not rub them. Flush your eyes with clean water and get medical attention immediately.
- If any leakage from the batteries should come in contact with skin or clothes, wash the affected areas thoroughly with water.
- Remove the batteries from the camera immediately if they become hot or emit smoke. Be careful not to burn yourself during removal.
- Some portions of the camera heat up during use, so please take care, as there is a risk of low temperature burns if such portions are held for long periods of time.
- Should the liquid crystal display be damaged, be careful of glass fragments. Also, be careful not to allow the liquid crystal to get on your skin or in your eyes or in your mouth.
- Depending on your inherent factors or physical condition, the use of the camera may cause itching, rashes or blisters. In case of any abnormality, stop using the camera and get medical attention immediately.

Handling Precautions for Batteries

- This camera uses two AA alkaline, AA lithium, AA Ni-MH or AA nickel manganese batteries. Do not use batteries other than those specified here. Using some other type of battery may cause the camera to function poorly, or the batteries may rupture or cause a fire.
- AA alkaline, AA lithium and AA nickel manganese batteries cannot be recharged. Do not try to take the batteries apart. The batteries may rupture or leak if you try to charge them or take them apart.
- Do not remove the external seal of the battery. If the seal is removed, the battery may short and may cause a fire, rupture, leak or heat.
- When replacing the batteries, do not combine different brands, types or capacities. Also, do not combine old batteries with new ones. Doing so may cause the batteries to rupture or cause a fire.
- Do not insert the batteries with the positive (+) and negative (–) poles in the wrong orientation. Doing so may cause the batteries to rupture or cause a fire.

About the AC Adapter

⚠ Caution

- Do not place heavy objects on the AC plug cord, allow heavy objects to drop onto it or allow the AC plug cord to become damaged due to excessive bending. If the AC plug cord becomes damaged, consult a PENTAX Service Center.
- Do not short or touch the output terminals of the product while it is still plugged in.
- Do not plug in the AC plug cord with wet hands. This can cause an electrical shock.
- Do not subject the product to strong impacts or allow it to drop onto a hard surface. This can cause a malfunction.
- To reduce the risk of hazards, use only CSA/UL Certified power supply cord set, cord is Type SPT-2 or heavier, minimum NO.18 AWG copper, one end with a molded-on male attachment plug cap (with a specified NEMA configuration), and the other is provided with a molded-on female connector body (with a specified IEC nonindustrial type configuration) or the equivalent.

Care to be Taken During Handling

- Take the Worldwide Service Network listing that is included in the package with you when traveling. This will be useful if you experience problems abroad.
- When the camera has not been used for a long time, confirm that it is still working properly, particularly prior to taking important pictures (such as at a wedding or during traveling). Contents of the recording cannot be guaranteed if recording, playback or transferring your data to a computer, etc. is not possible due to a malfunction of your camera or recording media (SD Memory Card), etc.
- The lens on this camera is not interchangeable. The lens is not removable.
- Do not clean the product with organic solvents such as thinner, alcohol or benzene.
- Places of high temperature and humidity should be avoided. Particular care should be taken regarding vehicles, which can become very hot inside.
- Storing the camera where pesticides and chemicals are handled should be avoided. Remove from case and store in a well-ventilated place to prevent the camera from becoming moldy during storage.

- As this camera is not waterproof, do not use the camera where it may come in contact with rain, water or any other liquid.
- Ensure that the camera is not subjected to substantial vibrations, shocks or pressure as this may cause damage or malfunction. Place the camera on a cushion for protection when the camera is subjected to the vibrations of a motorbike, car, ship, etc. If the camera is subjected to substantial vibrations, shocks or pressure, take your camera to your nearest PENTAX Service Center and have it checked.
- The temperature range in which the camera can be used is 0°C to 40°C (32°F to 104°F).
- The liquid crystal display will become black at a high temperature but will return to normal when normal temperatures are returned to.
- The response speed of the liquid crystal display becomes slow at low temperatures. This is due to the properties of the liquid crystal and is not a fault.
- Periodic checks are recommended every 1 to 2 years in order to maintain high performance.
- If the camera is subjected to rapid temperature changes, condensation may form on the inside and outside of the camera. Therefore put the camera in a bag or plastic bag, and take the camera out when the difference in temperature has subsided.
- Be careful not to allow dirt, mud, sand, dust, water, toxic gases or salt to enter the camera as this may damage the camera. Wipe away any raindrops or water droplets and allow the camera to dry.
- Refer to "Precautions When Using an SD Memory Card" (p.25) regarding the SD Memory Card.
- Please note that formatting an SD Memory Card or built-in memory will delete all data; however it may still be possible to recover that data using off-the-shelf data recovery software. Please manage your camera memory at your own risk.
- Please do not press forcefully on the display. This could cause breakage or malfunction.
- Be careful not to sit down with the camera in your back pocket as this may damage the exterior of the camera or the display.
- When using a tripod with the camera, be careful not to overtighten the screw in the tripod socket on the camera.

Contents

Appendix 156

Composition of the Operating Manual

This Operating Manual contains the following chapters.

1 Getting Started ─────────────────────────────

This chapter explains what you need to do after purchasing the camera before you start taking pictures. Be sure to read it and follow the instructions.

2 Quick Start ─────────────────────────────────

This chapter explains the simplest way to take pictures and play back images. Use it if you wish to start taking pictures or playing back images straightaway.

3 Common Operations ───────────────────────────

This chapter explains common operations such as the functions of the buttons and how to use the menus. For more details, refer to the respective chapters below.

4 Taking Pictures ─────────────────────────────

This chapter explains the various ways of capturing images and how to set the relevant functions.

5 Playing Back and Deleting Images─────────────

This chapter explains how to view still pictures and movies on the camera or on a TV and how to delete images from the camera.

6 Editing and Printing Images ─────────────────

This chapter explains the various ways of printing still pictures and how to edit images with the camera. For information on transferring images to a computer and installing the provided application software, see the supplied "PC Connection Manual". For details on editing and printing images on a computer, see the Help menu of the application software.

7 Recording and Playing Back Sound─────────────

This chapter explains how to record sound files (Voice Recording mode) and how to play back sound files.

8 Settings ─────────────────────────────────────

This chapter explains how to set the camera-related functions.

9 Appendix─────────────────────────────────────

This chapter deals with troubleshooting and lists the optional accessories.

The meanings of the symbols used in this Operating Manual are explained below.

☞	indicates the reference page number for an explanation of the related operation.
memo	indicates information that is useful to know.
Caution	indicates precautions to be taken when operating the camera.

Camera Features

The Optio E60 features a variety of shooting modes to suit different situations. Here we briefly describe how to make the most of the key features of your camera. Together with the explanations of camera operations, it will enable you to enjoy your camera to the full.

Easy-to-Navigate Capture and Playback Functions!

The Optio E60 features an easy-to-see 2.4-inch display. In addition, settings for capture, playback and editing functions are easy to navigate. Simply select icons that appear on the display.

Picture taking has never been simpler in ☐ (Green) mode. With just one press of a button, you can capture every smile, every moment, and every memory. (p.54)

If you are unsure of which shooting mode to use, select ▓▓ (Auto Picture). The camera selects the appropriate shooting mode depending on the scene. *(p.56)

* When you select ▓▓ (Auto Picture), a shooting mode is selected from ☺ (Standard), 🌃 (Night Scene), 🏔 (Landscape), ⓠ (Portrait), 🌃 (Night Scene Portrait), 🏃 (Sport) and 🌸 (Flower).

- **Let the camera choose the optimal settings.**
- **Use the Green Mode to take pictures easily using standard settings.**

Have Fun with Adding a Frame to a Picture or Taking Panoramic Pictures!
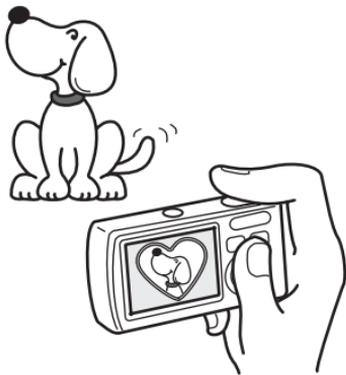

With the Optio E60, you can add a fancy frame when taking a picture of a child or your pet, for example. (p.67) You can also add frames to pictures you have taken. Taking panoramic pictures is also easy, as the camera stitches up to 3 pictures into a panoramic scene. (p.64)

- **For decorating your pictures with a frame.**
- **For capturing a panoramic scene.**

Easy Printing without Using a Computer!

By connecting the camera to a printer that supports PictBridge using the USB/AV cable, you can enjoy printing out images directly from the camera with a touch of a button.
Gone are the days of not being able to print out pictures at home because operating the computer was too difficult!

- **Easily print out images without using a computer.**

Display Images and Sound Files in Calendar Format!

The Optio E60 lets you display recorded images by date in calendar format. You can easily find the image you wish to play back as you look back at your album. (p.99)

Monitor Indications

Normal Display in Still Picture Capture Mode
The display shows information such as the shooting conditions.

1 Shooting mode (p.49)
2 Face Priority icon (p.51)
3 Flash mode (p.79)
4 Camera shake icon (p.84)
(appears only when the shutter
release button is pressed halfway)
5 Date Imprint setting (p.88)
6 Drive mode (p.85 – p.87)
7 Focus mode (p.76)
8 Digital zoom and
Intelligent zoom icon (p.73)

9 Memory status (p.27)
   :Built-in memory
   (without card)
   :SD Memory Card
   :Card is write-protected
10 Remaining image storage capacity
11 Battery level indicator (p.20)
12 Focus frame (p.33)
13 EV compensation (p.83)
14 Date and time (p.31)
15 World time setting (p.145)

* Some indications may not appear depending on the shooting mode.

Full Display in Still Picture Capture Mode
(All of the indications are displayed here for explanatory purposes.)

1 Shutter speed
(appears only when the shutter
release button is pressed halfway)

2 Aperture
(appears only when the shutter
release button is pressed halfway)

3 Recorded pixels (p.69)
4 Quality level (p.71)
5 Sensitivity (p.81)

* Some indications may not appear depending on the shooting mode.

15

Full Display in Still Picture Playback Mode
(All of the indications are displayed here for explanatory purposes.)
The display shows information such as the shooting conditions. A1 to A10 appear
when "Normal Display" or "Detailed Display" is selected. B1 to B5 appear only
when "Detailed Display" is selected. (p.97)

- **A1** Playback mode (p.53)
- **A2** Face Priority icon (p.53)
- **A3** Folder number (p.148)
- **A4** File number (p.36)
- **A5** Protect icon (p.114)
- **A6** Battery level indicator (p.20)
- **A7** Volume indicator (p.141)
- **A8** Memory status (p.27)
  - 🖾 :Built-in memory
    (without card)
  - ⬚ :SD Memory Card
  - ⬚ :Card is write-protected

- **A9** Shooting date and time (p.31)
- **A10** Four-way controller operation
- **B1** Recorded pixels (p.69)
- **B2** Quality level (p.71)
- **B3** Sensitivity (p.81)
- **B4** Shutter speed
- **B5** Aperture

In Normal Display, A6 and A9 disappear if no operation is performed for two
seconds.

Button operation guide
The button operation guide appears on the display during operation.
The buttons are indicated as shown below.

Quick Guide

Items marked with an asterisk (*) are also available as optional accessories.
For other optional accessories, refer to "Optional Accessories" (p.162).

Attaching the Strap

Attach the strap (O-ST62) supplied with the camera.
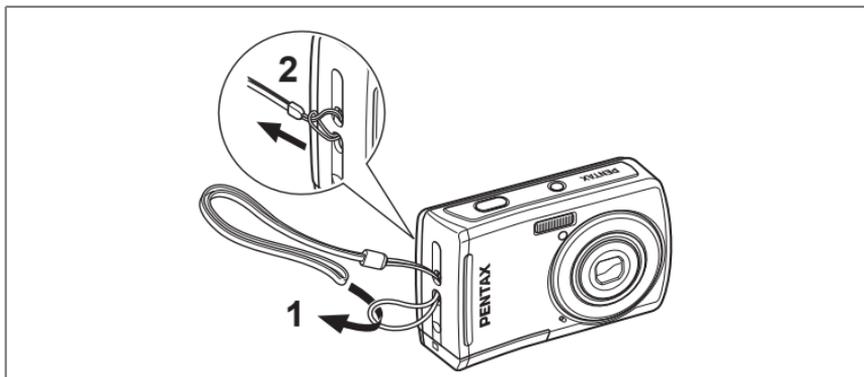

1 **Pass the narrow end of the strap through the strap lug.**
2 **Pass the other end of the strap through the loop and pull tight.**

Powering the Camera
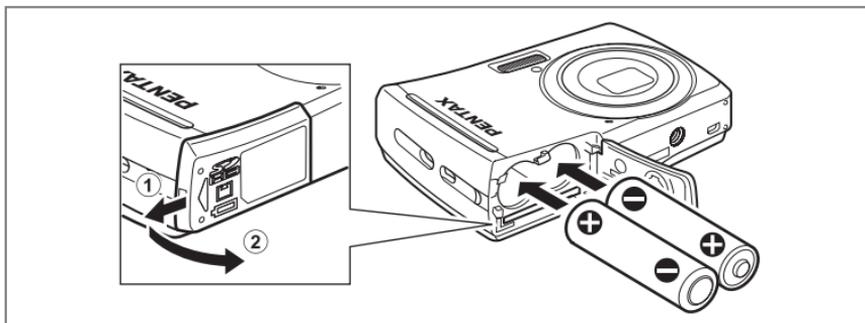

Installing the Batteries

Install the batteries into the camera. Use two AA alkaline, AA lithium, AA Ni-MH, or AA nickel manganese batteries.

1 Open the battery/card cover.
Slide the battery/card cover in the direction ①. The cover will automatically open in the direction ② when you release your fingers from it.

2 Insert the batteries, making sure the (+) and (–) terminals on the batteries match the (+) and (–) symbols inside the battery compartment.

3 Close the battery/card cover and slide it in the opposite direction of ①.

> **Caution**
> • AA alkaline, AA lithium and AA nickel manganese batteries are not rechargeable.
> • Do not open the battery/card cover or remove the batteries while the camera is turned on.
> • If you do not intend to use the camera for a long time, remove the batteries. If the batteries are left in the camera for a long time, they may leak.
> • If the batteries have been removed from the camera for a long time, when they are reinserted and the camera is turned on, the message [Battery depleted] may appear. This can also happen when using the camera for the first time; however this is not a malfunction. Turn the camera off, wait a minute and then turn the camera on again to reset the camera. The date and time may also be reset.
> • Insert the batteries correctly. If the batteries are incorrectly oriented, malfunction may result. If the ends of the batteries look dirty, wipe them before inserting into the camera.

memo
• Use the AC adapter kit K-AC62 (optional) if you intend to use the camera for a long time. (p.21)

• Image Storage Capacity and Playback Time
(at 23°C with the display on and fresh AA alkaline batteries inserted)

Image Storage Capacity[*1]	Playback Time[*2]
Approx. 200 pictures	Approx. 280 min.

*1: Recording capacity shows approximate number of shots recorded during CIPA-compliant testing (with the display on, flash used for 50% of the shots, and 23°C). Actual performance may vary according to operating conditions.
*2: According to the result of in-house testing.

memo
• In general, battery performance may temporarily deteriorate as the temperature decreases. Be sure to take spare batteries when using the camera in a cold region and keep the batteries warm by placing them in your pocket or inside your coat. Battery performance that has deteriorated due to cold temperature will return to normal performance when the batteries reach room temperature.
• Due to their characteristics, AA alkaline batteries and nickel manganese batteries may not allow the camera to make full use of its capabilities when used at cold temperatures. Use of AA lithium or AA Ni-MH batteries is recommended when the camera is used at cold temperatures.
• Be sure to take spare batteries with you when traveling abroad or to a cold region, or if you intend to take a lot of pictures.

• Battery Level Indicator
You can check the battery level by the 🔋 indicator on the display.

Screen Display	Battery Status
🔋 (green)	Adequate power remains.
🔋 (green)	Batteries are running low.
🔋 (yellow)	Batteries are running very low.
🔋 (red)	Batteries are exhausted.
[Battery depleted]	The camera will turn off after this message appears.

Caution
Due to the characteristics of AA nickel manganese batteries, the battery level may not be displayed correctly when using these batteries. 🔋 may be displayed for the battery level even if the batteries are running low. The camera may also turn off without warning even if 🔋 is displayed.

AC plug cord
DC coupler cable cover
DC coupler
DC coupler cable
DC input terminal
DC terminal
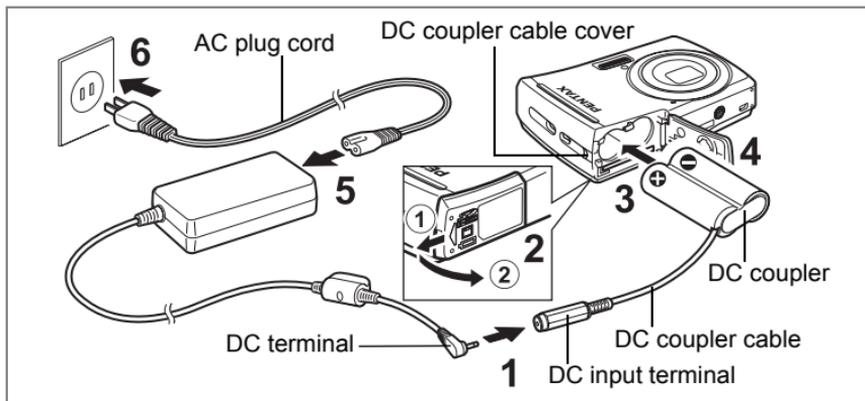

Using the AC Adapter with a Household Power Supply

Use of the AC adapter kit K-AC62 (optional) with a household power supply is recommended if you intend to use the camera for a long time or connect it to a computer.

1 **Connect the DC terminal of the AC adapter to the DC input terminal of the DC coupler.**

2 **Make sure that the camera is turned off and open the battery/card cover.**

   Slide the battery/card cover in the direction ①. The cover will automatically open in the direction ② when you release your fingers from it.

3 **Insert the DC coupler into the battery compartment, making sure the (+) and (–) terminals on the coupler match the (+) and (–) symbols inside the battery compartment.**

4 **Open the DC coupler cable cover, pass the DC coupler cable through the opening, and close the battery/card cover.**

   Slide the battery/card cover in the opposite direction of ①. Slide the battery/card cover all the way in to make sure it is securely closed.

5 **Connect the AC plug cord to the AC adapter.**

6 **Plug the AC plug cord into the power outlet.**

Caution
- Make sure that the camera is turned off before connecting or disconnecting the AC adapter.
- Make sure that the AC plug cord and the power cord connecting the AC adapter to the camera are inserted securely. The data may become lost if either cord becomes disconnected while data is being recorded.
- Use the AC adapter with due care to avoid fire or electric shock. Be sure to read "USING YOUR CAMERA SAFELY" (p.1) and "About the AC Adapter" (p.3) before using the AC adapter.
- Be sure to read the operation manual accompanying the AC adapter kit K-AC62 before using the adapter.

Installing the SD Memory Card

SD Memory Card

SD Memory Card socket
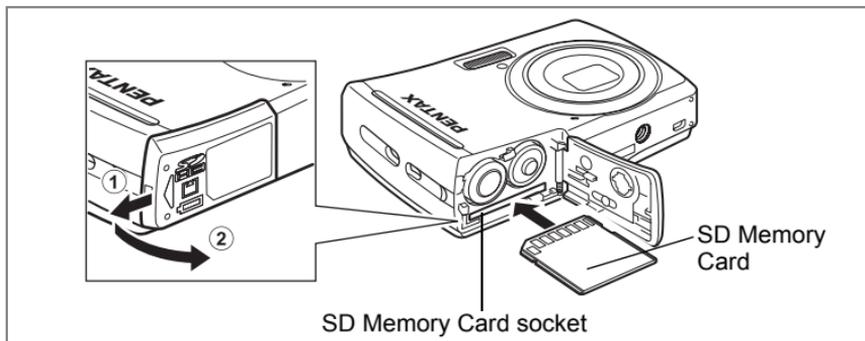

This camera uses either an SD Memory Card or an SDHC Memory Card.
(Both cards are referred to as SD Memory Cards hereafter.) Captured
images and sound files are saved on the SD Memory Card if a card is
inserted in the camera. They are saved in the built-in memory if a card is
not inserted.

Caution
- Be sure to use this camera to format an SD Memory Card that is
  unused or has been used on another camera. Refer to "Formatting
  an SD Memory Card" (p.140) for instructions on formatting.
- Make sure that the camera is turned off before inserting or
  removing the SD Memory Card.

memo
The still picture storage capacity varies depending on the capacity
of the SD Memory Card and the selected number of recorded pixels
and quality level. (p.167)

Backing Up Data
The camera may not be able to access data in the built-in memory in the case
of a malfunction. Use a computer or other device to back up important data in
another location.

1 Open the battery/card cover.

Slide the battery/card cover in the direction ①. The cover will automatically open in the direction ② when you release your fingers from it.

2 Insert the SD Memory Card into the SD Memory Card socket so that the label is facing toward the display.

Push the card in until it clicks. Images and sound may not be recorded correctly if the card is not inserted all the way.

3 Close the battery/card cover and slide it in the opposite direction of ①.

Removing the SD Memory Card

1 Open the battery/card cover.

2 Push the card into the SD Memory Card socket to eject it.

Pull the card out.

Precautions When Using an SD Memory Card
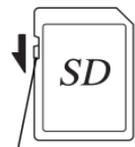

- The SD Memory Card is equipped with a write-protect switch. Setting the switch to LOCK protects the existing data by prohibiting recording of new data, deletion of existing data or formatting of the card. 😁 appears on the display when the card is write-protected.

SD

Write-protect switch

- Care should be taken when removing the SD Memory Card immediately after using the camera, as the card may be hot.
- Do not remove the SD Memory Card or turn the camera off while data is being saved to the card, images or sound files are being played back, or the camera is connected to a computer with the USB/AV cable, as this may cause the data to be lost or the card to be damaged.
- Do not bend the SD Memory Card or subject it to violent impact. Keep it away from water and store away from high temperature.
- Do not remove the SD Memory Card during formatting as this may damage the card and render it unusable.
- The data on the SD Memory Card may be deleted in the following circumstances. We do not accept any liability for data that is deleted
  (1) when the SD Memory Card is mishandled by the user.
  (2) when the SD Memory Card is exposed to static electricity or electrical interference.
  (3) when the card has not been used for a long time.
  (4) when the card is ejected or the batteries are removed while the data on the card is being recorded or accessed.
- If the SD Memory Card is not used for a long time, the data on the card may become unreadable. Be sure to regularly make a backup of important data on a computer.
- Avoid using or storing the card where it may be exposed to static electricity or electrical interference.
- Avoid using or storing the card in direct sunlight or where it may be exposed to rapid changes in temperature or to condensation.
- When using an SD Memory Card with a slow recording speed, recording may stop while you are taking movies even when there is adequate space in the memory, or shooting and playback may take a long time.
- For information on compatible SD Memory Cards, visit the PENTAX website.
- Be sure to format an SD Memory Card that is unused or has been used on another camera. Refer to "Formatting an SD Memory Card". (p.140)
- Please note that formatting the SD Memory Card will not necessarily delete the data so that it cannot be recovered using off-the-shelf data recovery software. There are off-the-shelf secure data deletion software programs available that will completely delete the data. If you are going to discard, give away or sell your SD Memory Card, you should ensure that the data on the card is completely deleted or the card itself is destroyed if it contains any personal or sensitive information. In any case, the data on your SD Memory Card should be managed at your own risk.

Picture Storage Capacity

Select [Recorded Pixels] and [Quality Level] for still images according to how the images will be used.

For [Recorded Pixels], [10M], [7M], [5M], [3M], [16:9] (2.1M, 1920x1080), [1024] and [640] are selectable. For [Quality Level], you can select from [★★★ (Best)], [★★ (Better)] and [★ (Good)]. Make your selection on the [✿ Rec. Mode] menu.

Storage capacity varies depending on the recorded pixels and the quality level you select. For details, see the table on the page indicated below.

Movie Storage Capacity

Select [Recorded Pixels] and [Frame Rate] for movies according to how the movies will be used.

For [Recorded Pixels], you can select either [640] or [320]. For [Frame Rate], you can select either [30fps] or [15fps]. Make your selection in [Movie] on the [✿ Rec. Mode] menu.

Storage capacity varies depending on the recorded pixels and the frame rate you select. For details, see the table on the page indicated below.

Turning the Camera On and Off

Power switch

▶ button
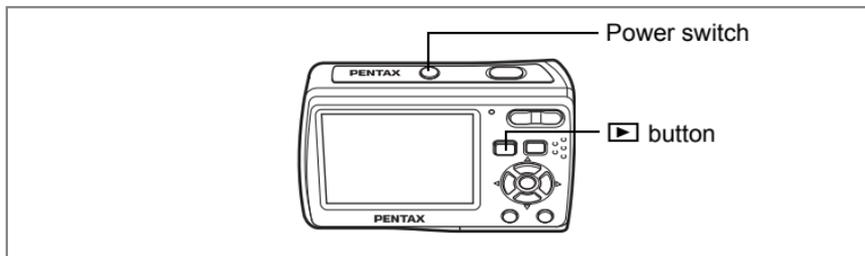

Turning the Camera On in Capture Mode

1 Press the power switch.

The display turns on and the lens extends. The camera turns on in the capture mode.

If [Language/言語] screen or [Date Adjust] screen appears when you turn on the camera, follow the procedures on p.29 to select the display language and/or set current date and time.

2 Press the power switch again.

The display turns off, the lens closes, and the camera turns off.

Checking the Memory Card

The memory card is checked automatically when the camera turns on. 🖾 appears on the display when there is no SD Memory Card inserted in the camera. In this case, images and sound files will be saved in the built-in memory. 🖾 appears instead of 🗋 when the write-protect switch on the SD Memory Card is in the locked position. Images and sound cannot be recorded when the write-protect switch is locked.

Memory status

38

05/05/2008
14:25

If the batteries have been removed from the camera for a long time, when they are reinserted and the camera is turned on, the message [Battery depleted] may appear. This can also happen when using the camera for the first time; however this is not a malfunction. Turn the camera off, wait a minute and then turn the camera on again to reset the camera. The date and time and other settings may also be reset. Follow the procedure on p.31 to set these settings again.

Turning the Camera On in Playback Mode

You can start the Optio E60 in the playback mode with the lens retracted. This is useful when you want to play back saved images and sound straightaway without taking pictures.

1 Press the power switch while holding down the ▶ button.

The display turns on with the lens retracted. The camera turns on in the playback mode.

2 Press the ▶ button again or press the shutter release button halfway.

The camera switches to the capture mode.

Playing Back Still Pictures ☞p.36

Initial Settings

Set the language, time and date before you start taking pictures for the first time.

Four-way controller

OK button

MENU button
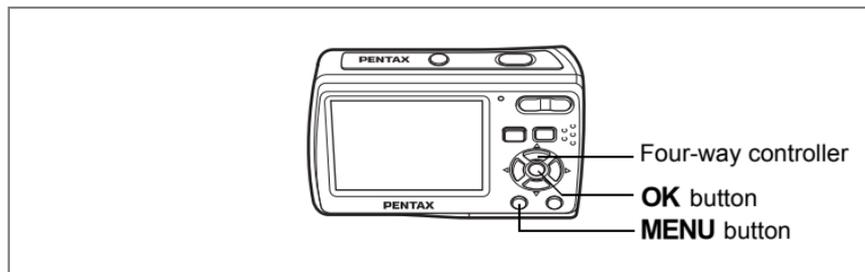

The [Language/言語] screen appears when the camera is turned on for the first time. Follow the procedures in "Selecting the Display Language" below to set the language, and in "Setting the Date and Time" (p.31) to set the current date and time.

Language, Date, and Time can be changed later. Refer to the pages below for instructions.
• To change the language, follow the steps in "Changing the Display Language" (p.147).
• To change the date and time, follow the steps in "Changing the Date and Time" (p.143).

Selecting the Display Language

1 **Use the four-way controller (▲ ▼ ◄ ►) to choose the desired display language.**

Language/言語	English ▶
⌂Hometown New York	DST OFF
MENU Cancel	OK OK
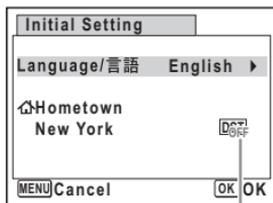

Daylight saving time

If you accidentally select another language and go to the next procedure, perform the following operation to set the language back.

● **When Another Language Has Been Inadvertently Selected**

1 Press the four-way controller (▶).

2 Use the four-way controller (▲ ▼ ◀ ▶) to select the language and press the OK button.
The [Initial Setting] screen appears in the selected language.

● **When the Screen After Step 2 Appears in Another Language**

1 Press the OK button.

2 Press the MENU button.

3 Press the four-way controller (▶).

4 Use the four-way controller (▼ ▲) to select [Language/ 言語].

5 Press the four-way controller (▶).
The [Language/言語] screen appears.

6 Use the four-way controller (▲ ▼ ◀ ▶) to select the language.

7 Press the OK button.
The [✕ Setting] menu appears in the selected language.

The language is now switched to your desired language. To reset [Hometown], [Date] or [Time], refer to the pages below for instructions.
• To change [Hometown], follow the steps in "Setting the World Time" (p.145).
• To change [Date] and/or [Time], follow the steps in "Changing the Date and Time" (p.143).

Setting Hometown and DST

3 **Press the four-way controller (▼).**
The frame moves to [Hometown].

4 **Press the four-way controller (▶).**
The [Hometown] screen appears.

5 **Use the four-way controller (◀ ▶) to choose the city.**

Date         ▶01/01/2008
Time          0:00

MENU Cancel          OK OK
```
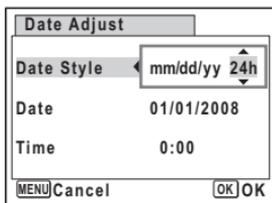

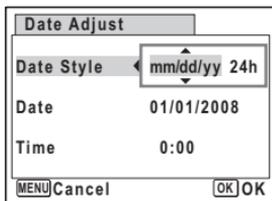

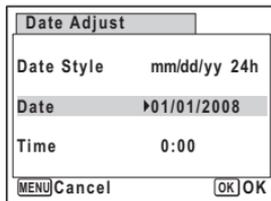

7 Press the four-way controller (▶).

The frame moves to the month.

8 Use the four-way controller (▲ ▼) to change the month.

Change the day and year in the same manner.
Next, change the time.
If you selected [12h] in Step 4, the setting

```
Date Adjust

Date Style    mm/dd/yy 24h
Date        ◀ 01/01/2008 ▶
Time          0:00

MENU Cancel          OK OK
```

switches between am and pm corresponding to the time.
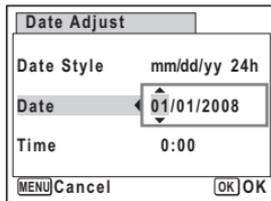

9 Press the OK button.

The setting is set and the camera returns to capture status.

> [Language/言語], [Date], [Time], [Hometown] and [DST] can be changed.
> Refer to the pages below for instructions.
> • To change [Language/言語], follow the steps in "Changing the Display Language" (p.147).
> • To change [Date] and/or [Time], follow the steps in "Changing the Date and Time" (p.143).
> • To change [Hometown] or turn [DST] on and off, follow the steps in "Setting the World Time" (p.145).

When the [Initial Setting] or [Date Adjust] screen is displayed, you can cancel the setting operation and switch to the capture mode by pressing the **MENU** button. In this case, the [Initial Setting] screen will appear next time you turn the camera on.

If you press the **OK** button in Step 9, the camera clock is reset to 00 seconds. To set the exact time, press the **OK** button when the time signal (on the TV, radio, etc.) reaches 00 seconds.

The video output format (NTSC/PAL) is set to the format of the city selected in [Hometown] on the [Initial Setting] screen. Refer to "List of World Time Cities" (p.156) for the video output format of each city set as the Initial Setting, and "Changing the Video Output Format" (p.151) for changing the setting of the video output format.

Taking Still Pictures

Power switch
Shutter release button
Zoom button
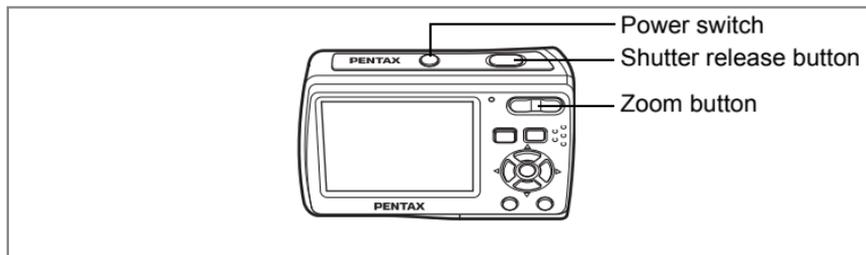

The standard procedure for taking still pictures is described below. The flash discharges automatically depending on the light conditions.

1 Press the power switch.
The camera turns on and is ready to take still pictures. In this manual, this is called the capture mode.

2 Compose the picture on the display.
The camera will automatically focus on the area within the focus frame. You can change the captured area by pressing the Zoom button.
- ♦ : enlarges the subject
- ♦♦♦ : widens the area captured by the camera

3 Press the shutter release button halfway.
The color of the focus frame indicates whether the camera focuses clearly on the subject or not.
Green : The subject is in focus.
White : The subject is out of focus.
Hold the shutter release button and wait until the focus frame turns green.

14:25

Focus frame

memo When the [Focusing Area] is set to ◄◄◄ (Automatic Tracking AF) on the [✿ Rec. Mode] menu (p.78), the focus frame turns green if the subject is in focus, and the focus frame remains white even if the subject is out of focus.

2

4 Press the shutter release button fully.

The picture is taken.
The image appears on the display for 2 seconds (Instant Review) and is saved to the SD Memory Card or the built-in memory. (p.23)

memo
- When you turn on the camera, you can take pictures in 🔲 (Auto Picture), the default shooting mode. (p.56)
- Press the Green button to switch to 🔲 (Green) and let the camera set all the shooting functions automatically. (p.54)

Pressing the Shutter Release Button

Press the shutter release button smoothly in two steps. This allows for exact focusing as well as preventing camera shake.

Basic method for shutter release

1 Press the shutter release button halfway.

Lightly press the shutter release button until you feel the click on your finger.

2 Confirm the focus frame on the display turns green.

Hold the shutter release button and wait until the focus frame turns green. The subject is in focus.

The subject is in focus.

3 Press the shutter release button fully.

Press it down smoothly until the shutter is released.
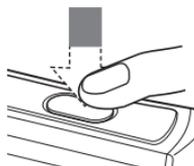

The picture is taken.
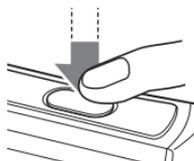

memo
You can also press the shutter release button all the way down (single step) to take pictures. This allows you to release the shutter at the right moment. The pictures are taken as deep-focus (pan focus) shots.

[Poor focusing conditions]

The camera may not be able to focus under the following conditions. In these cases, lock the focus on an object the same distance away as the subject (by pressing and holding the shutter release button halfway), then aim the camera at your subject and press the shutter release button fully.

- Objects that lack contrast such as a blue sky or white wall
- Dark places or objects, or conditions that prevent light being reflected back
- Horizontal lines or intricate patterns
- Fast moving objects
- When there is an object in the foreground and an object in the background in the same picture
- Strongly reflected light or strong backlighting (bright background)

Playing Back Still Pictures

🎤	Voice Recording	For recording sound. Do not cover the microphone with your hands.	p.137

memo Depending on the shooting mode, some functions may not be available. For details, see "Functions Available for Each Shooting Mode" (p.161).

3 Common Operations
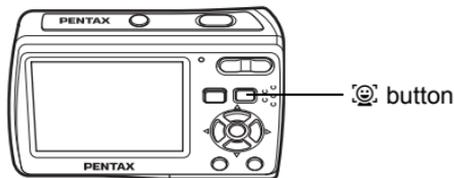

Setting the Face Recognition function

With the Optio E60, the Face Recognition function is available with all shooting modes except ● (Voice Recording).

In the Face Recognition function, the camera automatically recognizes the subject's face, focuses (Face Recognition AF), and compensates the exposure (Face Recognition AE) when capturing images. Even when there are multiple faces, the camera will recognize the main subject's face and make suitable adjustments automatically. The subject is given a brighter and healthier look.

Switching the Face Recognition Function

By default, the Face Recognition function is set to Face Priority On. The Face Recognition function is switched as follows each time the 😊 button is pressed: Face Priority Off → Face Priority On → ⋯

Face Priority On   Face Priority Off
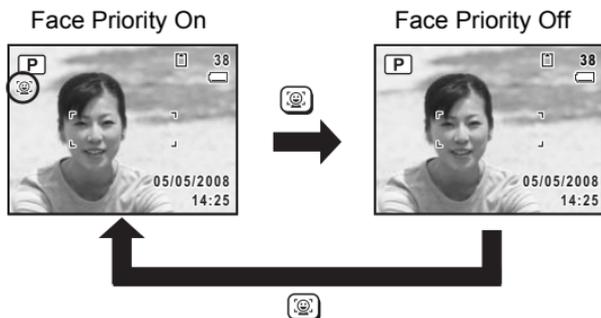

An icon indicating Face Priority On appears on the display. (The icon does not appear when Face Priority Off is selected.)

3 Common Operations

52

Playback Mode Palette
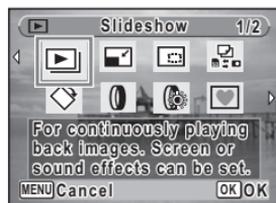

Item		Description	Page
▶️	Slideshow	For continuously playing back images. Screen or sound effects can be set.	p.103
🖼️	Resize	Changes Recorded Pixels and Quality Level to make the file size smaller.	p.116
▦	Cropping	For cropping images to the size you like. Saved as a new image.	p.118
⬚	Image/Sound Copy	For copying images and sounds between the built-in memory and SD memory card.	p.119
◇	Image Rotation	Rotates captured images. Useful when viewing vertical images on a TV.	p.37
◑	Digital Filter	For modifying images with a Color filter.	p.121
◔	Brightness Filter	For modifying the brightness of the images.	p.122

Taking Pictures of People
(Half-length Portrait/Portrait/Kids Mode)

▣ (Half-length Portrait), ⓠ (Portrait) and ⅋ (Kids) are suitable for taking pictures of people. Face Recognition (p.51) is automatically activated for these shooting modes, making it easier to emphasize the subject's face when taking pictures.

1 **Press the four-way controller (▼) in the capture mode.**

The Capture Mode Palette appears.

2 **Use the four-way controller (▲ ▼ ◄ ►) to select ▣, ⓠ or ⅋.**

The following procedures are for selecting ⓠ.

3 **Press the OK button.**

The shooting mode is selected and the camera returns to capture status.
When the camera recognizes the subject's face, a yellow focus frame with the brackets appears on it within the display.
If there are more than two subjects, the camera first recognizes the main subject's face and a yellow focus frame with the brackets appears on it, and a white focus frame appears on the faces of the other subjects.
The size and location of the focus frame change while the camera continues to adjust the focus on the moving subject's face.

4   Press the shutter release button halfway.

The focus frame on the display turns green if the subject is in focus.
When there are multiple faces, the focus frame with the brackets
displayed in Step 3 turns green if the main subject's face is in focus.

5   Press the shutter release button fully.

The picture is taken.

> ⚠️ Caution
>
> The Face Recognition may not work if the subject is wearing
> sunglasses, has part of the face covered, or is not looking toward the
> camera.

> memo
>
> • When the camera does not recognize the subject's face, the
>   camera will focus on the subject using the Focusing Area mode
>   selected in [Focusing Area] on the [✿ Rec. Mode] menu.
> • When there are multiple faces, the camera will first recognize the
>   subject's face that looks closer to the center of the display and
>   larger compared with the other ones as the main subject's face.
> • In ▣, ◉ and ⚲, Face Priority On is always selected.
> • In ▣, recorded pixels is fixed at 3ᴍ.
> • In ▣, intelligent zoom automatically functions whenever needed
>   after recognizing the subject's face and adjusts the size of the
>   subject to proper framing.
> • In ▣, the size of the subject's face that is recognized as the main
>   subject is adjusted.

OK button
Available in □□□

Taking Panoramic Pictures (Digital Panorama Mode)

In □□□ (Digital Panorama), you can stitch 2 or 3 frames taken in sequence into a panoramic scene.

1 Press the four-way controller (▼) in the capture mode.

The Capture Mode Palette appears.

2 Use the four-way controller (▲ ▼ ◀ ▶) to select □□□, and press the OK button.

The screen to specify the direction you want to pan appears.

3 Use the four-way controller (◀ ▶) to select the direction to stitch.

(▶): stitch the frames to the right
(◀): stitch the frames to the left
The camera is ready for taking the first frame.

The following procedures will explain steps for those when (▶) is selected.

4 Take the first frame.

Press the shutter release button fully to take the first frame, and after the taken image appears on the display (Instant Review), the camera is ready for taking the second frame. In the second frame shooting screen, an "overlay" from the first frame appears at the left 1/4 of the display.

memo   The □□□ on the upper left part of the screen indicates the number of the next frame for shooting.

64

5 Pan the camera to the right and take the second frame.

Be sure to make the "overlay" cover the same position in the second frame when you compose.

Pan the camera to the right and press the shutter release button fully to take the

second frame. After the Instant Review of the second frame, the camera is ready for taking the third frame.

Repeat Steps 4 and 5 to take the third frame. After the third frame is taken, the message [Data being processed] will blink. After the Instant Review of the full panoramic picture, the camera will return to the screen to take the first frame again.

To stitch only the first frame and the second frame into a panoramic picture, go to Step 6 and select [Save] in Step 7.
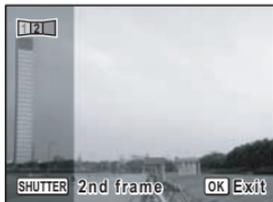

To quit taking panoramic pictures

6 Press the OK button.

A confirmation screen for saving the taken image(s) appears.

7 Use the four-way controller (▲▼) to select [Save], [Discard], or [Cancel] and press the OK button.

[Save] : When you select [Save] after
the first frame is taken, the frame taken is saved, and the camera will return to the screen to take the first frame. When you select [Save] after the second frame is taken, the message [Data being processed] blinks, and after the Instant Review of the 2 frames stitched together, the camera will return to the screen to take the first frame.

[Discard] : All the frames taken will be discarded, and the camera will return to the screen to take the first frame.

[Cancel] : The camera quits the operation and returns to the most recent shooting screen.

memo

- When Face Priority On is selected (p.51), the Face Recognition function works only when taking the first frame.
- Focus, exposure, drive mode and zoom position used for all images in the panorama sequence are those set for the first frame.

Selecting the Recorded Pixels

You can choose from seven recorded pixels settings for still pictures. The larger the recorded pixels, the clearer the details will appear when you print your picture. As the quality of the printed picture also depends on the image quality, exposure control, resolution of the printer and other factors, you do not need to select more than the required number of recorded pixels. $\boxed{3\text{M}}$ (2048 ×1536) is adequate for making postcard-size prints. The more pixels there are, the larger the picture and the bigger the file size. The data volume also varies depending on the quality level setting (p.71).

Recorded Pixels

Recorded Pixels		Use
$\boxed{10\text{M}}$ 3648×2736	↑ Clearer	For printing high quality photos or A4-size pictures, or editing images on a computer.
$\boxed{7\text{M}}$ 3072×2304		
$\boxed{5\text{M}}$ 2592×1944		
$\boxed{3\text{M}}$ 2048×1536		For making postcard-size prints.
$\boxed{16:9}$ 1920×1080		For expressing broadness of the picture naturally with the same aspect ratio as a Hi-definition TV.
$\boxed{1024}$ 1024×768		
$\boxed{640}$ 640×480		For posting on a website or attaching to e-mail.

Available in ☐ 🔤 ℗ 🎆 🏙 🖼 🎬 ☎ 🎇 🌃 🍃 🏃 ((🕐)) 🔆 🔍 🍴 ☐☐ 💟

Using the Zoom

You can zoom in and out to change the captured area.

1 Press the Zoom button in the capture mode.

♦ Tele : enlarges the subject

♦♦♦ Wide : widens the area captured by the camera

As you continue to press the ♦ on the Zoom button, the camera automatically switches from optical zoom to intelligent zoom.

Once the ♦ on the Zoom button is released and pressed again, the camera switches to Digital Zoom.

Zoom bar

Zoom ratio

The zoom bar is displayed as follow.

Zoom in with high image quality.

Zoom in with some degree of image deterioration.

Optical zoom range[*1]   Intelligent Zoom range[*2]   Digital Zoom range

*1 You can zoom in to a maximum of 3x optically.
*2 The Intelligent Zoom range differs depending on the recorded pixels. See the following table.

memo
　The Intelligent Zoom range and the Digital Zoom range is displayed as an icon above the zoom bar.
　　: Intelligent Zoom range
　　: Digital Zoom range

Recorded pixels and the maximum zoom ratio

Recorded pixels	Intelligent Zoom	Digital Zoom
10M	Not Available (3× optical zoom available)	Equivalent to approx. 17.1×
7M	Approx. 3.6×	
5M	Approx. 4.2×	
3M	Approx. 5.3×	
16:9	Approx. 5.3×	
2M	Approx. 6.8×	
1024	Approx. 10.7×	
640	Approx. 17.1× (Same as 17.1× Digital Zoom)	

memo
　• You are recommended to use a tripod to prevent camera shake when taking pictures at a high magnification rate.
　• Pictures taken in the digital zoom range appear grainier than pictures taken in the optical zoom range.
　• Intelligent Zoom is not available under the following conditions.
　　- When the recorded pixels is set to 10M. (3x optical zoom available)
　　- In 🎥 (Movie)
　　- In 《⚇》 (Digital SR)
　　- When the sensitivity is set to 3200 or 6400.
　• The image enlarged using Intelligent Zoom may appear rough on the display. This does not affect the quality of recorded image.
　• In 🎥, only Digital Zoom is available.
　• 2M is available exclusively in 🎞️ (Digital Panorama).
　• In ▣ (Half-length Portrait), when the camera recognizes the subject's face, it automatically zooms in within the Intelligent Zoom range.

Setting the Digital Zoom

Selecting the Focus Mode

Select a focus mode according to the distance between the camera and the subject.

Focus Mode

AF	Standard	Select this mode when your subject is more than approx. 50 cm (1.56 ft) away from the camera. When you press the shutter release button halfway, the camera automatically focuses on the subject within the focus frame.
🌷	Macro	Select this mode when your subject is located approx. 10 cm to 60 cm (0.31 ft to 1.87 ft) away from the camera. When you press the shutter release button halfway, the camera automatically focuses on the subject within the focus frame.
▲	Infinity	This mode is used for taking distant objects. The flash is set to ⑤ (Flash Off).
PF	Pan Focus	The pictures are taken as deep-focus (pan focus) shots. It is useful when you ask someone to take pictures for you, or take pictures from the window of a moving car or a train.

1 Press the four-way controller (▶) in the capture mode.

The focus mode changes each time the button is pressed. You can also change the setting using the four-way controller (▲ ▼).

2 Press the OK button.

The Focus Mode setting is saved and the camera returns to capture status.

> When you select **AF** or **🌷** in 🎬 (Movie), adjust the focus before recording. Once the recording starts, you cannot adjust the focus.

4

Taking Pictures

76

memo
- When the focus mode is set to **AF** (Standard), the Auto-Macro function is available. When the subject is closer than approx. 50 cm (1.56 ft) from the camera, the camera automatically focuses on the subject within the focus range of ❀ (Macro).
- In ▢ (Green), you can only select **AF**, ❀ or **PF**.

Saving the Focus Mode (p.90)

Focus lock

When you have difficulty in auto focusing on a subject, try the procedures below.

You may have difficulty in auto focusing on such subjects as:
- Subject contrast is very weak. (blue sky, solid white (Macro) wall, etc.)
- Dark places, black object, or subject that does not reflect light.
- Subject with strong reflected light, or strong backlight.
- Object with a fine pattern
- Rapidly moving objects
- When a distant object and a close object are both in the focus frame.

1 Find alternate subject that is in the same distance from the camera as the desired subject.

2 Focus on the alternate subject.
Locate it in the focus frame on the display.

3 Press the shutter release button halfway.
The focus frame turns green when the alternate subject is in focus.

4 While holding the shutter release button halfway, move the camera to obtain the desired composition.
The focus is locked at the point you set in Step 3 even if you recompose. (Focus lock)

5 Press the shutter release button fully.

Selecting the Auto Focus Mode (Focusing Area)

You can change the auto focus area (Focusing Area).

Focusing Area

⌐ ⌐	Multiple	The camera focuses on the standard auto focus area.
⌐⌐	Spot	The camera focuses on the smaller auto focus area.

memo

Preventing the "red-eye"

The "red-eye" in flash pictures occurs when the flashlight is reflected in the subject's eyes. To prevent the phenomenon, try the followings.

- Illuminate the subject.
- Shoot at closer distance in wide angle.
- Set the flash mode to ⁿ⁄ₐ (Auto + Red-eye) or ⁿ⁄₄ (Flash On + Red-eye).

You can also compensate the red-eye pictures using the ⁿ⁄ (Red-eye Compensation) function of the camera. (p.128)

Playing Back Images on a TV
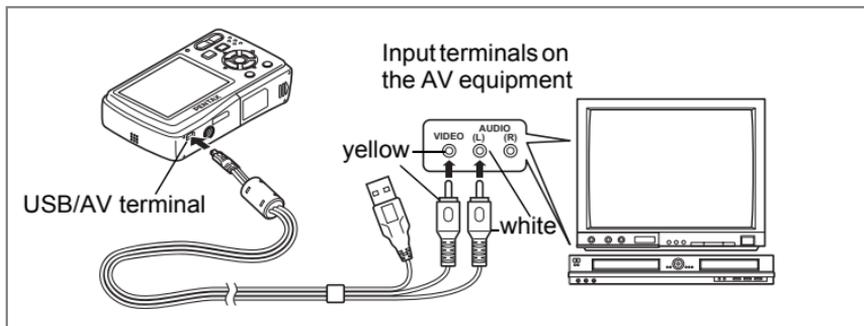

By connecting your camera to a TV or other AV equipment using the supplied USB/AV cable, you can display images on the monitor for review or picture taking.

1 Connect the supplied USB/AV cable to the USB/AV terminal on the camera.

2 Connect the other ends of the USB/AV cable (yellow: video, white: audio) to the video input terminal and audio input terminal on the AV equipment.
When using stereo sound equipment, insert the sound terminal into the L (white) terminal.

3 Turn the AV equipment on.
When the equipment that the camera is connected to and the equipment that plays back images are different, turn both equipment on.
When viewing images on AV equipment with multiple video input terminals (such as a TV), refer to the operation manual of the equipment and select the video input terminal to which the camera is connected.

4 Turn the camera on.

> **Caution**
> • Depending on the country or region, images and sound files may fail to be played back if the video output format is set different from the one in use there. If this happens, change the video output format setting. (p.151)
> • The display of the camera turns off while it is connected to AV equipment. You cannot adjust sound volume using the Zoom button on the camera.

> **memo**
> You are recommended to use the AC adapter kit K-AC62 (optional) if you intend to use the camera for a long time. (p.21)

125

About the Optional Frames

Optional frames are stored in the built-in memory of the Optio E60, within the recording area of images, movies and sounds.

These optional frames can be deleted from the built-in memory by a file operation on the computer (e.g. deletion of files). If an optional frame has been deleted, it can be copied by using the supplied CD-ROM (S-SW81).

How to copy:
1. Remove the SD Memory Card from the camera. (If the SD Memory Card remains in the camera, the frames will be copied to the SD Memory Card and not to the built-in memory)
2. Refer to the PC Connection Manual and connect the camera to a computer with the USB/AV cable (I-UAV77).
3. Select [Cancel] if the device detection screen is automatically displayed after the camera is connected to the computer.
4. Insert the supplied CD-ROM (S-SW81) into the CD-ROM drive.
5. Select [EXIT] if the installation screen is displayed.
6. If there is no FRAME folder in the root directory of the camera (removable disk), create it by using your computer.
7. Select the desired frame file to copy from the FRAME folder in the root directory of the CD-ROM (S-SW81), and perform file operation on the computer to copy it to the FRAME folder of the camera (removable disk). (For details on the file operation on the computer, see the operating manual of the computer you use.)
8. Refer to the PC Connection Manual and disconnect the USB/AV cable and then the camera from the computer.

* The supplied CD-ROM (S-SW81) includes the 3 default frames, which are also stored on the camera within the recording area that cannot be edited. If you try to do copy the 3 default frames from the CD-ROM to the camera, the same frames will be duplicated.
* If you want to copy the frames to the SD Memory Card, keep the SD Memory Card inserted in the camera in Step 1.
* The frames can be stored in both the built-in memory and the SD Memory Card, but the processing may take time as the number of files increase.
* You can also only copy some frame files as needed.

Using a New Frame

Frames downloaded from PENTAX website or other source can be used when taking pictures. To display available frames stored in the built-in memory or the SD Memory Card, in Step 3, select ▣ (Frame Composite) and press the **OK** button.

> **Caution**
> - The three frames stored by default in the built-in memory cannot be deleted.
> - Up to 979 downloaded frames can be displayed. Including the frames already stored in the built-in memory, you can choose from up to 999 frames.
> - Extract the downloaded frame and copy it to the FRAME folder in the SD Memory Card.
> - The FRAME folder is created when the SD Memory Card is formatted with this camera.

Setting the Printing Service (DPOF)

DPOF (Digital Print Order Format) is the format for storing print order data on still pictures captured with a digital camera. Once the print order data has been stored, the pictures can be printed according to the DPOF settings using a DPOF-compatible printer or photo processing lab. You cannot store print order data for movies or sound-only files.

Printing Using PictBridge

By connecting the camera to a printer that supports PictBridge using the supplied USB/AV cable (I-UAV77), you can print images directly from the camera without using a computer. Connect the camera to the printer and select the images you want to print and the number of copies on the camera.

<div style="border:1px solid;padding:4px">

Caution

- You are recommended to use the AC adapter kit K-AC62 (optional) when the camera is connected to the printer. The printer may not work properly or the image data may be lost if the battery runs out of power while the camera is connected to the printer.
- Do not disconnect the USB/AV cable during data transfer.
- Depending on the type of printer, not all the settings made on the camera (such as print settings and DPOF settings) may be valid.
- A printing error may occur if the selected number of copies exceeds 500.
- Printing the index of the images (printing multiple images on a single sheet) cannot be performed directly from the camera. Make the settings on a printer supporting index printing function or use a computer.

</div>

Connecting the Camera to the Printer

1 Select [PictBridge] for the [USB Connection] mode on the [⚙ Setting] menu.

Refer to "Changing the USB Connection Mode" (p.150).

2 Turn off the camera.

3 Connect the camera to the printer using the supplied USB/AV cable.

4 Turn the printer on.

5 When the printer is ready to print, turn the camera on.

The printing mode selection screen appears.

Select printing mode

- Single Image
- **All Images**

1 Press the $\boxed{\blacktriangleright}$ button.

**2 Use the four-way controller ($\blacktriangleleft\blacktriangleright$) to choose a sound file to play back.**

3 Press the four-way controller ($\blacktriangle$).
The sound file is played back.
1 Total file recording time
2 Playback time
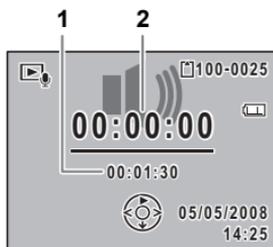

The following operations can be performed during playback.

Four-way controller ($\blacktriangle$)	Pauses playback
Zoom button ($\spadesuit$)	Increases the volume
Zoom button ($\clubsuit\clubsuit\clubsuit$)	Reduces the volume

If there are no recorded indexes:

Four-way controller ($\blacktriangleleft$)	Reverses playback
Four-way controller ($\blacktriangleright$)	Fast forwards playback

If there are recorded indexes:

Four-way controller ($\blacktriangleleft$)	Plays back starting from the previous index
Four-way controller ($\blacktriangleright$)	Plays back starting from the next index

The following operations can be performed while playback is paused.

Four-way controller ($\blacktriangle$)	Resumes playback
Four-way controller ($\blacktriangleleft$)	Rewinds approx. 5 seconds
Four-way controller ($\blacktriangleright$)	Advances approx. 5 seconds

4 Press the four-way controller ($\blacktriangledown$).
Playback stops.

Resetting to Default Settings (Reset)

You can reset the camera settings to their defaults. Refer to "Default Settings" (p.157) for the reset settings.

1 Use the four-way controller (▲▼) to select [Reset] on the [✎ Setting] menu.

2 Press the four-way controller (▶).
The [Reset] screen appears.

3 Use the four-way controller (▲▼) to select [Reset].

4 Press the OK button.
The settings return to the defaults.

Default Settings

The table below lists the factory default settings.

The meaning of the indications for menu items with a default setting is explained below.

Last Memory Setting

- Yes : The current setting (last memory) is saved when the camera is turned off.
- No : The setting returns to the default setting when the camera is turned off.
- * : The setting depends on the [Memory] setting (p.90).
- — : NA

Reset Setting

- Yes : The setting returns to the default setting with the Reset function (p.155).
- No : The setting is saved even after reset.

*1 The self-timer mode you have selected in a shooting mode other than ☐ (Green) can be used.
*2 Uses the settings in [Movie].
*3 "Automatic Tracking AF" is not available.
*4 Not available during recording
*5 Fixed at an automatic high sensitivity setting
*6 In ▭ (Digital Panorama), "Continuous Shooting" and "16-frame shooting" are not available.
*7 In ▭, fixed at 2ᴍ. Cannot be changed on [📷 Rec. Mode] menu.
*8 Face Recognition AF&AE is activated when the subject's face is recognized. If the flash is discharged, the flash mode will perform Flash On + Red-eye.
*9 In 👤 (Half-length Portrait), "16-frame shooting" is not available.
*10 In 👤, fixed at 3ᴍ. Cannot be changed on [📷 Rec. Mode] menu.

Optional Accessories

A number of dedicated accessories are available for this camera.

AC adapter kit K-AC62
This kit includes the DC coupler D-DC51, the AC adapter D-AC62 and the AC plug cord.

USB/AV cable I-UAV77 (*)

Strap

O-ST62 (*)	
O-ST24	Genuine leather strap
O-ST8	Silver chain strap
O-ST30, O-ST81	Plastic coated strap

Camera case
O-CC72
O-CC81

Products marked with an asterisk (*) are the same as those supplied with the camera.

Messages

Messages such as the following may appear on the display during camera operation.

Battery depleted	The batteries are exhausted. Replace with new batteries. If using rechargeable batteries, charge the batteries. (p.19)
Built-in memory full	The built-in memory/SD Memory Card is full and no more images can be saved. Insert a new SD Memory Card or delete unwanted images. (p.23, p.108)
Memory card full	Change the quality level or recorded pixels of recorded images and try again. (p.116)
Memory card error	Shooting and playback are impossible due to a problem with the SD Memory Card. You may be able to display or copy the images on the card using a computer.
Card not formatted	The SD Memory Card you have inserted is unformatted or has been formatted on a computer or other device and is not compatible with this camera. Format the SD Memory Card in the camera. (p.140)
Card locked	The SD Memory Card is write-protected. (p.25)
Compression error	This message appears when compression of images has failed. Change the quality level/size and record or save again.
No image/sound	There are no image/sound files on the SD Memory Card.
Deleting	This message appears when the camera is deleting an image or sound file.
Camera cannot play this image and sound	You are trying to play back an image or sound in a format not supported by this camera. You may be able to play it back on another brand of camera or your computer.
Image folder could not be created	The largest file number (9999) has been assigned to an image in the largest folder number (999) or the number of image, movie, and sound files recorded on the SD Memory Card has reached 10000 and no more files can be saved. Insert a new SD Memory Card or format the card. (p.140)
Protected	The image or sound file you are trying to delete is protected.
Data being recorded	This message appears when you try to switch to the playback mode while an image is still being recorded, or when the protect setting or DPOF setting is being changed. It disappears after the image is recorded or the setting is changed.

Data being processed	This message appears when the camera takes more than five seconds to display an image due to image processing, or when the SD Memory Card or built-in memory is being formatted.
No image to be processed	This message appears when no image/sound file is present.
This image/sound cannot be processed	This message appears when you attempt to edit a file that cannot be processed.
No card in the camera	This message appears when you select [Image/Sound Copy] with no SD Memory Card inserted.
The card memory is not enough to copy images/ sounds	This message appears when there is not enough memory on the SD Memory Card or in built-in memory to copy image/sound to. Insert a new SD Memory Card or delete unwanted images. (p.23, p.108)
The built-in memory is not enough to copy images/sounds	
Cannot process correctly	This message appears when Red-eye Compensation cannot be performed correctly.

Messages such as the following may appear on the display when using the PictBridge function.

Low paper level in the printer	The paper level of the printer is low.
No paper in the printer	There is no paper in the printer.
Low ink level in the printer	The ink level of the printer is low.
No ink in the printer	There is no ink in the printer.
Printer error	An error message has been sent from the printer.
Data error	A data error message has been sent from the printer.
Paper stuck in the printer	The paper is stuck in the printer.

Troubleshooting

Problem	Cause	Remedy
The camera will not turn on	The batteries are not installed	Check if the batteries are installed. If not, install batteries.
	The batteries are installed incorrectly	Check orientation of the batteries. Reinsert the batteries according to the $\oplus\ominus$ symbols in the battery compartment. (p.19)
	The batteries are exhausted	Insert new batteries or use the AC adapter.
No image appears on the display	The camera is connected to a computer	The display is off when the camera is connected to a computer.
	The camera is connected to the AV equipment	The display is off when the camera is connected to an AV equipment.
The display is hard to see	The brightness level of the display is set too dark	Adjust the brightness level in [Brightness Level] in the [✎ Setting] menu. (p.152)
	Power Saving function is on	When the Power Saving function is on, the display automatically darkens after a certain amount of time. Press a button to return to the normal brightness level. Select [Off] in [Power Saving] in the [✎ Setting] menu to turn the Power Saving function off. (p.153)
The shutter will not release	The flash is charging	Pictures cannot be taken while the flash is charging. Wait until charging is finished.
	There is no available space on the SD Memory Card or in the built-in memory	Insert an SD Memory Card with available space or delete unwanted images. (p.23, p.108)
	Recording	Wait until recording is finished.
The picture is dark when using the flash	The subject is too far away in a dark environment, such as a night scene	The picture becomes dark if the subject is too far away. Take picture within the specified flash range.

Problem	Cause	Remedy
The subject is not in focus	The subject is difficult to focus on with auto focus	The camera may have difficulty in focusing on such subjects as: low-contrast subjects (a white wall, a blue sky, etc.), dark subjects, finely-patterned objects, rapidly-moving objects. It is also difficult to get proper focus when shooting through a window or a net. Try shooting using the focus lock (p.77).
	The subject is not in the focusing area	Locate the desired subject in the focus frame (focusing area) in the center of the display. If it is difficult to do so, first lock the focus on the desired subject (focus lock), and then move the camera to recompose. (p.77)
	The subject is too close	Set the focus mode to ♥. (p.76)
	The focus mode is set to ♥	Normal pictures will be out of focus if taken with the focus mode set to ♥.
The flash does not discharge	The flash mode is set to ⊛ (Flash Off)	Set to Auto or ⚡ (Flash On). (p.79)
	The drive mode is set to ◫ or ◫ The focus mode is set to ▲ The shooting mode is set to 🎬	The flash does not discharge in these modes.
The USB connection with a personal computer does not function properly	The USB connection setting of the camera is set to [PictBridge]	Set the USB connection setting to [PC]. (p.150)
The USB connection with a printer does not function properly	The USB connection setting of the camera is set to [PC]	Set the USB connection setting to [PictBridge]. (p.132)

Very occasionally, static electricity may cause camera malfunction. In this case, remove the battery and install it again. If the camera is then working properly, normal condition is restored and you can continue using the camera.

Main Specifications

Type	Fully automatic compact digital still camera with built-in zoom lens	
Number of Effective Pixels	Approx. 10.1 megapixels	
Image Sensor	Type	CCD
	Size	1/2.33 inch
Number of Recorded Pixels	Still	10M (3648×2736 pixels), 7M (3072×2304 pixels) 5M (2592×1944 pixels), 3M (2048×1536 pixels) 2.1M(16:9) (1920×1080 pixels), 1024 (1024×768 pixels) 640 (640×480 pixels) * Fixed at 3M (2048×1536) for Frame Composite and Half-length Portrait. * Fixed at 2M (1600×1200) per one image for Panorama mode. * Fixed at 640 (640×480) per one image, and 2560×1920 per one picture for 16-frame shooting.
	Movie	640 (640×480 pixels), 320 (320×240 pixels)
Sensitivity (standard output sensitivity)	Auto, Fixed (ISO 100-6400*) * When Digital SR (blur reduction) mode is selected	
File Format	Still Picture	JPEG (conforms to Exif 2.2), conforms to DCF2.0, DPOF, PictBridge, PRINT Image Matching III
	Movie	AVI (Motion JPEG), approx. 30fps/15fps, with sound
	Sound	WAVE (PCM) system, monaural
Storage Medium	Built-in memory (approx. 6.3MB), SD Memory Card, SDHC Memory Card

The recording time is for reference only. The actual recording time may vary depending on the SD Memory Card and the subject.

Lens	Focal Length	5.7mm - 17.1mm (equivalent to approx. 32mm - approx. 96mm in 35mm format of focal length)
	Aperture	f/2.9 (W) - f/5.2 (T)
	Lens Composition	7 elements in 6 groups (3 aspherical elements)
	Zoom Type	Electrically driven
	Lens Cover	Electrically driven
Digital Zoom Magnification		Approx. ×5.7
Display	Type	LCD
	Image size	2.4 inch
	Dots	approx. 112,000 dots
	Brightness level	brightness adjustable in two steps (Economy, Normal)
Playback Functions		Single-frame, 9-frame index, enlargement (max. ×10, scroll), folder display, calendar display, rotating, sound playback, slideshow, movie playback, Select & Delete, image/sound copying, digital filter (B&W, Sepia, Red, Pink, Purple, Blue, Green, Yellow), brightness filter, cropping, resizing, frame composite, red-eye compensation, protect, DPOF, Image Recovery, Face close-up playback

Focus Modes	Autofocus, Macro, Infinity, Pan Focus	
	AF type	TTL contrast detection system by sensor (user selectable: multiple/spot/Automatic Tracking AF)
	Focus Range (From lens face)	Normal : 0.5 m - ∞ (whole zoom area) Macro : 0.1 m - 0.6 m (Wide) * User selectable: Infinity, Pan focus * Face Recognition AF is available only while the camera recognizes the subject's face.
	Focus Lock	By half-pressing shutter release button
Exposure Mechanism	AE metering	Multi-segment metering
	EV Compensation	±2 EV (can be set in 1/3 EV steps)
Scene Modes	Green, Auto Picture, Program, Night Scene, Night Scene Portrait, Half-length Portrait, Movie, Landscape, Flower, Portrait, Surf & Snow, Sport, Digital SR, Kids, Pet, Food, Digital Panorama, Frame Composite, Voice Recording * Face Recognition AE is available only while the camera recognizes the subject's face.	
Movie	Continuous Recording Time	Approx. 1 second - until built-in memory or SD Memory Card is full (There is a limitation of max. 2GB regardless of SD Memory Card capacity.)
Digital Effect	B&W, Sepia, Red, Pink, Purple, Blue, Green, Yellow	
Shutter	Type	Electronic/mechanical shutter
	Shutter Speed	1/2000 sec. - 1/4 sec., 4 sec. at most (Night Scene mode setting)
Built-in Flash	Type	Auto flash with red-eye reduction function
	Flash Modes	Auto (at low illumination), Flash Off, Flash On, Auto + Red-eye, Flash On + Red-eye (Slow synchronization is possible only in Night Scene mode)
	Flash Range	Wide: approx. 0.1 m - 6.0 m (ISO Auto) Tele : approx. 0.35 m - 3.2 m (ISO Auto)
Drive Modes	Single-frame, Self-timer (approx. 10 sec., approx. 2 sec.), Continuous Shooting, 16-frame shooting	
Self-timer	Electronic control type, control time: Approx. 10 sec., 2 sec.	
Time Function	World Time	75 cities (28 time zones)
Power Source	Two AA (alkaline, lithium, nickel manganese or Ni-MH) batteries, AC adapter kit (optional)	

Battery Life (When using AA alkaline batteries)	Number of Recordable Images 200 pictures	* Recording capacity shows approximate number of shots recorded during CIPA-compliant testing (with the display on, flash used for 50% of the shots, and 23 °C). Actual performance may vary according to operating conditions.
	Playback Time 280 min.	
	Movie Recording Time 70 min.	* The playback time/recording time are measured based on in-house testing. Actual time may differ depending on the condition of use.
	Sound Recording Time 420 min.	
Interfaces	USB2.0 (Hi-Speed)/ USB/AV terminal	
Video Output	NTSC/PAL (monaural)	
PictBridge	Printer	PictBridge-compatible printer
	Print Modes	Print One, Print All, DPOF AUTOPRINT
	Paper Size	Card, L, 2L, Postcard, 100 mm×150 mm, 4"×6", 8"×10", Letter, 11"×17", A4, A3, printer setting
	Paper Type	★★★, ★★, ★, printer setting
	Quality	★★★, ★★, ★, printer setting
	Border Status	With/without, printer setting
Dimensions	Approx. 98 (W) × 59 (H) × 25 (D) mm (excluding operating or protruding parts)	
Weight	Approx. 130 g (excluding the batteries and SD Memory Card)	
Weight When Shooting	Approx. 175 g (including the batteries and SD Memory Card)	
Accessories	Two AA alkaline batteries, USB/AV cable, Software (CD-ROM), Strap, Operating Manual/PC Connection Manual (CD-ROM), Quick Guide	

WARRANTY POLICY

All PENTAX cameras purchased through authorized bona fide photographic distribution channels are guaranteed against defects of material or workmanship for a period of twelve months from date of purchase. Service will be rendered, and defective parts will be replaced without cost to you within that period, provided the equipment does not show evidence of impact, sand or liquid damage, mishandling, tampering, battery or chemical corrosion, operation contrary to operating instructions, or modification by an unauthorized repair shop. The manufacturer or its authorized representatives shall not be liable for any repair or alterations except those made with its written consent and shall not be liable for damages from delay or loss of use or from other indirect or consequential damages of any kind, whether caused by defective material or workmanship or otherwise; and it is expressly agreed that the liability of the manufacturer or its representatives under all guarantees or warranties, whether expressed or implied, is strictly limited to the replacement of parts as hereinbefore provided. No refunds will be made on repairs by non-authorized PENTAX service facilities.

Procedure During 12-month Warranty Period
Any PENTAX which proves defective during the 12-month warranty period should be returned to the dealer from whom you purchased the equipment or to the manufacturer. If there is no representative of the manufacturer in your country, send the equipment to the manufacturer, with postage prepaid. In this case, it will take a considerable length of time before the equipment can be returned to you owing to the complicated customs procedures required. If the equipment is covered by warranty, repairs will be made and parts replaced free of charge, and the equipment will be returned to you upon completion of servicing. If the equipment is not covered by warranty, regular charges of the manufacturer or of its representatives will apply. Shipping charges are to be borne by the owner. If your PENTAX was purchased outside of the country where you wish to have it serviced during the warranty period, regular handling and servicing fees may be charged by the manufacturer's representatives in that country. Notwithstanding this, your PENTAX returned to the manufacturer will be serviced free of charge according to this procedure and warranty policy. In any case, however, shipping charges and customs clearance fees to be borne by the sender. To prove the date of your purchase when required, please keep the receipt or bills covering the purchase of your equipment for at least a year. Before sending your equipment for servicing, please make sure that you are sending it to the manufacturer's authorized representatives or their approved repair shops, unless you are sending it directly to the manufacturer. Always obtain a quotation for the service charge, and only after you accept the quoted service charge, instruct the service station to proceed with the servicing.

- **This warranty policy does not affect the customer's statutory rights.**
- **The local warranty policies available from PENTAX distributors in some countries can supersede this warranty policy. Therefore, we recommend that you review the warranty card supplied with your product at the time of purchase, or contact the PENTAX distributor in your country for more information and to receive a copy of the warranty policy.**

For customers in USA
STATEMENT OF FCC COMPLIANCE
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.
  Increase the separation between the equipment and receiver.
  Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
* Consult the dealer or an experienced radio/TV technician for help.

For customers in Canada
This Class B digital apparatus complies with Canadian ICES-003.

Pour les utilisateurs au Canada
Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

Information on disposal for users

1. In the European Union

If your product is marked with this symbol, it means that used electrical/electronic products should not be mixed with general household waste. There exists a separate collection system for these products.

Used electric/electronic equipment must be treated separately and in accordance with legislation that requires proper treatment, recovery and recycling of these products. Following the implementation by member states, private households within the EU states may return their used electrical/electronic equipment to designated collection facilities free of charge*. In some countries your local retailer may also take back your old product free of charge if you purchase a similar new one.
*Please contact your local authority for further details.

By disposing of this product correctly you will help ensure that the waste undergoes the necessary treatment, recovery and recycling and thus prevent potential negative effects on the environment and human health which could otherwise arise due to inappropriate waste handling.

2. In other countries outside the EU

If you wish to discard this product, please contact your local authorities and ask for the correct method of disposal.

For Switzerland: Used electrical/electronic equipment can be returned free of charge to the dealer, even when you don't purchase a new product. Further collection facilities are listed on the home page of www.swico.ch or www.sens.ch.
