MOTO W233 renew

Make sure you stay connected to your friends, your family, and the environment. Introducing Motorola's first environmentally responsible phone: the Moto W233 Renew. It isn't just for eco-conscious consumers, but for us to take a step in the right direction in helping the planet. Communication is important, but responsible communication is something more.

Made from plastics that contain recycled water bottles and CarbonFree[™] certified, the Moto W233 Renew is cutting down on your carbon footprint by cutting down on its own. Through an alliance with Carbonfund.org, we offset our remaining carbon output by investing in renewable energy sources.

Phones normally come in too-big boxes with a lot of paper products inside. Not the Moto W233 Renew. Its reduced package size and weight reduce transportation emissions and paper use. On top of all that, it comes with a postage-paid envelope for easily recycling your old phone.

A best-in-class talk time of up to 9 hours means you can charge less and conserve more.

TUTORIAL

Additional Features

- 100% recyclable phone housing.
- The first CarbonFree[™] mobile device on the market.
- The Moto W233 Renew is 70% recyclable, promoting future eco-responsibility.
- All paper in box materials are printed on 100% post consumer recycled paper.
- Between 2000 and 2007, Motorola reduced its carbon footprint by 25%. Moto W233 Renew is another step in the right direction.
