MP3 File Playback 32/64MB Memory Convenient Memory Expansion (yepp⁷ ™ Card) Section Repeating Voice Recording Phone Book 7-Mode Equalizer USB Adapter (Optional) User's Guide YP-E32/64

Please read all instructions in this User's Guide before using the player.

OD,

Voice Recording - yepp/™

You can store up to 128 minutes of voice recording from a lecture or interview on your yepp´™ (YP-E32).

0

Digital Sounds - yepp/™ The player maintains high quality sound at all times.

Phone Book - yepp'™

You can store up to 350 Names and phone numbers on your yepp' ™.

yepp'

The yepp' ™ is a digital audio player for the next generation. You can purchase MP3 files on the Internet and download them directly to your yepp ™ for CD quality sound without the need for a cassette or CD.

What is MP3?

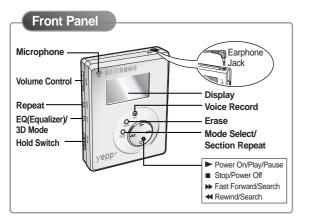

MP3 stands for MPEG 1 layer 3. MP3 files are 1/4 to 1/20 the size of uncompressed audio files.

 - Press and hold to move backward within the current track. press and release to skip to the start of the previous track.

LISTENING TO MUSIC

Your yepp [™] comes with pre-installed MP3 files for your immediate use.

REPEATING TRACKS/SECTION

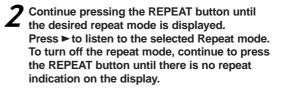

Your yepp [™] can automatically repeat all files or an individual file.

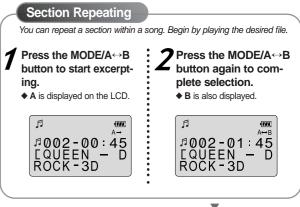

Repeating Tracks

Pressing the REPEAT button will allow you to perform the following functions.

• Repeat : repeat the current selected file

All : repeat all files stored in the selected mode
 Shuffle : randomly plays files in the selected mode
 INTRO : plays the first 10 seconds of each file in the selected mode

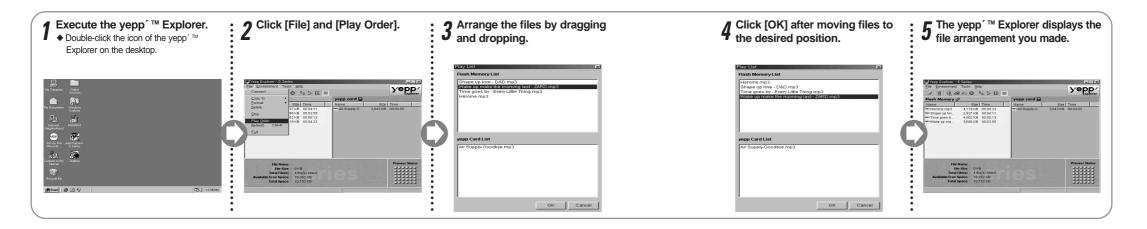

To cancel section repeating, press the MODE/A↔B button during the playback.

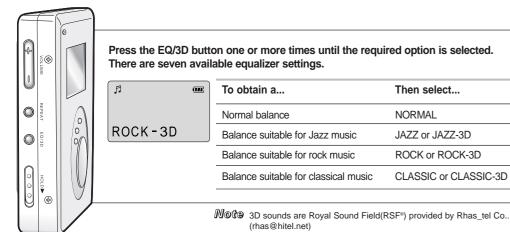

Connect your yepp [™] to the PC and execute the yepp [™] Explorer as indicated on pages 18~22.

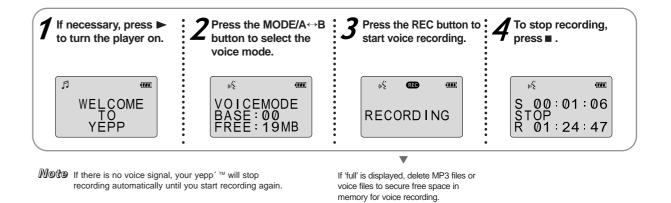

Using the equalizer

Your player is equipped with a preset equalizer that enables you to choose the most appropriate balance between treble and bass frequencies, according to the type of music you are listening to.

VOICE RECORDING

You can record up to 128 minutes(with YP-E32). Voice is recorded on ADPCM format, so the quality of sound may be lower than that of the MP3 format.

LISTENING TO THE RECORDED VOICE (ON PC)

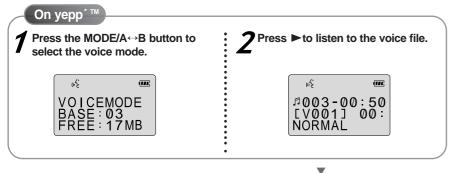

Connect your yepp [™] to the PC and execute the yepp [™] Explorer as indicated on pages 18~22.

Mote ◆ When you wish to send voice files to another computer and listen to them, please refer to page 15.

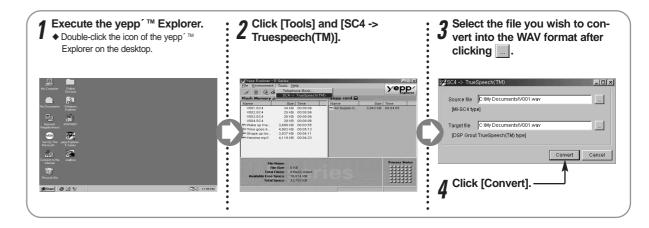

LISTENING TO THE RECORDED VOICE (ON yeppTM)

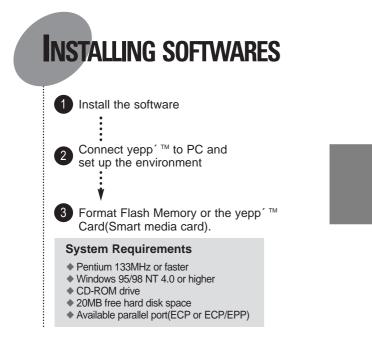

MAKING WAV FILES

When you wish to send a voice file to another computer, you should convert the file into the standard WAV format. yepp^{*} Explorer should be installed on your computer. For software installation instructions, please refer to page 18.

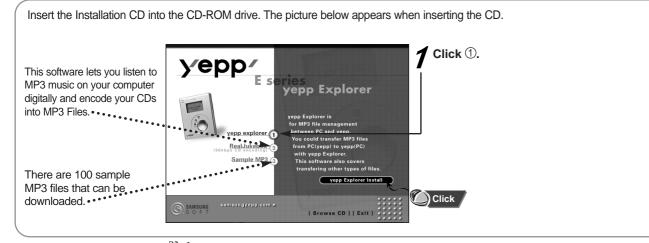

SETTING UP ENVIRONMENT

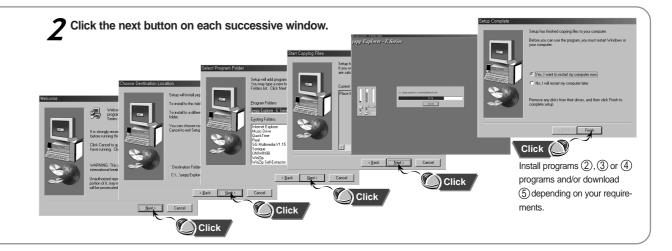

- ◆ The yepp´™ is designed to work in ECP mode. So check whether your computer supports ECP mode before using your yepp´™. To check the mode, go to My Computer → Control panels → System → Device Manger → Port.
- If your computer is not in ECP mode, select ECP mode by entering BIOS mode after rebooting your computer. Refer to your operations manual provided with your computer or contact the place where you purchased PC.

If your computer does not support ECP mode, select EPP or Bi-directional mode. (However, some old model computers will not able to communicate with your yepp´™ in EPP or Bi-directional mode.)

16 ENG

INSTALLING SOFTWARE ON PC

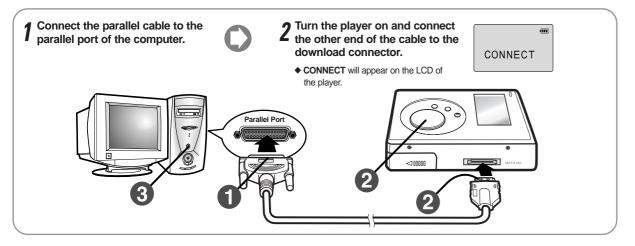

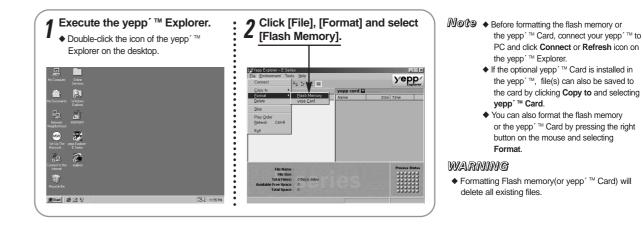

Note If your software does not work properly after finishing installation, please refer to page 27 and recheck your PC parallel configuration (ECP mode).

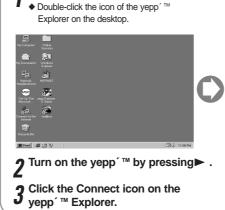

FORMATTING FLASH MEMORY

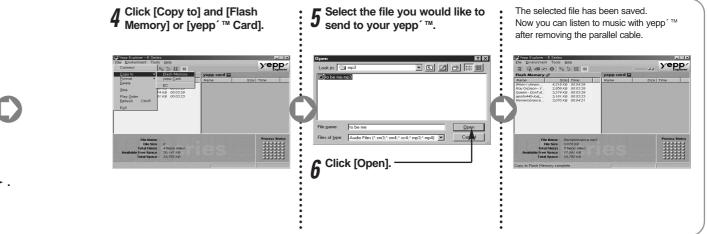

Before sending files to your yepp´™, connect the yepp´™ to PC and click **Connect** or the **Refresh** icon on the yepp´™ Explorer.

▲ Execute the yepp TM Explorer.

 Moto
 Always check that CONNECT is displayed on the LCD before sending a file.
 The yepp [™] uses around 1MB of memory for each minute of music. Voice recording occupies about 0.25MB of memory for each minute.

OPTION PREFERENCES

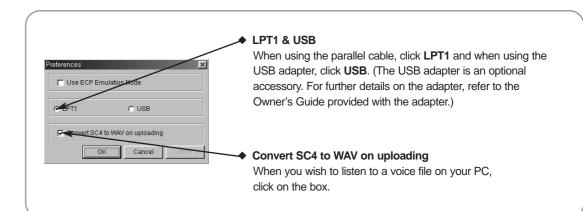

To set the preferences, click the [Environment] and [Option Ctrl+O] on the yepp[™] Explorer. To save the changes, click [OK].

Using ECP Emulation Mode If your PC supports ECP mode, you do not have to click

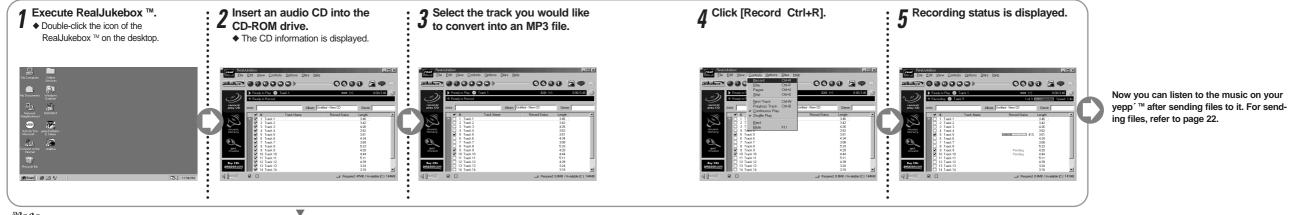

When your PC does not support ECP mode, click on the ECP Emulation mode box. (In this case, the download speed can be lower than that in ECP mode.) However, some old model computers will not able to

communicate with your yepp [™] even though you select

Making MP3 files from an audio CD

You must install the RealJukebox [™] on your computer before making MP3 files. For software installation instruction, please refer to page 18.

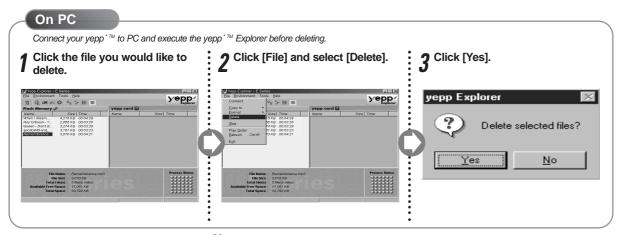

Note RealJukebox ™ is a music management system provided by RealNetwork Co..

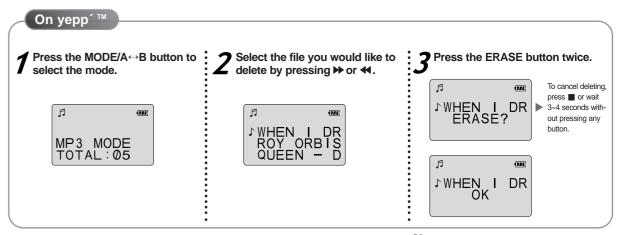

For further details on RealJukebox ™, see **Help**.

26 ENG

DELETING FILES

Note You can also delete the file by pressing the right button on the mouse and selecting **Delete**.

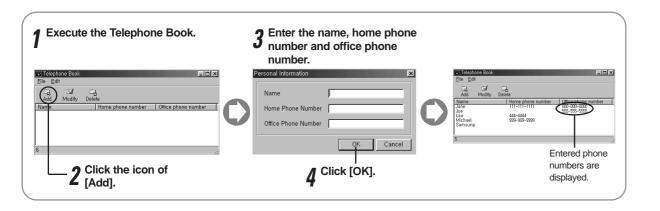

Mote files have been deleted from your yepp´™, they cannot be accessed.

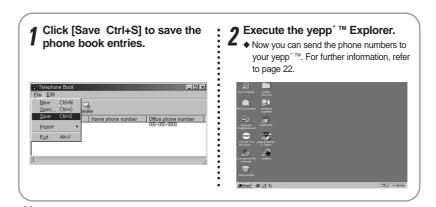

You can store up to 350 entries to your yepp ´™.

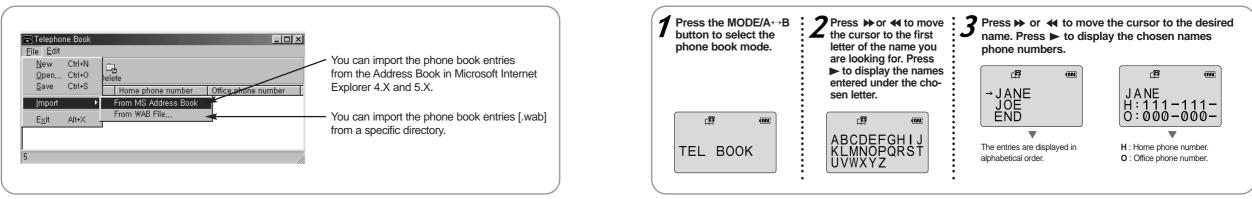

Mote The phone book entries are saved as [.tel]. Thus, when sending the phone book entries to the yepp´™ you must select the [.tel] file. You can store only one [.tel] file to the player. If you attempt to store another [.tel] file, it will replace the exiting file.

IMPORTING PHONE BOOK ENTRIES

VIEWING PHONE NUMBERS

The phone numbers can be found alphabetically.

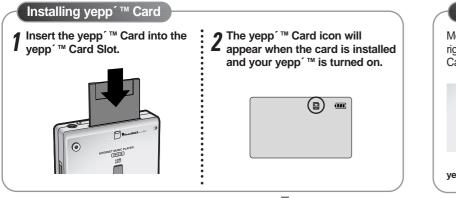

To exit the phone book mode and return to main menu, press the MODE/A↔B button again.

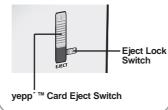

You can store more music by using the optional yepp [™] Card.

To send files to the yepp' ™ Card, you must format the card before using it ; refer to page 21.

Move the Eject Lock Switch to the right side and push the yepp' $^{\text{TM}}$ Card Eject Switch upward.

SAFETY PRECAUTIONS

Do not drop your player or leave it under heavy objects.

Do not allow any liquids to contact the player.

◆ If this happens, wipe the player with dry cloth and call a Samsung Electronics service center.

Avoid areas of high humidity, strong magnetic fields, or sources of heat when storing your player.

Do not use thinner, alcohol, or benzene when cleaning the player. It may damage the player.

34 ENG

TROUBLESHOOTING

The software does not work properly.

Refer to page 17, setting up Environment

The software does not work even if your computer is in ECP mode.

◆ The yepp'[™] Explorer can be in conflict with the external drive, for instance the zip drive. You should uninstall the drive using the parallel port in this case.

The player does not work or nothing is displayed on the LCD.

- Check the capacity of the batteries. Two 1.5V AAA-size batteries are required.
- Check the polarity(+ and -) of the batteries.

The buttons are not working.

 Check if the Hold Switch is down. While the Hold Switch is down, the buttons do not work.

MP3 files cannot be downloaded.

Check and/or replace the batteries.
Check the connection between the parallel port of your PC and the parallel cable.

yepp' ™ Card cannot be inserted into the player.

♦ Make sure you are using the correct yepp me card. Only 3.3V version cards will work in your yepp me. 5V version cards will not function correctly.

The files on the yepp[´]™ Card cannot be recognized. MP3 files downloaded to another media card from a different manufacturer of MP3 may not work in your yepp^{´™}. Format the yepp^{´™} Card and copy files again with the yepp^{´™} Explorer.

SECURITY AND MP3 WEBSITES

You can get legal MP3 files from a growing number of Internet sites. Here are some sites which provide MP3 files.

What is SecuMax?

With the increasing amount of digital multimedia content, the content providers became concerned with the ease in which the content could be copied and distributed in violation of their copyrights. This matter required the system for protecting copyrighted music and for using legal contents conveniently.

It is the reason SecuMAX has been developed.

SecuMAX protects the copyrighted music against infringement.

 SecuMAX can be adapted to various types of digital contents.

For further details on SecuMAX, please visit www.samsungyepp.com
