## TELEPHONE APPLICATION - BASIC OPERATIONS

### • Dialling a stored number

If the number of the person you wish to call is stored in your SIM card or in the memory of your Mondo, you do not need to enter each digit using the number keys on the virtual keyboard.

Simply select the number from the directory in your Mondo (this list contains all the numbers you have stored yourself) or from one of the lists of last dialled numbers.

#### - Dialling a number from the directory:

From the standby screen of the Telephone application:

- 1- Tap on the arrow to open the directory.

*A list of the contacts you have stored is displayed on the screen.*

- 2- Tap on the contact of your choice.

**PLEASE NOTE:** A contact is a name to which more than one telephone number can be assigned (for more details, refer to page 19).

*If you select a contact to which several numbers have been assigned, a list of these numbers is displayed. Tap on the number of your choice.*

- 3- Tap on the key on the virtual keyboard or press the jog wheel of your Mondo.

*The number you have selected is immediately dialled.*

#### - Dialling a number from the list of last called numbers:

The memory of your Mondo stores:

- The last 10 numbers you have dialled (**Last dial**).
- The last 10 numbers of the incoming calls which you have not answered (**Unanswered**).
- The last 10 numbers of the incoming calls which you have answered (**Received**).

To return a call to one of these numbers:

From the standby screen of the Telephone application:

- 1- Tap on the **Menu** function key to access the main menu of the Telephone application.

- 2- Tap on the or arrow on the virtual keyboard to display **Calls & Times** on the screen.

- 3- Tap on the **Calls & Times** screen.

- 4- Tap on **Calls log**.

5- Tap on the category of number you require.

*You have a choice of: Last dialled, Unanswered or Received.*

6- Tap on the number of your choice.

7- Tap on the  key on the virtual keyboard or press the jog wheel on your Mondo.

*The number you have selected is immediately dialled.*

#### **- Rapid access to the list of the last 10 numbers dialled:**

From the standby screen of the Telephone application:

1- Tap on the  key on the virtual keyboard or press the jog wheel on your Mondo.

*A list of the last 10 dialled numbers is displayed on the screen.*

2- Tap on the number of your choice.

3- Tap once again on the  key on the virtual keyboard or press the jog wheel on your Mondo.

*The number you have selected is immediately dialled.*

## **• Speed dialling**

The numbers recorded in the directory of your Mondo or your SIM card may be associated with the  to  number keys on the soft keyboard (for further information, see page 22).

By default, the  number key on the soft keyboard is always allocated to the number of your voice message service.

#### **- To call a correspondent using speed dialling:**

1- Tap and hold your stylus on the number key allocated to the name of your correspondent.

*Your correspondent's number appears on the screen.*

 **PLEASE NOTE:** If you have recorded several telephone numbers under the same name, the list of these numbers appears on the screen. In this case tap on the number you have selected to trigger the call.

2- Tap on the  key on the virtual keyboard or press the jog wheel on your Mondo.

*The number of your called party is immediately dialled.*

## **• Unanswered calls indicator**

If you have received one or more calls which you have not answered (this can happen, for example, if you are out of the room for a few minutes and have left your Mondo on standby on your desk):

➤ The message indicator lamp on the top of your Mondo emits a series of (slow) orange flashes.

➤ The  symbol is displayed on the standby screen of the Telephone application, if it is active.

This symbol is followed by a digit indicating the number of new calls received which you have not answered.

### **- To display the numbers of the callers who have contacted you:**

From the standby screen of the Telephone application:

- 1- Tap on the **Read** function key on the virtual keyboard.

*If you have received voice and/or SMS messages in addition to the calls you have not answered, a menu offers you a choice of several options. Tap on **unanswered**.*

- 2- The numbers of the last unanswered calls are displayed on the screen.

### **- If you want to know more about the date and time when a call was received:**

- 3- Tap on the number of the call you wish to check.

- 4- Tap on the **Options** function key on the virtual keyboard.

- 5- Tap on **Details** in the list of options.

*The number of the last unanswered call is displayed on the screen, together with the date and time when the call was received.*

### **- If you need to call the number displayed on the screen:**

- 6- Tap on the  key on the virtual keyboard or press the jog wheel on your Mondo.

**■ PLEASE NOTE:** *The last 10 numbers of the calls you have not answered are stored in the memory of your Mondo. To find out how to access these numbers at a later stage and to call them if required, please refer to the relevant section of this manual, page 3.*

## **• Voice messages indicator**

The receipt of new voice messages on your answering service is indicated in three different ways:

- Your Mondo emits an audible signal (beep) when new messages are received.
- The message indicator lamp on the top of your Mondo emits a series of (**slow orange flashes**).
- The  symbol is displayed on the standby screen of the Telephone application, if it is active.

This symbol is followed by a digit indicating the number of new voice messages received.

### **- To display the numbers of the callers:**

From the standby screen of the Telephone application:

- 1- Tap on the **Read** function key on the virtual keyboard.

*If you have received SMS messages or calls you have not answered in addition to the new voice messages, a menu offers you a choice of several options. Tap on **Voice messages**.*

- 2- The numbers of the last callers are displayed on the screen.

### **- If you want to know more about the date and time when a voice message was received:**

- 3- Tap on the number of the message you wish to check.

- 4- Tap on the **Options** function key on the virtual keyboard.

- 5- Tap on **Details** in the list of options.

*The number of the caller is displayed on the screen, together with the date and time when his message was received.*

**- If you need to call the number displayed on the screen:**

6- Tap on the  key on the virtual keyboard or press the jog wheel on your Mondo.

**- To access your voice messages by speed dialling:**

Tap and hold down the stylus on the  number key on the virtual keyboard.

## • Short message texts (SMS) indicator

The receipt of a new SMS message is indicated in three different ways:

- Your Mondo emits an audible signal (beep) when a new SMS message is received.
- The message indicator lamp on the top of your Mondo emits a series of (slow) orange flashes.
- The  symbol is displayed on the standby screen of the Telephone application, if it is active.

This symbol is followed by a digit indicating the number of new SMS messages received.

**- To read new SMS messages:**

Tap on the Read function key or press the "Microsoft inbox" program button in the lower part of your Mondo (for more information, refer to Windows-CE manual).

## • Hands-free operation

The Hands-free function of your Mondo is particularly useful:

- If you want people near you to take part in the conversation (if you are in a meeting for example).
- If you are in a car.

**- To ring a caller in hands-free mode:**

From the standby screen of the Telephone application:

- 1- Enter the number of the person you wish to call, using the number keys on the virtual keyboard (or select the number from your directory or from the list of most recent calls).
- 2- Tap on the  key on the virtual keyboard.

*The number is immediately dialled and you then hear the ringing tone.*

**- To answer a call in hands-free mode or to change over to hands-free mode during a call:**

➤ Tap on the  key on the virtual keyboard.

**- To deactivate hands-free mode during a call:**

➤ Tap on the  key.

**■ PLEASE NOTE:** *If you forget to deactivate hands-free mode at the end of a call, it will automatically be deactivated for the next call (outgoing or incoming).*

## • Switching off the microphone

During a call, you can switch off the microphone of your Mondo in order to hold a private conversation with the people near you without being overheard by the other caller.

### - To switch off the microphone during a telephone conversation:

1- Tap on the **Mute** function key on the virtual keyboard.

*A prompt asks you to confirm that you wish to switch off the microphone.*

2- Tap on **YES**.

*The microphone is switched off. The  symbol is displayed at the top of the screen.*

### - To switch the microphone back on during a telephone conversation:

1- Tap on the **Unmute** function key on the virtual keyboard.

2- Tap on **YES**.

*The microphone is switched on again. The  symbol disappears from the screen. You can now resume your conversation with the other caller.*

**■ PLEASE NOTE:** If you forget to switch on the microphone before hanging up, it will be switched on automatically for the next call (outgoing or incoming).

## • Choice of alert mode

When you receive a call, your Mondo can alert you in a number of different ways, depending on the alert mode you have programmed:

➤ **Ring:** Your Mondo emits an audible tone when a call is received.

➤ **Silent:** Your Mondo remains silent.

**■ PLEASE NOTE:** When this alert mode is selected, the signals emitted by your Mondo when you tap on the buttons on the virtual keyboard are also muted.

➤ **Vibrate:** Your Mondo vibrates but does not emit an audible tone.

➤ **Vibrate and ring:** Your Mondo vibrates and simultaneously emits an audible tone.

➤ **Vibrate then ring:** Your Mondo vibrates, then emits an audible tone after a few seconds if you have not answered the call.

➤ **Ramping:** If the ramping ring tone is in operation, your Mondo emits a quiet audible tone when the call is received; the tone becomes increasingly loud until you answer the call.

**■ PLEASE NOTE:** In each case, the indicator lamp on your Mondo emits a series of (slow) orange flashes when the call is received.

### - To select an alert mode (with the exception of Ramping):

From the standby screen of the Telephone application (while no calls are in progress):

1- Tap on the  arrow on the virtual keyboard.

*The Alert tones screen opens. A list of alert modes is displayed, with the exception of Ramping (to activate or deactivate this alert mode, see below).*

2- Tap on the alert mode you require.

➤ If you select the **Ring alert** alert mode and if you have previously set the ring tone volume to **0**, a warning message is displayed (for more details, refer to next paragraph).

- If you have chosen the **Silent** alert mode, the  symbol is displayed on the screen.
- ▣ **PLEASE NOTE:** *The choice of **Silent** alert mode is not retained when you exit from the Telephone application. The **Ring tone** alert mode will be restored automatically when you next launch the Telephone application.*
- If you have chosen any of the **Vibrate**, **Vibrate and ring** or **Vibrate then ring** alert modes, the  symbol is displayed in the standby screen of the Telephone application.

#### **- To activate or deactivate the "Ramping ring tone" alert mode:**

From the standby screen of the Telephone application (while no calls are in progress):

- 1- Tap on the  arrow on the virtual keyboard.

*The Volumes control screen appears.*

- 2- Tap on **Ramping** arrow on the virtual keyboard.

*The Ramping screen appears.*

- 3- Tap on **On** or **Off**.

## • **Adjusting the ring tone volume**

From the standby screen of the Telephone application:

- 1- Tap on the  arrow on the virtual keyboard.

*The Volumes control screen appears.*

*The Ring component is already selected at the top of the list.*

- 2- Tap on **Ring**.

*The Ring Volume screen appears.*

- 3- Tap as many times as necessary on the  or  arrow on the virtual keyboard in order to increase or reduce the volume of the ring tone.

- 4- Tap on the **OK** function key to store your setting.

## • **Adjusting the earpiece/speaker volume**

#### **- To adjust the volume of the earpiece/speaker during a call:**

From the communication screen of the Telephone application:

- 1- Tap on the  or  arrow on the virtual keyboard.

*The Volumes screen appears.*

- 2- Tap as many times as necessary on the  or  arrow in order to increase or reduce the volume of the earpiece/speaker.

- 3- Tap on the **OK** arrow on the virtual keyboard to store your setting.

▣ **PLEASE NOTE:** *To increase or reduce the volume of the earpiece/speaker during a call, you can also push the jog wheel up or down.*

#### **- To adjust the earpiece/speaker volume when no call is in progress:**

From the standby screen of the Telephone application:

- 1- Tap on the  arrow on the virtual keyboard.

*The Volumes control screen appears.*

2- Tap on Conversation in the list of options.

*The Speech volume screen appears.*

3- Tap as many times as necessary on the ↗ or ↘ arrow to increase or reduce the volume of the earpiece/speaker.

4- Tap on the OK function key to store your setting.

## • **Adjusting the volume of the Keys**

When you tap on a key on the virtual keyboard of your Mondo, it emits an audible signal (beep) to acknowledge your action.

You can adjust the volume of this audible signal (beep) from the standby screen of the Telephone application (while no calls are in progress):

1- Tap on the ↗ arrow on the virtual keyboard.

*The Volumes control screen appears.*

2- Tap on Keys in the list of options.

*The screen for adjusting the volume of the keys appears.*

3- Tap as many times as necessary on the ↗ or ↘ arrow to increase or reduce the volume of the audible signal (beep) from the buttons.

4- Tap on the OK function key to store your setting.

**■ PLEASE NOTE:** If you have selected the Silent alert mode (refer to page 6), your Mondo will not emit any audible signal (beep) when you tap on the keys on the virtual keyboard, regardless of the setting for the volume of the keys.

## • **Transmitting multi-frequency tones (DTMF)**

Multi-frequency tones (DTMF) are transmitted in order to remotely interrogate telephone answering services, voice messages, bank servers, etc. They are used to transmit passwords and ringback numbers.

### - **Manual transmission of multi-frequency tones:**

To transmit multi-frequency tones during a call, tap on the buttons on the virtual keyboard of your Mondo.

*The tones which correspond to these keys are emitted to the earpiece and are immediately transmitted.*

### - **Automatic transmission of multi-frequency tones:**

If you need to transmit the same series of multi-frequency tones at regular intervals, you can store it in the directory of your Mondo.

If the required series of tones is not yet stored in your directory:

1- During a call, tap on the Options function key on the virtual keyboard.

2- Tap on auto DTMF in the list of options.

3- Enter the required series of tones, using the number keys on the virtual keyboard.

4- Tap on the OK function key.

*The series of tones you have entered is now stored in your directory.*

*The actual tones are emitted to the earpiece and are immediately transmitted.*

*The standard communication screen reappears.*

If the series of tones is already stored in your directory:

- 1- During a call, tap on the **Options** function key on the virtual keyboard.
- 2- Tap on **DTMF auto** in the list of options.
- 3- Tap on the **Names** function key to display the list of stored tones.
- 4- Tap on the name of your choice.

*The multi-frequency tones assigned to the selected name are emitted to the earpiece and are immediately transmitted. The standard communication screen reappears.*

**■ PLEASE NOTE:** *It is not possible to transmit multi-frequency tones when a caller has been placed on hold.*

#### **- Using the Pause function:**

It is possible to enter a telephone number and a series of multi-frequency tones on the screen (just before replying to a call or in order to store them), provided that they are separated by a pause. To do this:

- 1- Enter the telephone number, using the number keys on the virtual keyboard.
- 2- Tap and hold down the stylus on the \* button until a P is displayed on the screen.
- 3- Tap on the keys on the virtual keyboard which correspond to the required multi-frequency tones.

**■ PLEASE NOTE:** *You can enter as many pauses as necessary, with a maximum of 20 to 46 digits (depending on the memory capacity of the SIM card and of your Mondo).*

### **• Placing a caller on hold and returning to a held caller**

You are holding a telephone conversation.

#### **- If you wish to place your caller on hold:**

- Tap on the ☎ key on the virtual keyboard.

#### **- To resume the conversation with your original caller:**

- Tap again on the ☎ key on the virtual keyboard.

#### **- If you want to terminate the conversation:**

- Press the jog wheel on your Mondo or tap on the ☎ key on the virtual keyboard.

**■ PLEASE NOTE:** *You can also place a caller on hold, resume the conversation with your original caller, call another person, etc. by clicking on the **Options** function key and selecting the required operations from the displayed menu (for more details, refer to page 12).*

### **• The Call Waiting service**

Call Waiting is a service provided by the GSM telephone network:

- It alerts you to the arrival of new incoming calls, even when you are already holding a telephone conversation.
- It allows you to place your existing caller on hold while you receive or make a second call.

#### **- To activate or deactivate the Call Waiting service:**

From the standby screen of the Telephone application:

- 1- Tap on the **Menu** function key to access the main menu of the Telephone application.
- 2- Tap on the or arrow on the virtual keyboard to display the **Settings** screen.
- 3- Tap on the **Settings** screen.
- 4- Tap on **GSM Services** in the list of settings.
- 5- Tap on **Call Waiting** in the list of GSM Services.
- 6- Tap on **Activate** if you wish to make use of the Call Waiting service or on **Cancel** if you do not wish to use this service.

*The message **Requesting in progress** is displayed on the screen, followed by a second message confirming that your request has been accepted.*

### **• Making a call during a telephone conversation**

#### **- To make another call while you are holding a telephone conversation:**

- 1- Notify your original caller that he/she will be placed on hold for a few moments.
- 2- Enter the telephone number of your second caller, using the number keys on the virtual keyboard.
- 3- Tap on the key on the virtual keyboard.
- 4- Once the call has been put through, tap on the key on the virtual keyboard to change from one caller to the other at will.

#### **- To terminate the conversation with the on-line caller only:**

- 1- Tap on the **Options** function key on the virtual keyboard.
- 2- Tap on **End call** in the list of options.

*The conversation with your on-held caller is immediately resumed.*

#### **- To terminate the conversation with the held caller only:**

- 1- Tap on the **Options** function key on the virtual keyboard.
- 2- Tap on **End held call** in the list of options.

*You can continue the conversation with your on-line caller as normal.*

#### **- To terminate both conversations (held and active) simultaneously:**

- Press the jog wheel on your Mondo or tap on the key on the virtual keyboard.
- PLEASE NOTE:** You can also place a caller on hold, resume the conversation with your original caller, call another person, etc. by clicking on the **Options** function key and selecting the required operations from the displayed menu (for more details, refer to page 12).

### **- Making a call while connecting to WAP™ or GPRS:**

#### **➤ In the case of a WAP™ or GPRS connection in Standard mode:**

Before making a telephone call, you must terminate the connection and exit from the current session (refer to page 62). As an exception, the connection is automatically terminated when an emergency call is made. In the case of a connection to a PC, the connection is interrupted. It is possible to restore the connection from the PC at a later stage.

➤ In the case of a WAP™ or GPRS connection in Modem mode:

As your Mondo is disconnected from the GSM network, it is not possible to make standard voice calls (except for emergency calls). An error message is displayed on the screen in response to any attempt to make a voice call.

- **Receiving a call while a telephone conversation is in progress**

If the Call Waiting service is activated on your Mondo:

- You will hear a double beep tone in the earpiece when you receive a call while a telephone conversation is in progress.
- An animated graphic appears on the screen, together with the telephone number of your caller (if it is accessible).

- **To answer the call:**

Tap on the  key on the virtual keyboard.

*Your original caller is placed on hold.*

Once communication has been established with your second caller:

➤ **You can alternate between the callers as many times as you wish:**

Tap on the  key on the virtual keyboard.

➤ **You can terminate the conversation with the on-line caller only:**

1- Tap on the **Options** function key on the virtual keyboard.

2- Tap on **End call** in the list of options.

*The conversation with your on-hold caller is immediately resumed.*

➤ **You can terminate the conversation with the held caller only:**

1- Tap on the **Options** function key on the virtual keyboard.

2- Tap on **End held call** in the list of options.

*You can continue the conversation with your on-line caller as normal.*

➤ **You can terminate both conversations (active and held) simultaneously:**

Press the jog wheel on your Mondo or tap on the  key on the virtual keyboard.

- **Receiving a call while connecting to WAP™ or GPRS:**

➤ **In the case of a WAP™ connection in Standard mode:**

The incoming call is put through. If you wish, you can clear or suspend the WAP™ connection in order to answer the call.

At the end of your telephone conversation, you must restore the connection by calling the WAP™ context off-line. As the first call requires access to the network, it will re-establish the connection by deploying the parameters it used previously.

A PC connection must be restarted from the PC.

➤ **In the case of a GPRS connection in Standard mode:**

The incoming call is put through. If you wish, you can clear or suspend the GPRS connection in order to answer the call.

You must restore the GPRS connection yourself after you have completed your telephone conversation.

➤ **In the case of a connection in Modem mode:**

As your Mondo is disconnected from the GSM network, you are unable to receive telephone calls.

## • **Multiparty telephone conferencing**

If the **Call Waiting** service is activated on your Mondo, you can hold up to 6 telephone conversations at the same time. All the callers are able to talk to each other (to find out how to activate the **Call Waiting** service, refer to page 47).

- 1- Enter the telephone number of your first caller, using the number keys on the virtual keyboard.
- 2- Tap on the  key on the virtual keyboard.
- 3- Once the call has been put through, notify your initial caller that he/she will be placed on hold, then enter the number of your second caller.
- 4- Tap again on the  key on the virtual keyboard.
- 5- Once the call has been put through to your second caller, tap on the **Options** function key on the virtual keyboard.

A menu is displayed on the screen. It contains the following options:

### **Auto DTMF:**

To transmit a series of multi-frequency tones to one or more on-line callers (on-hold callers are unable to receive these tones).

### **Swap:**

To swap from active callers to held callers.

### **Join:**

To join the called parties (regardless of whether they are active or held) and set up a multiparty conference.

### **Mute:**

To switch the microphone of your Mondo on or off.

### **End held:**

To terminate communication with the on-hold callers. You remain in communication with the active callers.

### **End active:**

To terminate the communication with active callers. Communication with the held callers is automatically restored.

### **End all calls:**

To terminate all the calls simultaneously.

### **\*Private with:**

To hold a private conversation with one of the participants in the multiparty conference. This option is used to display a list of the participants: you can then select the one with whom you wish to converse "in isolation". The other participants are automatically placed on hold.

### **Hold/resume:**

To place all the participants in the conference on hold or to resume the conference with all the participants.

### **\*End call:**

To terminate communication with just one of the participants in the conference.

This option is used to display a list of the participants: you can then select the one with whom you wish to terminate the call. The other participants remain in multiparty conference mode.

During the conference call, your Mondo displays and confirms the options you have selected.

■ PLEASE NOTE: *The options preceded by an asterisk \* do not appear in the menu until you have more than 2 callers (active or held).*

*If you are a subscriber to the **Second Line** service, you cannot combine your callers (on Line 1 and on Line 2) in a multiparty conference.*

If you want to ring a third caller:

- 1- Ring your first two callers, as indicated above.
- 2- Tap on **Join in the conference mode** in the list of options in order to join your active and held callers.
- 3- Notify your callers that they will be placed on hold for a few moments.
- 4- Enter the number of your third caller, using the number keys on the virtual keyboard.
- 5- Tap on the  key on the virtual keyboard.
- 6- Once the call has been put through, tap on the **Options** function key then select the option of your choice.

■ PLEASE NOTE: *Regardless of the number of callers (between 2 and 5), you should always place the active and held callers in conference mode before you ring an additional caller.*

## The menus of the Telephone application

### 1- Accessing the menus

Your Mondo is equipped with numerous functions which are easily accessible from the menus via the arrow keys and function keys on the virtual keyboard.

With the aid of the integral SIM card, your Mondo is also capable of detecting and displaying in the menu the services provided by your operator or of deleting those services to which you do not subscribe.

- **To access the main menu of the Telephone application from the standby screen:**

- 1- Tap on the Menu function key or on the arrow on the virtual keyboard.
- 2- Use the or arrow on the virtual keyboard to access the display screens for the main functions (Phone book, Messages, Calls & Times, Settings and WAP).
- 3- Tap on the display screen for the required function in order to open the corresponding submenu.

**■ PLEASE NOTE:** For ease of operation, your Mondo also allows you to access, from the standby screen, all the numbers stored in the directory by clicking on the arrow on the virtual keyboard.

- **To access the options displayed in the menus:**

With your stylus, tap on the option of your choice.

- **To scroll through the pages of a menu (or of a directory):**

Use the or arrow on the virtual keyboard.

or

push the jog wheel on your Mondo up or down.

- **To return to the preceding menu (or submenu):**

Tap on the Exit function key or on the arrow.

- **To exit from the main menu and return to the standby screen of the Telephone application:**

Tap and hold down the stylus on the Exit function key.

If no call is in progress, you can also tap on the button on the virtual keyboard or press the jog wheel on your Mondo.

## • Organisation of the menus

- **Settings**

■ PLEASE NOTE: The display or content of the menus shown in italics is dependent on your subscription and the services provided by your operator.

The display or content of the menus marked with an asterisk (\*) is dependent on the selected operating mode (Standard or Modem).

## 2- Entering text

For certain functions, such as recording names in a directory, it is necessary to be able to enter text (alphabetical and numerical characters) on the screen. You can do this by using the virtual keyboard of your Mondo.

■ PLEASE NOTE: If you want to transmit an SMS message, you must use the Microsoft Mailbox application to enter the text of your message. Select this application from the  Start menu.

### • The Multitype/Multipress method

In the screens used for entering text, tap briefly on a key to display the first alphabetical character assigned to this key.

All the other characters or numerals assigned to this key are also displayed at the top of the screen.

To display the second character assigned to a key, tap on the key.

To display the third character, tap three times, and so on.

The  symbol is displayed if you are in lower case mode.

The  symbol is displayed if you are in upper case mode (to change modes, refer to the method of using the  key - see below).

Key	Character	
	Lower case	Upper case
	1 . , - ' @: ?	
<b>1<sub>ABC</sub></b>	a b c 2	A B C 2
<b>2<sub>DEF</sub></b>	d e f 3	D E F 3
<b>3<sub>GHI</sub></b>	g h i 4	G H I 4
<b>4<sub>JKL</sub></b>	j k l 5	J K L 5
<b>5<sub>MNO</sub></b>	m n o 6	M N O 6
<b>6<sub>PQR</sub></b>	p q r s 7	P Q R S 7
<b>7<sub>TUV</sub></b>	t u v 8	T U V 8
<b>8<sub>XYZ</sub></b>	w x y z 9	W X Y Z 9
<b>9<sub>WXZ</sub></b>	0	0
<b>0</b>	Tap on this key to change the next letter from lower case to upper case and vice-versa.	
<b>*+</b>	Tap and hold down your stylus on this key to change all the subsequent letters from lower case to upper case and vice-versa.	
	Tap on this key to enter a space character.	
<b>#</b>	Tap and hold down your stylus on this key to access the following special characters: ( ) % ! ; « _ @ § + # * / & = ¥ \$ € ¡ ¡	

**■ PLEASE NOTE:** The characters assigned to the keys are dependent on the language used.

**- To enter a character:**

Tap as many times as necessary on the key assigned to the required character until it is displayed on the screen.

**- To enter the numeral assigned to a key:**

Tap and hold down your stylus on this key until the corresponding numeral is displayed.

*If you need to enter two characters in succession which are assigned to the same key, enter the first character by clicking on the corresponding key, wait until the characters displayed at the top of the screen are deleted, then tap on the key again (as many times as necessary) to enter the second character.*

**- To delete the last entered character:**

Tap on the Clear function key.

**- To delete all the entered text:**

Tap and hold down your stylus on the Clear function key.

**- To move the cursor through the text in order to insert characters or make corrections:**

Use the or arrow on the virtual keyboard of the Telephone application.

### **- To access special characters (displayed on three successive screens):**

Tap and hold down your stylus on the **#** key.

The characters are arranged in the same way as keys **123** to **987** on the virtual keyboard.

For example, to select the character **)** and insert it directly into the text, tap on the **2ABC** number key on the virtual keyboard.

Use the **◀** or **▶** arrow on the virtual keyboard to move to the next screen.

#### **Example:**

To enter the first name "Paul" on the screen:

1- Tap on the **Menu** function key in the standby screen of the Telephone application.

2- Use the **◀** or **▶** arrow on the virtual keyboard to display the **Phone Book** screen.

3- Tap on the **Phone Book** screen.

4- Tap on **Store** in the displayed menu.

5- Tap on **Contacts names** in the displayed menu.

*An input screen is displayed. The **Aa** symbol is displayed in the top right corner. You are now in upper case mode*

6- Tap once on the **7FG** key.

*A capital "P" is displayed on the screen.*

7- Wait until the available characters disappear from the screen, then tap and hold down your stylus on **\*** until **aA** is displayed in the top right corner of the screen.

8- Tap once on the **2ABC** key to enter the character "a".

9- Tap twice on the **8TUV** key to enter the character "u".

10- Tap three times on the **5JKL** key to enter the character "l".

*The first name "Paul" is now displayed on the screen.*

To delete this name and return to the standby screen, tap and hold down your stylus on the **Delete** function key, then tap on the **✖** key on the virtual keyboard.

## **3- Network services**

Your operator may provide you with useful services and telephone numbers. These services and telephone numbers are stored on your SIM card and are added to the **Services** menu under the heading **Network services** (for further information, contact your operator).

You can access these services and telephone numbers in three different ways:

### **➤ SIM Toolbox:**

This method allows automatic access to the services offered by your network (and not associated with your Mondo). These services are dependent on the SIM card.

### **➤ Pre-programmed numbers (SDN) stored on the SIM card:**

Up to 32 pre-programmed numbers, which you cannot alter, can be stored on the SIM card.

### **➤ Information numbers:**

These can be selected from a menu, enabling you to call the information or network numbers which are available on your network.

**■ PLEASE NOTE:** Some operators are able to provide the two types of service described above on the same SIM card, in which case the **Network services** option appears under two headings: **Services** (or **Information**) and **Applications**.

## **4- Phone Books**

The SIM card and the Mondo incorporate an internal memory which is capable of storing names and telephone numbers.

The Mondo can store up to 100 profiles (referred to as "extended profiles").

These profiles can incorporate the following information:

- Surname.
- First name.
- Icon.
- Home telephone number.
- Business telephone number.
- Mobile telephone number.
- Notes.

Your Mondo can also display the numbers stored on your SIM card.

This can contain up to 255 memory locations (this capacity is dependent on the SIM card itself).

The memory locations on the SIM card contain the following information:

- Surname.
- Telephone number.

The SIM card is not able to store "extended profiles".

The Recall function is able to locate a telephone number in the phone book of the SIM card as well as in the phone book of your Mondo. The two phone books are interconnected.

### **• Storing names and telephone numbers in the phone books**

Names and telephone numbers can be stored directly in the phone books or they can be copied from other storage areas such as SMS messages, the notepad, the list of last-called numbers, etc.

It is recommended that the numbers should be stored in international format, using the prefix + followed by the country code and then the telephone number.

This allows you to dial the number either from your own country or from a foreign country.

There are several ways of storing the names and telephone numbers of your correspondents in your Mondo's phone book or in the SIM phone book (see below).

### **• To store names or telephone numbers in your Mondo's phone book.**

#### **A- Storing information via the standby screen of the Telephone application.**

- 1- Enter the number to be stored, using the number keys on the virtual keyboard.
- 2- Tap on the **Store** function key.
- 3- Tap on **Contacts names** in the list of options.  
*A list is displayed on the screen. It includes the options Home, Work and Cellular.*
- 4- Tap on the option corresponding to the type of number entered.

The following screens appear in succession:

➤ **Family Name** screen:

1- Enter the surname of your correspondent.

■ **PLEASE NOTE:** The procedure for entering characters on the screen is described on page 18.

2- Then tap on the **OK** function key.

➤ **First name** screen:

3- Enter the first name of your correspondent.

4- Then tap on the **OK** function key.

➤ **Icon** screen:

The icons are arranged in the same way as number keys **1<sub>MNC</sub>** to **6<sub>MNC</sub>** du clavier virtuel de votre Mondo.

5- Tap on the key on the virtual keyboard which is assigned to the icon of your choice.

➤ **Home number** screen:

6- If necessary, enter the home telephone number of your correspondent.

7- Then tap on the **OK** function key.

➤ **Work number** screen:

8- If necessary, enter the business telephone number of your correspondent.

9- Then tap on the **OK** function key.

➤ **Cellular number** screen:

10- If necessary, enter the mobile telephone number of your correspondent.

11- Then tap on the **OK** function key.

➤ **Note** screen:

12- If necessary, enter a comment.

*This comment will be stored in the profile of your correspondent, together with the other information relating to this correspondent.*

13- Then tap on the **OK** function key.

*A message is then briefly displayed to confirm that the information you have entered has been stored and to indicate the number of memory locations (profiles) still available in your phone book.*

To return to the standby screen, tap on the Exit function key or on the  key on the virtual keyboard.

## **B- Storing information via the main menu of the Telephone application.**

1- Tap on the **Menu** function key in the standby screen of the Telephone application.

2- Use the  or  arrow on the virtual keyboard to display the **Phone Book** screen.

3- Tap on the **Phone Book** screen.

4- Tap on **Store** in the displayed menu.

5- Tap on **Contacts Names** in the displayed menu.

The following screens are displayed in succession:

➤ **Family Name** screen:

1- Enter the surname of your correspondent.

**■ PLEASE NOTE:** If you make a mistake while entering the name and telephone number, tap on the **Clear** function key to delete the last character. Tap and hold down your stylus on the same key to delete the entire name or number you have entered.

For more information about entering text or numbers, refer to page 17.

2- Then tap on the **OK** function key.

➤ **First name** screen:

3- Enter the first name of your correspondent.

4- Then tap on the **OK** function key.

➤ **Icon** screen:

The icons are arranged in the same way as number keys **1** to **6** on the virtual keyboard of your Mondo.

5- Tap on the key on the virtual keyboard which is assigned to the icon of your choice.

The following screens are displayed in succession:

➤ **Home number** screen:

6- If necessary, enter the home telephone number of your correspondent.

7- Then tap on the **OK** function key.

➤ **Work number** screen:

8- If necessary, enter the business telephone number of your correspondent.

9- Then tap on the **OK** function key.

➤ **Cellular number** screen:

10- If necessary, enter the mobile telephone number of your correspondent.

11- Then tap on the **OK** function key.

➤ **Note** screen:

12- If necessary, enter a comment.

*This comment will be stored in the profile of your correspondent, together with the other information relating to this correspondent.*

13- Then tap on the **OK** function key.

*A message is then briefly displayed to confirm that the information you have entered has been stored and to indicate the number of memory locations (profiles) still available in your Mondo's phone book.*

To return to the standby screen, tap on the **Exit** function key or on the **□** key on the virtual keyboard.

## C- Storing information via other memory locations.

The numbers stored in the lists of last calls (outgoing, incoming or unanswered), in the notepad and in SMS messages can all be copied into the directory of your Mondo:

From one of the memory locations indicated above:

1- Display the number you wish to copy.

2- Tap on the **Options** function key.

3- Tap on **Store** in the list of options.

4- Tap on **Contacts names** in the displayed list of phone books.

*A list is displayed on the screen. It includes the options Home, Work and Cellular.*

- 5- Tap on the option corresponding to the type of number selected.
- 6- Tap on the **OK** function key to confirm the displayed information or to move to the next screen. You can also enter any missing information (first names, assigned icons, other telephone numbers, notes) then tap on the **OK** function key.  
*A message is then briefly displayed to confirm that the information displayed or that you have entered has been stored and to indicate the number of memory locations (profiles) still available in your Mondo's phone book.*

To return to the standby screen, tap on the **Exit** function key or on the  key on the virtual keyboard.

## • **To store names or numbers in your SIM card's phone book**

### **A- Storing information via the standby screen.**

- 1- Enter the number to be stored, using the number keys on the virtual keyboard.
- 2- Tap on the **Store** function key.
- 3- Tap on **SIM names** in the list of options.  
*The number you have entered is displayed on the screen.*
- 4- Tap on the **OK** function key to confirm the entered number.
- 5- Enter the name of your correspondent.

**■ PLEASE NOTE:** If you make a mistake while entering the name, tap on the **Clear** function key to delete the last character.

*To delete the entire name, tap and hold down your stylus on the **Clear** function key.*

*For more information about entering text or numbers, refer to page 17.*

- 6- Then tap on the **OK** function key.

*A message is then briefly displayed to confirm that the name and number you have entered have been stored and to indicate the number of memory locations (profiles) still available in your SIM card's phone book.*

To return to the standby screen, tap on the **Exit** function key or on the  key on the virtual keyboard.

### **B- Storing information via the main menu of the Telephone application.**

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the  or  arrow on the virtual keyboard to display the **Phone Book** screen.
- 3- Tap on the **Phone Book** screen.
- 4- Tap on **Store** in the displayed menu.
- 5- Tap on **SIM names** in the displayed menu.
- 6- Enter the number to be stored, using the number keys on the virtual keyboard.
- 7- Tap on the **OK** function key to confirm the entered number.
- 8- Enter the name of your correspondent.

**■ PLEASE NOTE:** If you make a mistake while entering the name, tap on the **Clear** function key to delete the last character.

*To delete the entire name, tap and hold down your stylus on the **Clear** function key.*

*For more information about entering text or numbers, refer to page 17.*

- 9- Then tap on the **OK** function key.

*A message is then briefly displayed to confirm that the name and number you have entered have been stored and to indicate the number of memory locations (profiles) still available in your SIM card's phone book.*

To return to the standby screen, tap on the Exit function key or on the ☰ key on the virtual keyboard.

## C- Storing information via other memory locations.

The numbers stored in the lists of last calls (outgoing, incoming or unanswered), in the notepad and in SMS messages can all be copied into your SIM card's phone book:

From one of the memory locations indicated above:

1- Display the number you wish to copy.

2- Tap on the **Options** function key.

3- Tap on **Store** in the list of options.

4- Tap on **SIM names** in the displayed list of phone books.

5- Enter a name and/or tap on the **OK** function key to confirm the displayed name.

■ **PLEASE NOTE:** If you make a mistake while entering the name, tap on the **Clear** function key to **delete** the last character.

*To delete the entire name, tap and hold down your stylus on the **Clear** function key.*

*For more information about entering text or numbers, refer to page 17.*

6- Tap on the **OK** function key to confirm the number.

*A message is then briefly displayed to confirm that the name and number you have entered have been stored and to indicate the number of memory locations (profiles) still available in your SIM card's phone book.*

To return to the standby screen, tap on the Exit function key or on the ☰ key on the virtual keyboard.

■ **PLEASE NOTE:** The characters \*, +, P (pause), # and \_ can be stored with numbers.

*If the phone book of the SIM card or of the telephone is full, a warning message is displayed on the screen when the phone book is selected.*

## • Memory locations available in the phone books

To find out how many unoccupied memory locations are still available in the phone book of your SIM card or of your Mondo:

1- Tap on the **Menu** function key in the standby screen of the Telephone application.

2- Use the ☲ or ☳ arrow on the virtual keyboard to display the Phone Book screen.

3- Tap on the **Phone Book** screen.

4- Tap on **Remaining** in the displayed menu.

5- Use the ☲ or ☳ arrow on the virtual keyboard to display the number of unoccupied memory locations available in the various directories of your Mondo and of the SIM card and, if applicable, the fixed numbers.

To return to the standby screen, tap on the Exit function key or on the ☰ key on the virtual keyboard.

## • **Displaying and dialling a stored number**

The numbers stored in the phone book of your Mondo or of the SIM card can be displayed on the screen in order to be amended or deleted, copied or transferred to another phone book or even dialled.

There are two ways of displaying on the screen the numbers stored in the phone books:

### - **Using the arrow on the virtual keyboard.**

- 1- Tap on the  arrow in the standby screen of the Telephone application.
- 2- Use the  or  arrow on the virtual keyboard to display the required name or number on the screen.

### - **Using the arrow or the Menu function key on the virtual keyboard:**

- 1- Tap on the  arrow or the **Menu** function key in the standby screen of the Telephone application.
- 2- Tap on the  or  arrow on the virtual keyboard to display the **Phone Book** screen.
- 3- Tap on the **Phone Book** screen.
- 4- Tap on **Recall** in the list of options.
- 5- Enter the first letters (not more than 3) of the name of your correspondent and/or tap on the **OK** function key.

**■ PLEASE NOTE:** If no initial is entered, the names stored in the phone book of your Mondo or of your SIM card will be displayed in succession on the screen, in alphabetical order (together with their associated numbers).

- Use the  or  arrow on the virtual keyboard to scroll through the phone book.
- To directly display a name of your choice, tap on the corresponding key on the virtual keyboard. For example, to directly display the name 'Nicholas', tap twice on the **6<sub>MONO</sub>** key (the letter 'N' is the second letter assigned to this button).

### - **To call the number displayed on the screen:**

Tap on the  key on the virtual keyboard or press the jog wheel on your Mondo.

### - **To amend, delete, copy or move the number displayed on the screen:**

- 1- Tap on the **Options** function key.

The menu which appears includes the following options:

Option	Function
Edit	To Edit the displayed name or number.
Delete	To delete the displayed name or number from the phone book in which it is stored.
Copy	To make a copy of the name or number displayed on the screen and to store this copy in another phone book. You can edit this name or number before you copy it.
Move	To move the name or number displayed on the screen from its existing memory location to another location. You can edit this name or number before you move it.
Call	To call the correspondent whose name or number is displayed on the screen.

2- Tap on the option of your choice.

To return to the standby screen, tap on the **Exit** function key or on the  key on the virtual keyboard.

## • **Displaying your own number**

Your Mondo can display its main mobile telephone number (Line 1), your Line 2 number (if you subscribe to this service) and your fax and data transfer. These numbers may be preset on the SIM card. If this is not the case, you can enter them manually and assign names to them. Line 1, for example, could be named 'Office', etc.

### - **To display, enter or amend your own numbers:**

1- Tap on the **Menu** function key in the standby screen of the Telephone application.

2- Use the  or  arrow on the virtual keyboard to display the **Phone Book** screen.

3- Tap on the **Phone Book** screen.

4- Tap on **Own numbers** in the list of options.

*If you have already stored your main mobile telephone number (Line 1), it is displayed on the screen.*

*If this is not the case:*

- Enter this number using the number keys on the virtual keyboard.
- Tap on the **OK** function key.
- Then enter your name (to find out how to enter text on the screen, refer to page 17)
- Tap again on the **OK** function key.

5- If necessary, use the  or  arrow on the virtual keyboard to display or enter your Line 2, fax and e-mail numbers.

### - **If you want to enter a number or a name, or edit the numbers or names displayed on the screen:**

6- Tap on the **Edit** function key.

7- Enter or amend the number of your choice, using the number keys on the virtual keyboard.

8- Tap on the **OK** function key.

9- Then enter or edit the associated name (to find out how to enter text on the screen, refer to page 14).

10- Tap again on the **OK** function key.

To return to the standby screen, tap on the **Exit** function key or on the  key on the virtual keyboard.

## • **Fixed dialling numbers (FDN)**

Fixed call is a function which limits the possibility of making calls to only the "fixed" or "prefixed" numbers stored in your SIM card (provided that it accepts this function).

When this function is activated, it is impossible to dial a number unless it appears in the list of fixed directory numbers.

The maximum number of fixed directory numbers you can store depends on the capacity of your SIM card.

Call forwarding and sending SMS messages to numbers which do not appear in the list is not permitted.

Activation of the fixed call function and entering numbers in the list of fixed dialling numbers is protected by the PIN2 code.

**- To activate or deactivate the Fixed Dialling Number function (FDN):**

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the or arrow on the virtual keyboard to display the **Phone Book** screen.
- 3- Tap on the **Phone Book** screen.
- 4- Use the or arrow on the virtual keyboard to access the second page of the displayed menu.
- 5- Tap on **Fixed Dialling Numbers**.
- 6- Tap on **Status**.
- 7- Tap on **On** or **Off**.
- 8- Using the number keys on the virtual keyboard, enter your **PIN2 number**.
- 9- Tap on the **OK** function key to validate your number and confirm your choice.

**- To display the list of fixed dialling numbers:**

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the or arrow on the virtual keyboard to display the **Phone Book** screen.
- 3- Tap on the **Phone Book** screen.
- 4- Use the or arrow on the virtual keyboard to access the second page of the displayed menu.
- 5- Tap on **Fixed Dialling Numbers**.
- 6- Tap on **View**.

7- Use the or arrow on the virtual keyboard to display all the numbers in the list.  
To modify or delete fixed dialled numbers or to copy a number from the list into your Mondo or your SIM card's phone book:

**From the list of fixed dialling numbers:**

- 1- Tap on the **Options** function key.

The menu which then appears includes the following options:

Option	Function
Edit	To edit the displayed name or number.
Delete	To erase the displayed name or number from the phone book in which it is stored.
Copy	To make a copy of the name or number displayed on the screen and to store the copy in another phone book. You can modify this name or number before it is copied.
Move	To move the name or number displayed on the screen from its current memory location to another location. You can modify this name or number before it is moved.
Call	To call the correspondent whose name or number is displayed on the screen.

- 2- Tap on the option of your choice.

**- To add a number to the list of fixed dialling numbers:**

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the or arrow on the virtual keyboard to display the **Phone Book** screen.
- 3- Tap on the **Phone Book** screen.
- 4- Use the or arrow on the virtual keyboard to access the second page of the displayed menu.
- 5- Tap on **Fixed Dialling Numbers**.
- 6- Tap on **Add New Number**.
- 7- Using the number keys on the virtual keyboard, enter your **PIN2** number.
- 8- Enter the telephone number you wish to add.

**■ PLEASE NOTE:** *Substitute characters may be used to enter fixed dialling numbers. For example, the number +33153342\_ \_9 can be used to call all telephone numbers between 0153342009 and 0153342999.*

## **5- Calls & Times**

Information relating to received and outgoing calls, the duration of the last call and the cumulative total of all the calls is stored by your Mondo in the **Calls & Times** menu.

### **• Calls log**

This log stores information (identity, time, date and duration of the call) relating to the last 10 dialled calls, the last 10 unanswered calls and the last 10 received calls.

The calls log is common to your primary line (Line 1) and your second line (Line 2).

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.

- 2- Use the or arrow on the virtual keyboard to display the **Calls & Times** screen.

- 3- Tap on the **Calls & Times** screen.

- 4- Tap on **Calls log**.

- 5- Tap on **Last dial, Unanswered or Received** in the displayed list.

- 6- Use the or arrow on the virtual keyboard to scroll through the calls.

The last call received or the last outgoing call is displayed at the top of the list. For unanswered calls and received calls, the number of the caller (if known) is displayed; otherwise, the message **Unknown number** is displayed on the screen.

**- To call the number displayed on the screen:**

- Tap on the key on the virtual keyboard or press the jog wheel of your Mondo.
- If necessary, tap on the **Options** function key to access the following menu:

Option	Function
Store	To store the displayed number in the phone book.
Delete	To delete the displayed number
Delete all	To delete all the numbers from the selected log ( <b>Last dial, Unanswered or Received</b> ).

<b>Edit</b>	To Edit the displayed number.
<b>Details</b>	To display details (the name, number, date and call duration, where applicable) relating to the displayed number.
<b>Call</b>	To call the displayed number. You can also tap on the  key on the virtual keyboard or press the jog wheel of your Mondo.

➤ Tap on the option of your choice, then follow the instructions on the screen.

To return to the standby screen, tap on the **Exit** function key or on the  key on the virtual keyboard.

■ **PLEASE NOTE:** *You can access the list of the last ten calls directly from the standby screen, by simply tapping on the **Off-hook**  key of the virtual keyboard or by pressing the jog wheel of your Mondo.*

## • Duration of calls

Your Mondo records the duration of the last call, the cumulative total of all the calls and the total duration of the calls for your primary line (Line 1) and your second line (Line 2).

The durations of incoming and outgoing calls via the subscriber network and via other (national and international) networks are displayed in the **Details** submenu.

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the  or  arrow on the virtual keyboard to display the **Calls & Times** screen.
- 3- Tap on the **Calls & Times** screen.
- 4- Tap on **Call timers**.

- 5- Tap on **Show**.

*If the call timers have been reset (refer to **Resetting the timers**, page 30), the date when the timers were last reset is briefly displayed on the screen.*

- 6- Use the  or  arrow on the virtual keyboard to display all the information recorded in the call timer.  
*The telephone displays the category of calls and the cumulative durations of the incoming and outgoing calls.*

### - To display details of calls in mobile mode, international calls, etc.:

➤ Tap on the **Details** function key.

To return to the standby screen, tap on the **Exit** function key or on the  key on the virtual keyboard.

■ **PLEASE NOTE:** *If you subscribe to a second line, the durations of your calls are displayed separately for your primary line (Line 1) and your second line (Line 2).*

## • Balance information (service provided on subscription)

This service is provided by some operators (on subscription only). It allows you to check your current balance. This information is supplied by the network.

For further information, consult your telephone operator.

**- To access balance information:**

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the or arrow on the virtual keyboard to display the **Calls & Times** screen.
- 3- Tap on the **Calls & Times** screen.
- 4- Tap on **Call timers**.
- 5- Tap on **Balance information**.

If the number of the Information Centre has already been stored in your Mondo:

- 6- Tap on **Call**.

If the number of the Information Centre has already been stored in your Mondo:

- 7- Tap on **Set Number**.

- 8- Using the number keys on the virtual keyboard, enter the number of the Information Centre.

- 9- Tap on the **OK** function key if you only want to store the number of the Information Centre or on the key on the virtual keyboard if you want to store this number and immediately call the Information Centre.

At the end of the call, tap on the key on the virtual keyboard or press the jog wheel on your Mondo.

**• Review - call duration**

When the Review Duration function is activated, your Mondo emits an audible signal to notify you of the duration of the call in progress.

This function can be programmed to emit an audible signal at intervals in multiples of one minute (from 1 to 59 minutes).

**- To activate or deactivate the Review Duration function:**

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the or arrow on the virtual keyboard to display the **Calls & Times** screen.
- 3- Tap on the **Calls & Times** screen.
- 4- Tap on **Call timers**.
- 5- Tap on **Review Duration**.
- 6- Tap on **On** or on **Off**.
- 7- If you have tapped on **On**, select the duration of the interval (between 1 and 59 minutes).
- 8- Tap on the **OK** function key to confirm your choice.

To return to the standby screen, tap on the **Exit** function key or on the key on the virtual keyboard.

**• Resetting the timers**

To do this, you require the security code for your Mondo.

**- To reset all your call timers:**

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.

- 2- Use the  or the  key on the virtual keyboard to bring up the Calls & Times screen.
- 3- Tap on the **Calls & Times** screen.
- 4- Tap on **Call timers** register.
- 5- Tap on **Reset**.
- 6- Tap on **Yes** to reset all your counters (or on **No** to cancel and return to the preceding screen).
- 7- If you have tapped on **Yes**, enter the locking code of your Mondo using the number keys on the virtual keyboard.
- 8- Tap on the **OK** function key.

*A message will be displayed on the screen to confirm that all your counters have been reset.*

To return to the standby screen, tap on the **Exit** function key or on the  key on the virtual keyboard.

## • **Management of the cost of calls (a subscription service)**

Some operators offer (on subscription) an account consultation service which enables you to find out the cost of the last call made, the total cost of all your calls and the remaining amount (in various currencies) of any "credit limit" set by the user.

To display this information in currencies, you must first of all indicate the currency used and the cost per unit. If you do not, the data will be expressed by default in units.

### - **If you wish the cost of calls to be expressed in various currencies:**

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the  or the  key on the virtual keyboard to bring up the Calls & Times screen.
- 3- Tap on the **Calls & Times** screen.
- 4- Tap on **Cost of calls**.
- 5- Tap on **Cost in ....**
- 6- Tap on **Currency**.  
*The currency currently programmed will be displayed.*
- 7- Tap on the **Edit** function key.
- 8- Enter your **PIN2 number**.
- 9- Tap on the **OK** function key to validate your number.
- 10- Enter the abbreviation for the currency.
- 11- Tap on the **OK** function key to validate your choice.
- 12- Enter the cost per unit in the currency selected.
- 13- Tap on the **OK** function key to validate the cost.

*A message will be displayed on the screen to confirm your selection.*

*The information on the cost of calls will be expressed in the currency.*

To return to the standby screen, tap on the **Exit** function key or on the  key on the virtual keyboard.

### - **If you wish the cost of calls to be expressed in units:**

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the  or the  key on the virtual keyboard to bring up the Calls & Times screen.

3- Tap on the **Calls & Times** screen.

4- Tap on **Cost of calls**.

5- Tap on **Cost in ....**

6- Tap on **Units**.

To return to the standby screen, tap on the **Exit** function key or on the  key of the virtual keyboard.

**■ PLEASE NOTE:** *If the costs are expressed in units, the credit limit and remaining amount are also displayed in units.*

## • **Setting the credit limit (in units or currency)**

Once you have specified the currency and the cost per unit, you may define a credit limit in units or in the currency of your choice (if you have subscribed to this service).

When your credit limit has been reached, your Mondo will not be able to make or receive calls for which a charge is made.

**■ PLEASE NOTE:** *It is always possible to call the emergency numbers.*

1- Tap on the **Menu** function key in the standby screen of the Telephone application.

2- Use the  or the  key on the virtual keyboard to bring up the **Calls & Times** screen.

3- Tap on the **Calls & Times** screen.

4- Tap on **Cost of calls**.

5- Tap on **Credit limit**.

*If a credit limit has previously been registered it will be displayed on the screen. If not, a **No limit** message will appear.*

6- Tap on the **Edit** function key.

7- Enter your **PIN2 number**.

8- Tap on the **OK** function key to validate your number.

9- Enter your credit limit (using the  key on the virtual keyboard to enter a decimal point).

10- Tap on the **OK** function key to validate your choice.

To return to the standby screen, tap on the **Exit** function key or on the  key on the virtual keyboard.

## • **Consulting costs**

1- Tap on the **Menu** function key in the standby screen of the Telephone application.

2- Use the  or the  key on the virtual keyboard to bring up the **Calls & Times** screen.

3- Tap on the **Calls & Times** screen.

4- Tap on **Cost of calls**.

5- Tap on **Consult**.

6- Use the  or the  key on the virtual keyboard to display the cost of the **last call** (page 1), the cost of **all calls** (page 2) and the **credit remaining** (page 3).

**■ PLEASE NOTE:** *The costs are expressed in units or currency, depending on the choice you made in the **Costs in.... menu** described above.*

To return to the standby screen, tap on the **Exit** function key or on the  key on the virtual keyboard.

## • Resetting all the cost indicators

To reset all the cost indicators of your calls:

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the  or the  key on the virtual keyboard to bring up the **Calls & Times** screen.
- 3- Tap on the **Calls & Times** screen.
- 4- Tap on **Cost of calls**.
- 5- Tap on **Reset**.
- 6- Tap on **Yes** to reset all your counters (or on **No** to cancel and return to the preceding screen).
- 7- If you have tapped on **Yes**, enter your **PIN2 number** using the number keys on the virtual keyboard.
- 8- Tap on the **OK** function key.

*A message will be displayed on the screen to confirm that all the cost indicators of your calls have been reset.*

To return to the standby screen, tap on the **Exit** function key or on the  key on the virtual keyboard.

## • Second line service - selecting line 2 (a subscription service)

Some GSM 1800 operators offer the use of a second line to their users.

This service is generally provided on subscription. It enables personal and business calls made and received to be kept separate.

The second line has its own mobile telephone number.

### - To select the line on which you wish to call a correspondent (outgoing calls):

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
  - 2- Use the  or the  key on the virtual keyboard to bring up the **Calls & Times** screen.
  - 3- Tap on the **Calls & Times** screen.
  - 4- Tap on **Line selection**.
- The line currently selected will be displayed on the screen.*
- 5- Use the  or the  key on the virtual keyboard, if necessary, to display the line required on the screen.
  - 6- Tap on the **Store** function key.

#### ■ PLEASE NOTE:

- You may allocate names to your main line (line 1) as well as to your second line (line 2). For example: "Office" and "Private". For more information, please refer to the section describing the **Own numbers** menu on page 25.
- You may receive calls on either or other line at all times, no matter which line is selected for outgoing calls.

To return to the standby screen, tap on the **Exit** function key or on the  key on the virtual keyboard.

## **6- Settings and customization of your Mondo**

### **• Locking the soft keyboard of the telephone application**

The soft keyboard of the Telephone application may be locked (when you are not using it), in order to prevent any inadvertent operation.

For example, this would prevent any accidental calls being made when your Mondo is carried in a handbag or pocket.

The locking remains activated as long as the Telephone application is not closed. However, when a call is received, the keyboard is temporarily unlocked to allow you to take it. After the call, locking is automatically re-established.

When the keyboard of the Telephone application is locked, a specific symbol appears on the screen. If you tap on any key on the soft keyboard, the message **# tap and hold to unlock** is temporarily displayed.

#### **- You can lock the keyboard to the Telephone application in two different ways:**

- From the standby screen of the Telephone application:

- 1- Tap and hold your stylus on the **#** key.

*The confirmation message **Keyboard locked** is temporarily displayed then a specific symbol appears on the screen.*

- From the "Settings" menu of the Telephone application:

- 1- Tap on the **Menu** function key, in the standby screen of the Telephone application.

- 2- Use the  or  key on the soft keyboard to bring up the **Settings** screen.

- 3- Tap on the **Settings** screen.

- 4- Tap on **Telephone settings**.

- 5- Tap on **Lock keyboard**.

*The confirmation message **Keyboard locked** is temporarily displayed then a specific symbol appears on the screen.*

#### **- To unlock the keyboard, proceed as follows:**

- 1- Tap and hold your stylus on the **#** key in the standby screen of the Telephone application.

*The confirmation message **Keyboard unlocked** is temporarily displayed on the screen of your Mondo.*

### **• Alert tones**

When you receive a call, your Mondo may warn you of this in several different ways, depending on the type of alert tone you have programmed:

➤ **Ring:** Your Mondo emits an audible tone when a call is received.

➤ **Silent:** Your Mondo remains silent.

**■ PLEASE NOTE:** When this alert mode is selected, the signals emitted by your Mondo when you tap on the buttons on the virtual keyboard are also muted.

➤ **Vibrate:** Your Mondo vibrates but does not emit an audible tone.

➤ **Vibrate and ring:** Your Mondo vibrates and simultaneously emits an audible tone.

➤ **Vibrate then ring:** Your Mondo vibrates, then emits an audible tone after a few seconds if you have not answered the call.

➤ **Ramping:** If ramping is in operation, your Mondo emits a quiet audible tone when the call is received; the tone becomes increasingly loud until you answer the call.

## • To select an alert tone

- 1- Tap on the Menu function key in the standby screen of the Telephone application.
  - 2- Use the or the key on the virtual keyboard to bring up the **Settings** screen.
  - 3- Tap on the **Settings** screen.
  - 4- Tap on **Phone Settings**.
  - 5- Tap on **Tones Settings**.
  - 6- Tap on **Alert tones**.  
*The Alert tones screen will be displayed. The list of alert tones is proposed with the exception of Ramping tone (to activate or de-activate this type of alert tone, see below).*
  - 7- Tap on the alert tone selected.
    - If you select the **Ring** mode, and if you have previously set the volume of ring tone to **0**, the warning message **Warning, Ring volume off !** will be displayed on the screen.
    - If you select the **Silent** alert tone, the symbol will appear on the standby screen of the Telephone application.
- PLEASE NOTE:** *The selection of the **Silent** alert mode will not be retained when the Telephone application is closed. The **Ring** mode will automatically be reinstated when you relaunch the Telephone application.*
- If you select one of the **Vibrate**, **Vibrate and ring** or **Vibrate then ring** modes, the symbol will be displayed on the standby screen of the Telephone application.

To return to the standby screen, tap on the **Exit** function key or on the key on the virtual keyboard.

## • Activating/de-activating of the Ramping ring tone

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the or the key on the virtual keyboard to bring up the **Settings** screen.
- 3- Tap on the **Settings** screen.
- 4- Tap on **Phone Settings**.
- 5- Tap on **Tones Settings**.
- 6- Tap on **Volume**.
- 7- Tap on **Increasing volume**.  
*The Increasing Ring tone screen will appear.*

To return to the standby screen, tap on the **Exit** function key or on the key on the virtual keyboard.

## • Adjusting the volume

**■ PLEASE NOTE:** *The volume of the ringing, the sounds of the keys and the reception (conversation) and alarm (wake up and discharged battery) signals can be set individually from the main menu of the Telephone application, as indicated below. There are also other methods.*

*These settings may also be carried out from the Volumes control screen which is directly accessible by tapping on the key on the standby screen of the Telephone application.*

*Setting the volume of reception may be carried out more quickly (during a call), using the jog wheel of your Mondo. For further details on these shortcuts, please refer to the section on **Basic operations** in this manual.*

**- To set the audio volume from the main menu:**

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
  - 2- Use the or the key on the virtual keyboard to bring up the **Settings** screen.
  - 3- Tap on the **Settings** screen.
  - 4- Tap on **Phone Settings**.
  - 5- Tap on **Tones Settings**.
  - 6- Tap on **Volume**
  - 7- Tap on the item which corresponds to the type of setting required. You can choose between **Ring**, **Ramping volume**, **Keys**, **Conversation**, or **Alarm**.  
*The volume setting screen will be displayed as well as the type of setting selected.*
  - 8- Tap as many times as necessary on the or the key on the virtual keyboard to increase or decrease the volume.
  - 9- Tap on the **OK** function key to record your setting.
- To return to the standby screen, tap on the **Exit** function key or on the key on the virtual keyboard.

**• Choosing melodies for the call tone and the wake up alarm**

You can select melodies for your call tone (or alarm) from a list of 20 melodies stored in the memory of your Mondo.

You can also allocate different tunes to incoming calls (depending on the type of calls) and to the wake up alarm to help you distinguish them.

**- To select a melody:**

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the or the key on the virtual keyboard to bring up the **Settings** screen.
- 3- Tap on the **Settings** screen.
- 4- Tap on **Phone Settings**.
- 5- Tap on **Tones Settings**.
- 6- Tap on **Melodies**.

A menu will be displayed to enable you to select the type of call (or alarm) whose melody you wish to change. It includes the following options:

Option	Function
Standard/Line 1	To change the melody for incoming calls on your main line.
Wake up	To change melody for the wake up alarm.
Phone names	To change the melody for incoming calls from numbers recorded in your Mondo's phone book.
SIM repertory	To change melody for incoming calls from numbers recorded in your SIM card's phone book.
Line 2	To change the melody for incoming calls on your second line.

7- Tap on the option of your choice.

*The list of melodies available will be displayed on the screen.*

8- To listen to a melody, just tap once on its name to select it then wait 2 to 3 seconds.

9- If you like the melody you have been listening to, tap once more on its name to validate your choice.

To return to the standby screen, tap on the **Exit** function key or on the  key on the virtual keyboard.

**■ PLEASE NOTE:** *You can record your own melodies. To do this, use your pocket PC's record function (see Windows-CE manual).*

## • **Customizing the graphics for the Telephone application**

You can customize your Mondo by selecting new graphics for the Telephone application.

**■ PLEASE NOTE:** *The graphics for the Telephone application will be altered immediately when you validate your choice.*

### - **To alter the graphics for the Telephone application:**

1- Tap on the **Menu** function key in the standby screen of the Telephone application.

2- Use the  or the  key on the virtual keyboard to bring up the **Settings** screen.

3- Tap on the **Settings** screen.

4- Tap on **Phone Settings**.

5- Use the  key on the virtual keyboard to go to the next page of the Phone Settings options.

6- Tap on the **Menu graphics**.

7- Tap on the graphics of your choice.

To return to the standby screen, tap on the **Exit** function key or on the  key on the virtual keyboard.

## • **Answer using any key**

This function enables you to answer an incoming call received by tapping on any key of the virtual keyboard (except for the  key and the **Mute** function key).

1- Tap on the **Menu** function key in the standby screen of the Telephone application.

2- Use the  or the  key on the virtual keyboard to bring up the **Settings** screen.

3- Tap on the **Settings** screen.

4- Tap on **Phone Settings**.

5- Use the  key on the virtual keyboard to go to the next page of the Phone Settings options.

6- Tap on **Function Keys**.

7- Tap on **Any key answer**.

8- Tap on **On or Off**.

To return to the standby screen, tap on the **Exit** function key or on the  key on the virtual keyboard.

## • Speed dialling

The numbers recorded in the directory of your Mondo or your SIM card may be associated with the **2** to **9** number keys on the soft keyboard (see below).

By default, the **1** number key on the soft keyboard is always allocated to the number of your voice message service.

To call a correspondent, you then need only tap and hold your stylus on the number key allocated to him.

If there is just one number in memory for this correspondent (which is the case for all the numbers recorded in the directory of your SIM card), this number is immediately displayed on the screen.

If several telephone numbers have been recorded for this correspondent (which may be the case for numbers recorded in the directory of your Mondo), the list of numbers for this correspondent is displayed and you have to select the number you want.

By default, key **1** is always allocated to your voice mail centre. This operation is carried out automatically when the number of your voice mail centre is recorded (for further details, see page 44).

### - To allocate telephone numbers to the number keys of the virtual keyboard:

1- Tap on the **Menu** function key in the standby screen of the Telephone application.

2- Use the **◆** or the **◆** key on the virtual keyboard to bring up the **Settings** screen.

3- Tap on the **Settings** screen.

4- Tap on **Phone Settings**.

5- Use the **◆** key on the virtual keyboard to go to the next page of the Phone Settings options.

6- Tap on **Function Keys**.

7- Tap on **Speed dial**.

*The screen displayed informs you that Key 1 of the virtual keyboard has been allocated to the number of your voice mail centre (Voice Mail service). If the number of your voice message centre is recorded in your phone book you cannot amend this setting.*

8- Use the **◆** key on the virtual keyboard to go to the next page.

*The program screen for Key 2 will appear.*

9- If you wish to allocate a telephone number to **Key 2** (or amend the number currently allocated to it) tap on the **Names** function key to access your directory.

10- Use the **◆** or the **◆** key on the virtual keyboard to select a name or telephone number in your directory.

11- Tap on the **Select** function key.

*You will return to the program screen for Key 2. The name or telephone number selected will appear on the screen.*

12- Use the **◆** key on the virtual keyboard to go to the program screen for **Key 3**, and so on.

**■ PLEASE NOTE:** When a number allocated to a speed dialling key is deleted from the directory, the corresponding key is no longer allocated to any number. You may reprogram it if you wish by following the instructions above.

To return to the standby screen, tap on the **Exit** function key or on the **◆** key on the virtual keyboard.

**- To call a correspondent using speed dialling:**

- Example 1: There is only one telephone number in memory for this correspondent.
  - 1- In the standby screen of the Telephone application, tap and hold your stylus on the number key allocated to this correspondent.  
*Your correspondent's number is displayed on the screen.*
  - 2- Tap on the  key on the soft keyboard or press on the jog wheel of your Mondo.  
*The number displayed is immediately dialled.*
- Example 2: There are several telephone numbers in memory for this correspondent.
  - 1- In the standby screen of the Telephone application, tap and hold your stylus on the number key allocated to this correspondent.  
*The list of numbers for this correspondent appears on the screen.*
  - 2- Tap on the number you have selected.  
*The number selected is immediately dialled.*

**• Auto-answer**

This function is only available if your Mondo is connected to a hands free kit or headphones.

When this function is activated, you do not need to tap on the  key of the virtual keyboard to reply to an incoming call. Your Mondo automatically connects after about five seconds.

**- To activate or de-activate the Auto-answer function:**

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the  or the  key on the virtual keyboard to bring up the **Settings** screen.
- 3- Tap on the **Settings** screen.
- 4- Tap on **Phone Settings**.
- 5- Use the  key on the virtual keyboard to go to the next page of the Phone Settings options.
- 6- Tap on **Auto features**.
- 7- Tap on **Auto answer**.
- 8- Tap on **On** or **Off**.

To return to the standby screen, tap on the **Exit** function key or on the  key of the soft keyboard.

**• Auto-retry**

When you make a call which does not get through because the number is engaged or the network unavailable, this function instructs your Mondo to redial the number called automatically. In this case, your Mondo will try 10 times and then stop.

**- To activate or de-activate the Auto-retry function:**

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the  or the  key on the virtual keyboard to bring up the **Settings** screen.

- 3- Tap on the **Settings** screen.
- 4- Tap on **Phone Settings**.
- 5- Use the key on the virtual keyboard to go to the next page of the Phone Settings options.
- 6- Tap on **Auto features**.
- 7- Tap on **Auto-retry**.
- 8- Tap on **On or Off**.

To return to the standby screen, tap on the **Exit** function key or on the of the virtual keyboard.

**PLEASE NOTE:** When this function is activated, the Auto-retry message will appear together with a countdown. After each attempt to call back the telephone emits a retry tone.

If the retry is successful, the communication continues normally.

You may at any time cancel the auto-retry by tapping on the **Exit** function key or on any other key of the virtual keyboard.

## • Restoring of the factory settings

**PLEASE NOTE:** This operation has no effect on the contents of the phone book nor on the security codes.

When you use your Mondo for the first time, its settings are as follows:

Function	Factory Settings
Tone	Ring
Melody	Trium
Volumes (Ring, Keys, Conversation and Alarm)	Medium values
Any key answer	Off
Auto-retry	Off
Auto answer	Off
Ramping volume	Off
Graphics	Trium

### - Restore your Mondo's default settings:

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the or the key on the virtual keyboard to bring up the **Settings** screen.
- 3- Tap on the **Settings** screen.
- 4- Tap on **Phone Settings**.
- 5- Tap on the key on the virtual keyboard to go quickly to the third page of the Phone Settings options.
- 6- Tap on **Default settings**.
- 7- Tap on **Yes** to restore the default settings, or on **No** to cancel.

To return to the standby screen, tap on the **Exit** function key or on the key on the virtual keyboard.

## 7- Security features

The security features described in this section protect your Mondo from any unauthorised use.

When you are asked to do so:

1- Enter the code requested.

*The code entered will be displayed on the screen in the form of asterisks “\*”.*

2- Then tap on the **OK** function key.

Should an error be made when entering data:

- Tap on the **Clear** function key to delete the last character entered (shown as an asterisk).
- Tap and keep your stylus pressed on the Clear function key to delete all of the characters entered (shown as asterisks).

**⚠ WARNING:** *Never use security codes similar to emergency numbers (112, for example). You will thus avoid accidentally calling to one of these numbers.*

KEEP YOUR CODES IN A SAFE PLACE.  
LOSING YOUR CODES MAY CAUSE YOU SEVERE PREJUDICE.

### • The locking code

A locking code is allocated to your Mondo for security reasons. This code protects your Mondo in general and your WAP™ parameters from any unauthorised access.

The factory setting is **0000**. We recommend that you amend this code and keep your new code in a safe place separately from your Mondo.

The locking code of your Mondo is also required for resetting your call timers.

If it is activated, the locking code is requested each time you wish to open the Telephone application.

#### - To amend the locking code:

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the or the key on the virtual keyboard to bring up the **Settings** screen.
- 3- Tap on the **Settings** screen.
- 4- Tap on **Phone Settings**.
- 5- Use the key on the virtual keyboard to go to the next page of the Phone Settings options.
- 6- Tap on **Security functions**.
- 7- Tap on **Phone lock code**.
- 8- Tap on **Change code**.
- 9- Enter your old locking code.
- 10- Tap on the **OK** function key.
- 11- Enter your new locking code.

**⚠ WARNING:** *Never use security codes similar to emergency numbers (112, for example). You will thus avoid accidentally calling to one of these numbers.*

- 12- Tap on the **OK** function key.

- 13- Enter your new locking code again.

- 14- Tap on the **OK** function key.

To return to the standby screen, tap on the **Exit** function key or on the key on the virtual keyboard.

- **To activate or de-activate the locking code**

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the or the key on the virtual keyboard to bring up the **Settings** screen.
- 3- Tap on the **Settings** screen.
- 4- Tap on **Phone Settings**.
- 5- Use the key on the virtual keyboard to go to the next page of the Phone Settings options.
- 6- Tap on **Security**.
- 7- Tap on **Phone lock code**.
- 8- Tap on **On** or **Off**.
- 9- If you have chosen to amend the status, enter your locking code to effect this modification.
- 10- Then tap on the **OK** function key.

To return to the standby screen, tap on the **Exit** function key or on the key on the virtual keyboard.

**■ PLEASE NOTE:** When this feature is activated, it is always possible to dial the emergency numbers without having to enter the locking code.

- **The PIN number**

Your SIM card includes a **PIN** number of 4 to 8 digits which protects it from any unauthorised use.

When this protection is activated, the **PIN** number must be entered each time you wish to open the Telephone application on your Mondo.

If an error is made three times in a row when entering the **PIN** number, your SIM card is blocked and you will have to enter the 8 digit **PUK** number supplied by your operator (see page 43).

- **To activate or de-activate protection by PIN number:**

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the or the key on the virtual keyboard to bring up the **Settings** screen.
- 3- Tap on the **Settings** screen.
- 4- Tap on **Phone Settings**.
- 5- Use the key on the virtual keyboard to go to the next page of the Phone Settings options.
- 6- Tap on **Security**.
  - If the protection by PIN number is currently de-activated, the option **PIN enable** will appear at the top of the list displayed.
  - If protection by PIN number is currently activated, the option **PIN disable** will appear at the top of the list displayed.
- 7- If you wish to amend the status of the current protection, tap on **PIN enable** or **PIN disable** (otherwise, tap on the **Exit** function key).
- 8- Enter your **PIN** number in order to effect this modification.
- 9- Then tap on the **OK** function key.

*The message **PIN enabled** or **PIN disabled** will appear briefly on the screen.*

To return to the standby screen, tap on the **Exit** function key or on the  key on the virtual keyboard.

- **To change your PIN number:**

**■ PLEASE NOTE:** *To be able to change the **PIN** number, you must have enabled the protection by PIN number beforehand (see above).*

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the  or the  key on the virtual keyboard to bring up the **Settings** screen.
- 3- Tap on the **Settings** screen.
- 4- Tap on **Phone Settings**.
- 5- Use the  key on the virtual keyboard to go to the next page of the Phone Settings options.
- 6- Tap on **Security**.
- 7- Tap on **PIN change number**.
- 8- Enter your old PIN number.
- 9- Tap on the **OK** function key.
- 10- Enter your new PIN number.

**△ WARNING:** *Never use security codes similar to emergency numbers (112, for example). You will thus avoid accidentally calling to one of these numbers.*

- 11- Tap on the **OK** function key.
- 12- Enter your new PIN number again.
- 13- Tap on the **OK** function key.

*A message will appear briefly on the screen to confirm the modification of your PIN number.*

To return to the standby screen, tap on the **Exit** function key or on the  key on the virtual keyboard.

• **The PIN2 number**

The PIN2 number controls access to certain functions of your telephone such as the activation or de-activation of the Fixed Dialling Numbers (FDN), modifications to the directory of fixed numbers, the resetting of the costs of calls or modification of the parameters for displaying costs.

**■ PLEASE NOTE:** *The PIN2 number may be amended, but it is impossible to de-activate it.*

- **To amend the PIN2 number:**

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the  or the  key on the virtual keyboard to bring up the **Settings** screen.
- 3- Tap on the **Settings** screen.
- 4- Tap on **Phone Settings**.
- 5- Use the  key on the virtual keyboard to go to the next page of the Phone Settings options.
- 6- Tap on **Security**.
- 7- Tap on **PIN2 change number**.
- 8- Enter your old PIN2 number.

- 9- Tap on the **OK** function key.
- 10- Enter your new PIN2 number.
  - ⚠ *WARNING: Never use security codes similar to emergency numbers (112, for example). You will thus avoid accidentally calling to one of these numbers.*
- 11- Tap on the **OK** function key.
- 12- Enter your new PIN2 number again.
- 13- Tap on the **OK** function key.
  - A message will appear briefly on the screen to confirm the modification of your PIN2 number.*

To return to the standby screen, tap on the **Exit** function key or on the  key on the virtual keyboard.

## • The PUK number

The PUK (PIN Unblock Key) number is an 8 digit number supplied by your operator. It allows you to unblock your SIM card following three inaccurate entries of your PIN number.

■ **PLEASE NOTE:** *The PUK number cannot be amended.*

When you are asked to do so:

- 1- Enter the PUK number requested.
- 2- Tap on the **OK** function key.

Then follow the instructions on the screen to reinitialise the PIN number.

⚠ *WARNING: If you enter a PUK number wrongly ten successive times, your SIM card will no longer be usable. Please contact your operator to obtain a new card.*

## • The PUK2 number

The PUK2 (PIN Unblock Key 2) number is an eight digit number supplied by your operator. It allows you to unblock your SIM card following three inaccurate entries of your PIN2 number.

■ **PLEASE NOTE:** *The PUK2 number cannot be amended.*

When you are asked to do so:

- 1- Enter the PUK2 number requested.
- 2- Tap on the **OK** function key.

Then follow the instructions on the screen to reinitialise the PIN2 number.

⚠ *WARNING: If you enter a PUK2 number wrongly ten successive times, your SIM card will no longer be usable. Please contact your operator to obtain a new card.*

## • The call barring password

The call barring password is used to select the levels of call barring described in the **GSM Services – Call barring** menu (see page 53).

It is supplied by your operator.

### - To amend this password:

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.

- 2- Use the  or the  key on the virtual keyboard to bring up the **Settings** screen.
- 3- Tap on the **Settings** screen.
- 4- Tap on GSM Services.
- 5- Use the  key on the virtual keyboard to go to the next page of the GSM Services options.
- 6- Tap on **Call barring**.
- 7- Tap on **Change password**.
- 8- Enter your old password.
- 9- Tap on the **OK** function key.
- 10- Enter your new password.
- 11- Tap on the **OK** function key.
- 12- Enter your new password again.
- 13- Tap on the **OK** function key.

To return to the standby screen, tap on the **Exit** function key or on the  key on the virtual keyboard.

#### **- Summary table of codes and passwords:**

<i>Code/Password</i>	<i>Length</i>	<i>Number of attempts allowed</i>	<i>If blocked or lost</i>
<i>Locking code</i>	4 digits	Unlimited	Return the telephone to the manufacturer.
<i>PIN</i>	4-8 digits	3 attempts	Unblocked using the PUK number.
<i>PIN2</i>	4-8 digits	3 attempts	Unblocked using the PUK2 number.
<i>PUK</i>	8 digits	10 attempts	Contact your operator
<i>PUK2</i>	8 digits	10 attempts	Contact your operator
<i>Call barring password</i>	4 digits	Determined by the network	Contact your operator

## **8- Voice Mail service**

Your operator may provide a voice mail service which operates as an answering service. Contact your operator for further information.

### **• Recording the number of your voice mail centre**

If the number of the voice mail centre is not automatically recorded on your SIM card, it must be recorded manually:

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the  or the  key on the virtual keyboard to bring up the **Settings** screen.
- 3- Tap on the **Settings** screen.
- 4- Tap on **Voice Mail Service**.

## 5- Tap on Number.

The screen for entering the number of your voice message service will appear.

## 6- Enter the number of your voice mail centre.

■ PLEASE NOTE: If this number is recorded in your directory, you can also tap on the **Names** function key, then select it in your directory.

## 7- Tap on the OK function key to validate the number displayed.

To return to the standby screen, tap on the **Exit** function key or on the  key on the virtual keyboard.

■ PLEASE NOTE: If you have subscribed to the Second line service (Line 2), the number of your voice mail centre must be recorded separately for the second line.

To enable you to have rapid access to your voice mail, the number of your voice mail centre is automatically allocated to Key  on the virtual keyboard of the Telephone application.

## • Activating/de-activating of the message alarm

When the mail alert is activated, your Mondo emits a tone to warn you of the reception of a new message by your voice mail service.

### - To activate or de-activate the mail alert:

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the  or the  key on the virtual keyboard to bring up the **Settings** screen.
- 3- Tap on the **Settings** screen.
- 4- Tap on **Voice Mail Service**.
- 5- Tap on **Audio Alert**.
- 6- Tap on **On** or **Off**.

To return to the standby screen, tap on the **Exit** function key or on the  key on the virtual keyboard.

## • Calling your voice mail centre to consult messages

Two methods may be used:

When a message is received by your voice mail service, you may dial the number of your voice mail centre directly:

➤ Tap and keep your stylus pressed on key .

The other method is as follows:

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the  or the  key on the virtual keyboard to bring up the **Settings** screen.
- 3- Tap on the **Settings** screen.
- 4- Tap on **Voice Mail Service**.
- 5- Tap on **Call**.

Your Mondo will immediately dial the number of your voice message centre.

■ PLEASE NOTE: If you tap on the **Call** function key and if the number of your voice mail centre has not yet been recorded in your directory, you will be asked to enter this number. In this case, proceed as directed in the section entitled "Recording the number of your voice mail centre", page 44.

## 9- GSM Services

### • Call diverting (a network service)

Call diversion is a service allowing calls received, whether they are voice messages, faxes or data transfers, to be diverted to another number.

#### - To programme and activate the call diverting service:

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the or the key on the virtual keyboard to bring up the **Settings** screen.
- 3- Tap on the **Settings** screen.
- 4- Tap on **GSM Services**.
- 5- Tap on Call diverting.

The menu displayed on the screen includes the following options:

Call diverting	Function
Always	Diverts all voice messages without exception.
If outside the network	Diverts all voice messages when your Mondo cannot be contacted.
If no reply	Diverts all voice messages which remain unanswered by you.
If Busy	Diverts all voice messages when you are on another call (when your Mondo is busy).
All Conditions	Diverts all voice messages when the Telephone application is closed, when you do not reply or when you are already on another call.
Cancel all	Allows you to cancel the diversion of all calls for voice messages, data calls and fax calls.
All FAX calls	Diverts all fax calls without exception.
All DATA calls	Diverts all data calls without exception.

- 6- Tap on the option of your choice.

**PLEASE NOTE:** the list of options comprises two pages. If necessary, use the or the key of the virtual keyboard to go from one page to another.

- 7- Tap on **Activate**.
- 8- You will then be asked to select the number to which you want calls to be diverted (unless you have tapped on **Cancel all**).
  - Tap on **Voice Mail service** to divert calls to your voice mail centre.
  - Tap on **Names** to select a diversion number from your phone book.
  - Tap on **Number** to enter a forwarding number on the screen.
- 9- A message will be displayed on the screen to confirm the diversion of calls to the number selected.

To return to the standby screen, tap on the **Exit** function key or on the key on the virtual keyboard.

**■ PLEASE NOTE:**

- If you choose the option **If no reply**, you will be asked to enter a time after which calls will be diverted of **5, 15 or 30** seconds.
- If you have subscribed to the **Second line** (Line 2) service, the call diversion service must be configured separately for line 1 and line 2. When the call diversion service is programmed, the diversion only covers the line being used. To programme the diversion of calls received on the other line, you have to select this line first of all (for further details, see page 46).

**- To de-activate call diversion or view the number to which calls are to be diverted:**

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the or the key on the virtual keyboard to bring up the **Settings** screen.
- 3- Tap on the **Settings** screen.
- 4- Tap on **GSM Services**.
- 5- Tap on **Call diverting**.
- 6- Tap on the option of your choice.

**■ PLEASE NOTE:** *the list of options comprises two pages. If necessary, use the or the key of the virtual keyboard to go from one page to another.*

- 7- Tap on **Cancel** to de-activate the call diversion option selection or on **Status** to view the number to which corresponding calls are to be diverted.

To return to the standby screen, tap on the **Exit** function key or on the key on the virtual keyboard.

**- To cancel all call diversion:**

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the or the key on the virtual keyboard to bring up the **Settings** screen.
- 3- Tap on the **Settings** screen.
- 4- Tap on **GSM Services**.
- 5- Tap on **Call diverting**.
- 6- Tap on **Cancel all**.

*A message will be displayed on the screen to confirm the cancellation of all call diversion.*

To return to the standby screen, tap on the **Exit** function key or on the key on the virtual keyboard.

**■ PLEASE NOTE:** *If you have subscribed to the **Second line** (Line 2) service, this operation cancels the diversion of all calls (voice calls, fax calls and data calls) only for the line currently being used. To cancel call diversion on the other line, you have to select this line first of all (for further details, see page 47).*

**• Call Waiting (a network service)**

Call waiting is a service which, when activated, allows you to receive incoming calls even when you are already on another call.

**- To activate the Call Waiting service:**

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the or the key on the virtual keyboard to bring up the **Settings** screen.

3- Tap on the **Settings** screen.

4- Tap on **GSM Services**.

5- Tap on **Call Waiting**.

6- Tap on **Activate**.

*A message is displayed on screen to confirm that the service has been activated.*

**- To de-activate the Call Waiting service:**

1- Tap on the **Menu** function key in the standby screen of the Telephone application.

2- Use the or the key on the virtual keyboard to bring up the **Settings** screen.

3- Tap on the **Settings** screen.

4- Tap on **GSM Services**.

5- Tap on **Call Waiting**.

6- Tap on **Cancel**.

*A message will be displayed on the screen to confirm that the service has been de-activated.*

**- To consult the status of the Call waiting service:**

1- Tap on the **Menu** function key in the standby screen of the Telephone application.

2- Use the or the key on the virtual keyboard to bring up the **Settings** screen.

3- Tap on the **Settings** screen.

4- Tap on **GSM Services**.

5- Tap on **Call waiting**.

6- Tap on **Status**.

*A message will be displayed on the screen to inform you of the state of the service: Active or Inactive.*

**• Caller Line Identification (CLI)- To Show/Hide your mobile telephone number**

The caller identification service (Presentation of the number) is offered by most networks.

This service enables you to know the number of the people who call you (or their name, if this is recorded in your phone book).

**- To check whether the caller ID service is offered by your network:**

1- Tap on the **Menu** function key in the standby screen of the Telephone application.

2- Use the or the key on the virtual keyboard to bring up the **Settings** screen.

3- Tap on the **Settings** screen.

4- Tap on **Receiving of caller ID**.

*A message will be displayed on the screen to inform you if the call identification service is offered by your network:*

*Caller number: presentation available indicates that your network offers the call identification service.*

*Caller number: presentation unavailable indicates that your network does not offer the call identification service.*

To return to the standby screen, tap on the **Exit** function key or on the key on the virtual keyboard.

### **- To show or hide your mobile telephone number:**

On some networks, you can hide your mobile telephone number when you choose:

- Enter the following sequence of characters #31# before the number you are calling.

You may also ask your operator to hide your number permanently. In this case, you can reveal your number when you choose:

- Enter the following sequence of characters #31# before the number you are calling.

## **• Standard network settings**

If you wish to re-establish the network settings by default for the transmission of your mobile telephone number:

1- Tap on the **Menu** function key in the standby screen of the Telephone application.

2- Use the ☰ or the ☱ key on the virtual keyboard to bring up the **Settings** screen.

3- Tap on the **Settings** screen.

4- Tap on **GSM Services**.

5- Tap on **Sending my ID**.

6- Tap on **My settings**.

7- Tap on **Preset value**.

*Your Mondo will restore the settings agreed with your network operator.*

To return to the standby screen, tap on the **Exit** function key or on the ☰ key on the virtual keyboard.

## **• To show or hide your number**

1- Tap on the **Menu** function key in the standby screen of the Telephone application.

2- Use the ☰ or the ☱ key on the virtual keyboard to bring up the **Settings** screen.

3- Tap on the **Settings** screen.

4- Tap on **GSM Services**.

5- Tap on **Sending my ID**.

6- Tap on **My settings**.

7- Tap on **Hide my ID** or on **Show my ID**.

To return to the standby screen, tap on the **Exit** function key or on the ☰ key on the virtual keyboard.

## **• To consult your current settings**

1- Tap on the **Menu** function key in the standby screen of the Telephone application.

2- Use the ☰ or the ☱ key on the virtual keyboard to bring up the **Settings** screen.

3- Tap on the **Settings** screen.

4- Tap on **GSM Services**.

5- Tap on **Sending my ID**.

6- Tap on **Status**.

*Your current settings will be displayed on the screen.*

To return to the standby screen, tap on the **Exit** function key or on the ☰ key on the virtual keyboard.

## • How to operate

You can choose between two modes of operation: **Standard** or **Modem**.

### - Standard mode:

If you choose this mode of operation, your Mondo will behave like a class B mobile telephone: it will attempt to connect to the GSM and GPRS networks. If it succeeds in connecting to a GPRS network, the symbol  will be displayed on the screen.

In this mode of operation, you may make and receive telephone calls and transfers of data packets.

#### To choose this mode of operation:

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the  or the  key on the virtual keyboard to bring up the **Settings** screen.
- 3- Tap on the **Settings** screen.
- 4- Tap on **GSM Services**.
- 5- Tap on **Mode of operation**.
- 6- Tap on **Voice (+ Data)**.

To return to the standby screen, tap on the **Exit** function key or on the  key on the virtual keyboard.

### - Modem mode:

If you choose this mode of operation, your Mondo will behave like a class C mobile telephone: it will attempt to connect to GPRS networks only (and not to GSM networks).

In this mode of operation, you may only transmit data packets (your telephone calls are restricted, whatever the capacities of the network).

 **PLEASE NOTE:** *If the GPRS services are lost, your Mondo will return automatically to standard mode after a period of retaining the non-GPRS service.*

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the  or the  key on the virtual keyboard to bring up the **Settings** screen.
- 3- Tap on the **Settings** screen.
- 4- Tap on **GSM Services**.
- 5- Tap on **Mode of operation**.
- 6- Tap on **Modem**.

To return to the standby screen, tap on the **Exit** function key or on the  key on the virtual keyboard.

## • Networks

The memory of your Mondo contains a list of networks. These may be selected and transferred to the list of preferred networks recorded on the SIM card.

When the Telephone application is open, your Mondo automatically seeks the last network to which it was connected (generally the local network). If this is not accessible, it automatically seeks and selects another network from the list of preferred networks recorded on the SIM card.

This list may be adapted when you travel.

The order and name of the networks on the list may be amended.

**- To consult or amend the list of preferred networks:**

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the or the key on the virtual keyboard to bring up the **Settings** screen.
- 3- Tap on the **Settings** screen.
- 4- Tap on **GSM Services**.
- 5- Tap on **Network**.
- 6- Tap on **Preferred list**.  
*A list of networks is displayed.*
- 7- Use the or the key on the virtual keyboard to scroll through the list of preferred networks.

**- If you wish to amend this list or add a network:**

- 8- Tap on the name of the network to be replaced.

**PLEASE NOTE:** *To add a network, tap on an empty space indicated by the symbol ... (at the end of the list of preferred networks).*

- 9- Then tap on the **Options** function key.

The menu displayed on the screen includes the following options:

Option	Function
Modify by list	Displays in alphabetical order the general list of all the networks known which have been pre-recorded in the memory of your Mondo. You just need to tap on the name of a network to substitute it for the network to be replaced.
Modify by code	Displays a screen in which you can enter an MCC or MNC network code (if you know this information).
Delete	Deletes the network that you have previously selected from the list of preferred networks.

- 10- Tap on the option of your choice then follow the instructions on the screen.

To return to the standby screen, tap on the **Exit** function key or on the key on the virtual keyboard.

**- To consult the list of forbidden networks:**

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the or the key on the virtual keyboard to bring up the **Settings** screen.
- 3- Tap on the **Settings** screen.
- 4- Tap on **GSM Services**.
- 5- Tap on **Network**.
- 6- Tap on **Forbidden networks**.  
*A list of forbidden networks is displayed.*

To return to the standby screen, tap on the **Exit** function key or on the key on the virtual keyboard.

**PLEASE NOTE:** *It is impossible to delete a network from the list of prohibited networks.*

**- To find out the name of the home network:**

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the or the key on the virtual keyboard to bring up the **Settings** screen.
- 3- Tap on the **Settings** screen.
- 4- Tap on **GSM Services**.
- 5- Tap on **Network**.
- 6- Tap on **Home network**.

*The name of the home network will be displayed on the screen.*

To return to the standby screen, tap on the **Exit** function key or on the key on the virtual keyboard.

**• Selecting Manual network search**

In some cases, you may wish to select a specific network manually (for example, if it provides better cover in the region where you are).

To do this:

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
  - 2- Use the or the key on the virtual keyboard to bring up the **Settings** screen.
  - 3- Tap on the **Settings** screen.
  - 4- Tap on **GSM Services**.
  - 5- Tap on **Network**.
  - 6- Tap on **Network Search**.
  - 7- Tap on **Manual**.
- The message **Manual network selection** will be displayed first of all on the screen, followed by the list of available networks.*
- 8- Use the or the key on the virtual keyboard to scroll through the list of available networks.
  - 9- Tap on the name of the network of your choice.
- The message **Requesting in progress** will be displayed first of all on the screen, followed by the name of the network requested, then you will return automatically to the standby screen of the Telephone application*

**• Selecting Automatic network search (default setting):**

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
  - 2- Use the or the key on the virtual keyboard to bring up the **Settings** screen.
  - 3- Tap on the **Settings** screen.
  - 4- Tap on **GSM Services**.
  - 5- Tap on **Network**.
  - 6- Tap on **Network search**.
  - 7- Tap on **Automatic**.
- The message **Automatic network selection** will be displayed first of all on the screen, then you will return automatically to the standby screen of the Telephone application.*

## • Call barring (network service)

This network service allows you to bar various types of call from being made or received on your Mondo.

It requires the use of a password for barring calls, which is provided by your operator.

### - To activate the call barring function:

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the  or the  key on the virtual keyboard to bring up the **Settings** screen.
- 3- Tap on the **Settings** screen.
- 4- Tap on **GSM Services**.
- 5- Use the  or the  key on the virtual keyboard to go to the next page of GSM service options.
- 6- Tap on **Call barring**.
- 7- Tap on **Outgoing calls** (to prevent certain types of outgoing call from being made) or on **Incoming calls** (to prevent certain types of incoming call from being received).

The menus which will be displayed on the screen in each case will include the following options:

Your selection	Options proposed in the menu displayed	Corresponding functions
<b>Outgoing calls</b>	All outgoing	The making of calls from your Mondo is totally forbidden.
	International calls	International calls only are prohibited on your Mondo.
	Int'lal excl. home	The making of international calls is forbidden on your Mondo, except calls to subscribers to the local network.
<b>Incoming calls</b>	All incoming	The reception of calls is totally forbidden on your Mondo.
	Roaming only	The reception of calls is only authorised on the home network.

- 8- Tap on the option of your choice.
- 9- Tap on **Activated**.
- 10- Enter your **Password** for barring calls.
- 11- Tap on the **OK** function key.  
*A message will be displayed on the screen to confirm your settings for prohibiting calls.*

To return to the standby screen, tap on the **Exit** function key or on the  key on the virtual keyboard.

### - To consult or de-activate the settings for barring calls:

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the  or the  key on the virtual keyboard to bring up the **Settings** screen.
- 3- Tap on the **Settings** screen.
- 4- Tap on **GSM Services**.
- 5- Use the  key on the virtual keyboard to go to the next page of GSM service options.
- 6- Tap on **Call barring**.

7- Tap on **Outgoing calls** (to consult or amend the prohibition of outgoing calls) or on **Incoming calls** (to consult or amend the prohibition of incoming calls).

8- Tap on the call barring option that you wish to consult or de-activate.

**To consult the status (activated or de-activated) of the selected call barring option:**

9- Tap on **Status**.

*A message will be displayed on the screen to let you know the status of the selected call barring option.*

**To de-activate the selected barring option:**

10- Tap on **Cancel**.

11- Enter your call barring **password**.

12- Tap on the **OK** function key.

*A message will be displayed on the screen to confirm that the selected call barring option has been de-activated.*

To return to the standby screen, tap on the **Exit** function key or on the  key on the virtual keyboard.

**- To change the call barring password:**

1- Tap on the **Menu** function key in the standby screen of the Telephone application.

2- Use the  or the  key on the virtual keyboard to bring up the **Settings** screen.

3- Tap on the **Settings** screen.

4- Tap on **GSM Services**.

5- Use the  key on the virtual keyboard to go to the next page of GSM service options.

6- Tap on **Call barring**.

7- Tap on **Change password**.

8- Enter your old password.

9- Tap on the **OK** function key.

10- Enter your new password.

11- Tap on the **OK** function key.

12- Enter your new password again.

13- Tap on the **OK** function key.

To return to the standby screen, tap on the **Exit** function key or on the  key on the virtual keyboard.

## • **Information messages**

Information messages are broadcast by the networks to all GSM users.

They may contain general information on local telephone numbers, weather, traffic, etc.

Each type of message is numbered to allow you to select the type of information you wish to receive.

There are sixteen types of standard message pre-programmed in the telephone, from which you can make your choice.

New types of message can be recorded in your selection list using the message type number (a three digit number).

Contact your operator for more details about the numbers and types of messages distributed.

Before activating the information message service, your selection list must contain at least one type of message.

Up to 5 different types of message may be programmed in your selection list, but you can only display one message at a time.

**- To add a message type to the selection list:**

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the or the arrow on the virtual keyboard to bring up the **Settings** screen.
- 3- Tap on the **Settings** screen.
- 4- Tap on **Broadcast**.
- 5- Tap on **Message types**.
- 6- Tap on an empty location indicated by ....
- 7- Tap on the **Options** function key.
- 8- Tap on **Amend by list** to select a message type.  
**■ PLEASE NOTE:** If you know the number of the message type that you want to add to your selection list, you may also tap on **Amend by code**, then enter the number of the message type.
- 9- If necessary, use the or the key of the virtual keyboard to scroll through the list of message types.
- 10- Tap on the message type that you want to add to your selection list.  
*A message will be displayed on the screen to confirm your selection.*
- 11- If you want to add other message types to your selection list, tap once more on the **Options** function key, then proceed as indicated above.

To return to the standby screen, tap on the **Exit** function key or on the key on the virtual keyboard.

**- To activate or de-activate the information message service:**

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the or the key on the virtual keyboard to bring up the **Settings** screen.
- 3- Tap on the **Settings** screen.
- 4- Tap on **Broadcast**.
- 5- Tap on **On/Off**.
- 6- Tap on **On** or **Off**.

To return to the standby screen, tap on the **Exit** function key or on the key on the virtual keyboard.

**• Reading information messages**

Information messages can only be displayed from the standby screen of the Telephone application, and are not accessible during a call or from a menu.

A message may contain up to 93 characters and include several pages.

The pages scroll automatically about every 5 seconds.

You may also scroll through them manually by tapping on the or arrow on the virtual keyboard of the Telephone application.

- **Options during the display of messages:**

To delete the message being displayed:

- Tap on the Exit function key.

To dial the number displayed on the screen in the message:

- Tap on the ☎ key on the virtual keyboard, or press the jog wheel of your Mondo.

To access other options:

- Tap on the Options function key.

The menu which is displayed will include the following options:

Option	Function
Delete	Deletes the message being broadcast on the screen.
Delete all	Deletes all the messages in the queue.
Numbers	Enables numbers displayed on the screen to be dialled and, if necessary, recorded in the directory.
Cancel broadcast	De-activates the information message reception function.

- Select the option of your choice.

- **Activating/de-activating the audio alert:**

You may programme a beep each time a new message is received, as follows:

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the ⌂ or the ⌃ key on the virtual keyboard to bring up the **Settings** screen.
- 3- Tap on the **Settings** screen.
- 4- Tap on **Broadcast**.
- 5- Tap on **On/Off**.
- 6- Tap on **On** or on **Off**.

To return to the standby screen, tap on the **Exit** function key or on the ☎ key on the virtual keyboard.

- **Replacement or deletion of a message type in the selection list:**

The message types recorded in the selection list may be amended or deleted as follows:

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the ⌂ or the ⌃ arrow on the virtual keyboard to bring up the **Settings** screen.
- 3- Tap on the **Settings** screen.
- 4- Tap on **Broadcast**.
- 5- Tap on **Message types**.
- 6- Tap on the message type you want to replace or delete.
- 7- Tap on the **Options** function key.
- 8- Tap on **Amend by list** to replace the selected message type by another message type, or on **Delete** to remove it from the selection list.

■ PLEASE NOTE: If you know the code of the message type that you want to add to your selection list, you may also tap on Amend by code, then enter its (three digit) code.

To return to the standby screen, tap on the Exit function key or on the ☰ key on the virtual keyboard.

#### • The language of the information messages

All information messages may be displayed in one of the following eight languages: English, Dutch, French, German, Italian, Spanish, Portuguese and Greek.

To select the language of your choice:

- 1- Tap on the Menu function key in the standby screen of the Telephone application.
- 2- Use the ☰ or the ☱ key on the virtual keyboard to bring up the Settings screen.
- 3- Tap on the Settings screen.
- 4- Tap on Broadcast.
- 5- Tap on Languages.
- 6- If necessary, use the ☰ or the ☱ key on the virtual keyboard to scroll through the list of available languages.
- 7- Tap on the language in which you wish to receive information messages.

To return to the standby screen, tap on the Exit function key or on the ☰ key on the virtual keyboard.

## 10- WAP

Your Mondo is fitted with a WAP browser which enables you to have access via the Internet to the services (news, sport, weather, television programmes, etc.) provided by your network operator and/or your Internet Access Provider.

To access these services from your Mondo, check that you have a DATA subscription.

Also check with your operator that the connection parameters have been pre-programmed on your Mondo before its delivery. If not, you must enter these parameters manually yourself and record them.

Once the parameters are recorded, you can use your WAP browser to access the services.

■ PLEASE NOTE: Access to the connection parameters may depend on the parameters entered in the telephone if it has been pre-programmed in the factory before being delivered. In certain cases, to avoid errors, it is possible that these parameters have been locked, thus prohibiting any manual programming by the user.

#### • Setting/editing into memory/edition of the connection parameters (provided by your operator)

Before starting, if you have not already done so, set the date and time on your Mondo.

Your Mondo enables you to access WAP services by using a standard GSM (circuit) connection or a fast GPRS (packet) connection.

In order to use WAP services, you must create user profiles associated with your various Internet gateways. For each profile, you must enter the general parameters of the gateway and specific parameters which correspond to access by the GSM network and/or access by the GPRS network.

This section explains the procedure to be followed in the various possible cases. Before starting to create a profile, obtain all the necessary information from your network operator.

**- The information required for access by the GSM network is:**

- 1- The call number for access.
- 2- The mode of transmission: digital or analog.
- 3- The speed of transmission (9600 bits/second standard, or 14400 bits/second if your operator supports this rate).
- 4- The user name ("login").
- 5- The user password ("password").

**- The information required for access by the GPRS network is:**

- 1- The name of the GPRS access point.
- 2- The user name ("login").
- 3- The user password ("password").

■ PLEASE NOTE: *The user name and the user password may be identical or different for each of the access modes (circuit or packet), depending on your network operator.*

**- The information relating to the gateway itself is:**

- 1- The IP address of the gateway of your operator.
- 2- The number of the port used for access to the host machine of the gateway (this number is 9203 for a secure connection, and 9201 for a non secure connection).
- 3- Whether security is used by your operator.
- 4- The location of the home page of your gateway.

For the information required for access by the GPRS network, you must first include the information for the GPRS access point in the directory of access points. The procedure to follow is described in the section which deals with the WAP parameters.

■ NB: *You may obtain the information above from your Internet Access Provider (IAP) and from your GSM network operator.*

**- Creation of a profile with access by the GSM network alone:**

When a connection is made with this type of profile, your Mondo uses GSM (of the circuit type) to establish the WAP connection. If the GSM service is not available (for example, if you are outside of GSM cover), the connection will not be made.

To enter and record the connection parameters of a profile with access by the GSM (circuit) network alone:

- 1- Tap on the Menu function key in the standby screen of the Telephone application.
  - 2- Use the ☎ or ☛ key on the virtual keyboard to bring up the WAP screen.
  - 3- Tap on the WAP screen.
- PLEASE NOTE: *You may also tap on the WAP function key in the standby screen of the Telephone application to go directly to the WAP menu.*
- 4- Tap on Profile list.

- 5- Tap on an empty profile location, indicated by ....
- 6- Tap on **Edit**.
- 7- Enter your 4 digit **Locking code**, then tap on the **OK** function key.  
**■ PLEASE NOTE:** If you have not amended the default locking code since the acquisition of your Mondo, it will be **0000**.
- 8- Enter the **Profile name**, then tap on the **OK** function key.
- 9- Tap on **Circuit** in the list of **connection modes**.
- 10- Enter the **Call number**, then tap on the **OK** function key.
- 11- Tap on the **Mode** of transmission of your choice: **Digital** or **Analog**.
- 12- Tap on the **Speed** of transmission of your choice if it is asked for: **9600** or **14400**.
- 13- Enter a **User name** (the "login" corresponding to the access circuit for the profile selected) then tap on the **OK** function key.
- 14- Enter the **User password** (the password corresponding to the access circuit for the profile selected), then tap on the **OK** function key.
- 15- Enter the **Gateway IP address**, then tap on the **OK** function key.
- 16- Enter/Correct the **Normal port** if it is asked for (this value is normally standard and you should not have to amend it, unless a different value is indicated by your operator), then tap on the **OK** function key.
- 17- Enter/Correct the **Secure port** if it is asked for (this value is normally standard and you should not have to amend it, unless a different value is indicated by your operator), then tap on the **OK** function key.
- 18- Enter the address of the **Home page**, then tap on the **OK** function key.
- 19- Tap on the **Activate security** parameter of your choice: **On** or **Off**.  
*A confirmation message will be displayed on the screen.*

#### **- Creation of a profile with access by the GPRS network alone:**

When a connection is made with this type of profile, your Mondo uses GPRS support (of the packet type) to establish the WAP connection. If the GPRS service is not available, the connection will not be made. Note that the GPRS service may be unavailable even where there is GSM cover. This depends on the infrastructures of your network operator.

Before creating this type of profile, make sure that you have recorded the information relating to the GPRS network access point in the access points directory, under the **WAP/Settings** menu. If this list is empty, you will not be able to create the profile.

To enter and record the connection parameters of a profile with access by the GPRS network (access by parcels) alone, proceed as follows:

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the  or the  key on the virtual keyboard to bring up the **WAP** screen.
- 3- Tap on the **WAP** screen.  
**■ PLEASE NOTE:** You may also tap on the **WAP** function key in the standby screen of the Telephone application to go directly to the **WAP** menu.
- 4- Tap on **Profile list**.
- 5- Tap on an empty profile location, indicated by ....

- 6- Tap on Edit.
- 7- Enter your 4 digit Locking code, then tap on the OK function key.  
**■ PLEASE NOTE:** If you have not amended the default locking code since the acquisition of your Mondo, it will be **0000**.
- 8- Enter the Proxy name, then tap on the OK function key.
- 9- Tap on Packets, in the list of connection modes.
- 10- Select the required GPRS access point from the list displayed, by tapping on the alias of the access point of your choice.
- 11- Enter the Gateway IP address, then tap on the OK function key.
- 12- Enter/Correct the Normal port if it is asked for (this value is normally standard and you should not have to amend it, unless a different value is indicated by your operator), then tap on the OK function key.
- 13- Enter/Correct the Secure port if it is asked for (this value is normally standard and you should not have to amend it, unless a different value is indicated by your operator), then tap on the OK function key.
- 14- Enter the address of the Home page, then tap on the OK function key.
- 15- Tap on the Activate security parameter of your choice: On or Off.  
A confirmation message will be displayed on the screen.

#### **- Creating of a mixed profile with access by the GSM or GPRS networks:**

When a connection is made with this type of profile, the first medium tried by your Mondo is that which you have defined beforehand in the WAP settings (**Preferred medium**). If connection is impossible using this support, the other support will be tried automatically.

By default, and if the reception conditions allow, the support tried first will be the GPRS (parcels) medium, then the GSM (circuit) medium if this fails.

Before creating this type of profile, make sure that you have recorded the information relating to the GPRS network access point in the access points directory, under the **WAP/Settings** menu. If this list is empty, you will not be able to create the profile.

To enter and record the connection parameters of a profile with access by the GSM (circuit) or GPRS (packet) networks, proceed as follows:

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the or the arrow on the virtual keyboard to bring up the **WAP** screen.
- 3- Tap on the **WAP** screen.  
**■ PLEASE NOTE:** You may also tap on the **WAP** function key in the standby screen of the Telephone application to go directly to the **WAP** menu.
- 4- Tap on **Profile list**.
- 5- Tap on an empty profile location, indicated by ....
- 6- Tap on **Amend**.
- 7- Enter your 4 digit Locking code, then tap on the OK function key.  
**■ PLEASE NOTE:** If you have not amended the default locking code since the acquisition of your Mondo, it will be **0000**.
- 8- Enter the Profile name, then tap on the OK function key.
- 9- Tap on **Circuit + packets** in the list of connection modes.

- 10- Select the required GPRS access point from the list displayed, by tapping on the alias of the access point of your choice.
- 11- Enter the **Call number**, then tap on the **OK** function key.
- 12- Tap on the **Mode** of transmission of your choice: **Digital** or **Analog**.
- 13- Tap on the Speed of transmission of your choice if it is asked for: **9600** or **14400**.
- 14- Enter a **User name** (the "login" corresponding to the access circuit for the profile selected), then tap on the **OK** function key.
- 15- Enter the **User password** (the password corresponding to the access circuit for the profile selected), then tap on the **OK** function key.
- 16- Enter the **Gateway IP address**, then tap on the **OK** function key.
- 17- Enter/Correct the **Normal port** if it is asked for (this value is normally standard and you should not have to amend it, unless a different value is indicated by your operator), then tap on the **OK** function key.
- 18- Enter/Correct the **Secure port** if it is asked for (this value is normally standard and you should not have to amend it, unless a different value is indicated by your operator), then tap on the **OK** function key.
- 19- Enter the address of the **Home page**, then tap on the **OK** function key.
- 20- Tap on the **Activate security** parameter of your choice: **On** or **Off**.

*A confirmation message will be displayed on the screen.*

#### **- To activate the required profile:**

- 1- Tap on the required profile in the list of profiles displayed on the screen.

To return to the standby screen, tap on the **Exit** function key or on the  key on the virtual keyboard.

#### **■ PLEASE NOTE:**

- If the PPP call number, the connection name and password, the http address of the home page and the IP address are not predefined, ask your operator and/or your Internet Access Provider for this information.
- As regards the GPRS access point, ask your operator and/or your Internet Access Provider (IAP) for the full name of the access point, the user name and the user password.

### **• Customizing of your connection parameters**

The connection parameters enable you to optimise the operation of your Mondo while it is connected to the Internet.

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the  or the  arrow on the virtual keyboard to bring up the **WAP** screen.
- 3- Tap on the **WAP** screen.
- 4- Use the  arrow on the virtual keyboard to go quickly to the second page of the **WAP** menu.

**■ PLEASE NOTE:** You may also tap on the **WAP** function key in the standby screen of the Telephone application to go directly to the **WAP** menu.

- 5- Tap on **Settings**.

The menu which is displayed will include the following options:

Option	Function
Clear cache	<p>During an Internet connection session, certain information and certain services to which you have had access have been stored in a zone of memory called the cache zone.</p> <p>To delete the elements contained in the cache memory:</p> <ul style="list-style-type: none"> <li>➤ Tap on this option, then tap on <b>Yes</b>.</li> </ul>
Download pictures	<p>Certain pages of the sites may contain attached images whose downloading may take a lot of time.</p> <p>To reject all images and shorten the time for downloading:</p> <ul style="list-style-type: none"> <li>➤ Tap on this option, then tap on <b>Off</b>.</li> </ul>
Scripting	<p>This option authorises or prohibits the execution of scripts within a page. These scripts enable the entry of data or the execution of calculations once the page has been loaded.</p>
Auto-disconnect	<p>This function disconnects your Mondo from the Internet network after a period of inactivity that you may define yourself. Automatic disconnection may be defined differently for a packet type support or a circuit type support (A shorter time is advised for the circuit support, as this type of support consumes more radio resources than the packet support).</p> <ul style="list-style-type: none"> <li>➤ Tap on this option.</li> <li>➤ Tap on <b>Circuit</b> or <b>Packet support</b>.</li> </ul> <p>To activate the automatic disconnection function relating to the selected support:</p> <ul style="list-style-type: none"> <li>➤ Enter a disconnection time (0 to 60 minutes), then tap on the <b>OK</b> function key.</li> </ul> <p>To de-activate the automatic disconnection function relating to the selected support:</p> <ul style="list-style-type: none"> <li>➤ Proceed as above and enter a disconnection time of <b>0</b>.</li> </ul>
GPRS access points	<p>This option provides access to the directory of GPRS access points using a GPRS type connection support within the GSM network.</p> <p>A GPRS access point is the name of an access gate to an external network (for example, the Internet).</p> <p>Each access point has an associated full name, user name and user password. An alias (free name) enables you to identify and manage your access points at your convenience.</p> <p>For more details about the creation of a GPRS access point, see page 63.</p>
Preferred medium	<p>This parameter serves to indicate to your Mondo the type of medium it must use in priority to establish a WAP connection. You may select the <b>Packet</b> (GPRS) medium, which is fast and consumes few radio resources, or the <b>Circuit</b> (GSM) medium, which is slower and uses more radio resources.</p> <ul style="list-style-type: none"> <li>➤ Tap on the option of your choice.</li> </ul> <p><b>■ PLEASE NOTE:</b> This option is only used on profiles defined as mixed (<b>Circuit + parcels</b>). The <b>preferred medium</b> defined by default is the <b>Parcels</b> (GPRS) support.</p>

**- Contact your operator first to obtain the full name of the access point, as well as the associated user name and user password:**

Contact your operator first to obtain the full name of the access point, as well as the associated user name and user password.

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the or the key on the virtual keyboard to bring up the **WAP** screen.
- 3- Tap on the **WAP** screen.
- 4- Use the key on the virtual keyboard to go quickly to the second page of the **WAP** menu.

**■ PLEASE NOTE:** You may also tap on the **WAP** function key in the standby screen of the Telephone application to go directly to the **WAP** menu.

- 5- Tap on **Settings**.
- 6- Tap on **GPRS access points**.
- 7- Tap on an empty location, indicated by ....
- 8- Tap on **Edit**.
- 9- Enter the **Alias** of the access point, then tap on the **OK** function key.
- 10- Enter the **Name** of the access point (operator information), then tap on the **OK** function key.
- 11- Enter a **User name** or "login" for this access point (operator information), then tap on the **OK** function key.
- 12- Enter a **User password** for this access point (operator information), then tap on the **OK** function key.

*A confirmation message will appear on the screen, then the directory of access points will appear. In this directory, the new access point is selected and identified by its alias.*

To return to the standby screen, tap on the Exit function key or on the key on the virtual keyboard.

**• Accessing to the on line services proposed by your operator**

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
- 2- Use the or the arrow on the virtual keyboard to bring up the **WAP** screen.
- 3- Tap on the **WAP** screen.

**■ PLEASE NOTE:** You may also tap on the **WAP** function key in the standby screen of the Telephone application to go directly to the **WAP** menu.

- 4- Tap on **Home page**.
- The message Connection to, followed by the gateway name, will be displayed on the screen while the access is being carried out.*
- The message Loading (the home page) will then appear.*

Once it is connected, your Mondo displays the links proposed by your Internet Access Provider or by your operator. The symbol displayed on the screen indicates that your connection is active.

- Use the or the arrow on the virtual keyboard to scroll upwards or downwards in the menus.
- Tap on the elements of your choice with your stylus to open them.

- Use the or the arrow on the virtual keyboard to return to the previous page or go to the next page in the menus.

**■ PLEASE NOTE:** While browsing, security may be activated by means of the "Activate security" option (for more details, see page 41). This operation closes the non secure session in progress and enables local browsing to continue (using the pages recorded in the cache memory). If a connection to the network is required, a secure connection is requested for the same profile. This procedure does not operate systematically, because of the purge of parameters preceding connection by the server. In this case, browsing must restart from the beginning. Once the secure connection is established, the symbol will be displayed on the screen to indicate to you that the on line connection is in secure mode.

## • On line access to the connection options

If you tap on the **Options** function key when connected, a menu will be displayed.

**■ NB:** If this **Options** key does not appear, you may also gain access to this menu by tapping the key on the virtual keyboard.

This menu will include the following options:

Option	Function
Previous	Returns to the previous page.
Zoom +/-	Increases or decreases the size of the text displayed.
Disconnect	Disconnects the browser from the network. However the current page will remain locally active and may be used with the browser of your Mondo.
Clear cache *	Deletes the information recorded in the cache memory.
Add to favourites *	Adds the current page to the list of your favourites.
Go to ... *	Displays a favourite that has been memorised previously.
Home page	Returns to the home page.
Update	Updates the current page.
Terminate the session	Disconnects your Mondo from the Internet network.

The appearance of the options indicated by an asterisk (\*) may depend on the operator and/or the parameters entered in the **Settings** menu.

## • Ending the on line connection

To terminate the Internet connection:

- Tap on the key on the virtual keyboard of the Telephone application, or press the jog wheel of your Mondo.
- You may also tap on **Terminate the session** in the Options menu presented above.

## • Creating favourites

If you intend to revisit to a site or return frequently to certain sites.

In this case, you should memorise these sites (or pages) in the form of favourites (or bookmarks) which represent direct access links to the Internet sites of your choice.

You may memorise a maximum of 5 favourites.

These may only be used if they are accessible at the parameter level of the current connection of your operator and/or your Internet Access Provider.

There are two methods for creating favourites.

**- Directly from the standby screen:**

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
  - 2- Use the or the key on the virtual keyboard to bring up the **WAP** screen.
  - 3- Tap on the **WAP** screen.
- PLEASE NOTE:** You may also tap on the **WAP** function key in the standby screen of the Telephone application to go directly to the **WAP** menu.
- 4- Tap on **My Bookmarks**.
  - 5- Tap on an empty location indicated by ... (or on a favourite site name that you want to replace).
  - 6- Tap on **Edit**.
  - 7- Enter the **name** that you wish to give to your new favourite site, then tap on the **OK** function key.
  - 8- Enter the **Internet address** of your new favourite site, then tap on the **OK** function key.

To return to the standby screen, tap on the **Exit** function key or on the key on the virtual keyboard.

**- During an active connection, whilst a page is being viewed:**

- 1- Tap on the function key on the virtual keyboard to display the **Options** menu.
- 2- Tap on the **Add a favourite** option.
- 3- Enter a **name** for the site or the page that you want to add to the list of your favourites, then tap on the **OK** function key.

**■ PLEASE NOTE:** Favourites can only be edited or deleted from the **WAP** menu, while you are disconnected.

**• Use of favourites**

There are two methods for using favourites.

**- Directly from the standby screen:**

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
  - 2- Use the or the arrow on the virtual keyboard to bring up the **WAP** screen.
  - 3- Tap on the **WAP** screen.
- PLEASE NOTE:** You may also tap on the **WAP** function key in the standby screen of the Telephone application to go directly to the **WAP** menu.
- 4- Tap on **My Bookmarks**.
  - 5- Tap on the favourite of your choice.

**- While browsing the Internet:**

- 1- Tap on the  function key on the virtual keyboard to display the **Options** menu.
- 2- Tap on the **Go to ...** option.
- 3- Tap on the favourite of your choice.

**• Other site**

This option enables you to enter the address of a known Internet site and go directly to this site.

**⚠ WARNING:** *Unlike the addresses of your favourites, the addresses entered using the **Other site** option are not retained in memory; you must enter them at every new connection.*

**- To access the Other site option:**

- 1- Tap on the **Menu** function key in the standby screen of the Telephone application.
  - 2- Use the  or the  arrow on the virtual keyboard to bring up the **WAP** screen.
  - 3- Tap on the **WAP** screen.
- PLEASE NOTE:** *You may also tap on the **WAP** function key in the standby screen of the Telephone application to go directly to the **WAP** menu.*
- 4- Tap on **Other site**.
  - 5- Enter the address of the site to which you want to connect, then tap on the **OK** function key.

## **11- GSM User Interface Codes**

Your Mondo supports the standard GSM key sequences including the characters \* and #, sent directly from the keyboard to the network.

These sequences activate the additional services proposed by the network.

Contact your operator for more information about these services.
